The notes form part of these financial statements

LOITZ STIFTUNG LTD

Notes to the Financial Statements

for the Period Ended 30 September 2021

1. Accounting policies

Basis of measurement and preparation

These financial statements have been prepared in accordance with the provisions of Financial Reporting Standard 101

Turnover policy

If the financial year of the company was a member of the same group as our qualifying company does not end on the same date, the figures to include for that company should be drawn from the last financial year that ended before the end of the qualifying company's financial year.

Tangible fixed assets depreciation policy

File servers, network infrastructure and other IT equipment - 5 years
Office equipment - 5 years
Motor vehicles - 4 years
PCs & Laptops - 4 years

Intangible fixed assets amortisation policy

The amortization of an asset should only start when the asset is brought into actual use, and not before, even if the requisite intangible asset has been acquired. The level of amortization should be appropriate so that the book value of an asset is not under or overstated. The method of amortization used should be commensurate with the use of the asset. If no method is determinable, then the asset must be amortized on a straight-line basis.

Valuation information and policy

All investments held by the Company are classified as "fair value through profit or loss". As the Company's business is investing in financial assets with a view to profiting from their total return in the form of interest, dividends or increase in fair value, listed equities, unlisted equities and fixed income securities are designated as fair value through profit or loss on initial recognition. The Company manages and evaluates the performance of these investments on a fair value basis in accordance with its investment strategy. Investments are initially recognised at cost, being the fair value of the consideration, less any transaction costs payable. After initial recognition, investments are measured at fair value, with movements in fair value of investments and impairment of investments recognised in the Statement of comprehensive income and allocated to capital. For investments actively traded in organised financial markets, fair value is solely determined by reference to Stock Exchange quoted market bid prices at the close of business on the valuation date, without adjustment for transaction costs necessary to realise the asset. For the avoidance of doubt, in circumstances in which the Manager and/or any of the Directors is in possession of inside information or unpublished price sensitive information relating to any of the Company's quoted investments, the net asset value will not reflect such information.
