Strategic report

The directors present their strategic report for the year ended 31 December 2015.

Principal activity

The principal activity of the Company continues to be the marketing, production and distribution of non-alcoholic beverages throughout Great Britain.

Review of the business

The profit on ordinary activities for the year, after taxation, is £204.4m (2014: £204.3m).

Leading brands include Coca-Cola, Diet Coke, Coca-Cola Zero, Fanta, Dr Pepper, Sprite, Schweppes, Schweppes Abbey Well, Glacéau, Relentless, Powerade, Oasis, 5 Alive, Monster, Appletiser, Ocean Spray and Capri Sun.

During the year the Company transitioned from UK GAAP to FRS 101 - Reduced Disclosure Framework and has taken advantage of the disclosure exemptions allowed under this standard. The Company's parent undertaking, Coca-Cola Enterprises Great Britain Limited, was notified of and did not object to the use of the EU-adopted IFRS disclosure exemptions. The recognition or measurement differences arising on the adoption of FRS 101 are disclosed in note 31.

The Company's key financial and other performance indicators during the year were as follows:

	2015 £000	2014 £000	Change %
Turnover	1,754,152	1 757,899	(0.2%)
Gross profit	634,840	638,247	(0.5%)
Operating profit	248,833	254,029	(2.1%)
Profit after tax	204,448	204,316	0.1%
Shareholder's funds	484,020	473,706	2.2%
Average number of employees	3,541	3,616	

Turnover decreased by 0.2% during the year. The shareholders' funds have increased by 2.2%, mainly due to the realised profit after tax of £204.4m and the fact that the Company paid less dividends in 2015 £160m (2014: £195m). In the current year the shareholders' funds were affected by an unfavourable movement in the pension scheme – loss of £42.1m (2014: loss of £23.6m).

On August 6, 2015, the ultimate parent company Coca-Cola Enterprises Inc. (CCE) entered into agreement with The Coca-Cola Company (TCCC), Coca-Cola Iberian Partners S.A. (CCIP), the privately-owned Coca-Cola bottler operating primarily in Spain and Portugal, and Coca-Cola Erfrischungsgetränke AG (CCEAG), the wholly-owned TCCC bottler operating in Germany, under which:

- The parties agreed to combine their respective businesses by combining CCE, CCIP, and CCEAG. The merger will be effected through the contribution of CCIP and CCEAG to a newly created entity, Coca-Cola European Partners, plc (CCEP), and the merger of CCE with and into a newly formed indirect U.S. subsidiary of CCEP (MergeCo), with MergeCo continuing as the surviving entity. Upon completion of the Merger, CCEP will consist of businesses involved in the marketing, production, and distribution of beverages in Andorra, Belgium, France, Germany, Great Britain, Iceland, Luxemburg, Monaco, the Netherlands, Norway, Portugal, Spain, and Sweden.
- Following the Merger, CCEP will directly and indirectly wholly-own all contributed assets and liabilities of CCE, CCIP and CCEAG.

On 28th May 2016, the merger and the formation of CCEP Plc were officially completed.

Strategic report

Principal risks and uncertainties

The directors deem the following risks and uncertainties could adversely impact our business and financial results when and if they were to occur:

- Business is dependent upon the relationship with The Coca-Cola Company ("TCCC").

Our product licensing agreements with TCCC state that they are for fixed terms, and most of them are renewable only at the discretion of TCCC. A decision by TCCC not to renew a current fixed-term product licensing agreement at the end of its term could substantially and adversely affect our financial results.

- Increase in costs or limitation of supplies of raw materials.

Increases in the costs of raw materials, ingredients, or packaging materials, such as aluminium, sugar, PET (plastic), fuel, or other cost items, and the inability to pass these increased costs on to our customers in the form of higher prices, would have an adverse impact on our financial results. We use supplier pricing agreements and, at times, derivative financial instruments to manage the volatility and market risk with respect to certain commodities. Generally, these hedging instruments establish the purchase price for these commodities in advance of the time of delivery.

- We purchase our entire requirement of concentrates and syrups for TCCC owned brands from TCCC at prices and terms determined from time to time by TCCC at its sole discretion. Coca-Cola Enterprises Inc. has entered into 10-year bottling agreement with TCCC which extend through October, 2, 2020, containing the right for Coca-Cola Enterprises Inc. to request a 10-year renewal. Coca-Cola Enterprises Inc. and TCCC reached an understanding on a new incidence-based concentrate pricing model and funding program which was effective on January, 1, 2016. The term of this new understanding is tied to the term of the bottling agreement, which expire on October, 2, 2020.
- Legislative or regulatory changes that affect our products, distribution, or packaging could reduce demand for our products or increase our costs. Our business model depends on the availability of our various products and packages in multiple channels and locations to satisfy the needs of our customers and consumers. Laws that restrict our ability to distribute products in certain channels and locations, as well as laws that require deposits for certain types of packages or those that limit our ability to design new packages or market certain packages, could negatively impact our financial results.

Directors' report

Registered No. 27173 (England and Wales)

The directors present their report for the year ended 31 December 2015.

Directors

The directors shown below have held office during the whole of the period from 1 January 2015 to the date of this report.

- F. Govaerts
- J. Marshall
- P. van Reesch
- L. Den Hollander
- R. Peters
- E. Walker

None of the directors held any interests in the share capital of the Company during the year under review.

The Company has taken advantage of the exemption permitted by the Companies Act 2006 not to disclose the directors' interest in the share capital of the ultimate parent company on the grounds that the ultimate parent company is incorporated outside of Great Britain.

Dividends

Dividends of £160m were declared and paid in 2015 (2014: £195m).

Future developments

The directors are satisfied with the results for the year and expect the present level of activity to be sustained for the foreseeable future.

Financial instruments

The Company finances its activities with a combination of loans from group companies, finance leases and hire purchase contracts, cash and short term deposits. Other financial assets and liabilities, such as trade debtors and trade creditors, arise directly from the Company's operating activities. The Company also enters into derivative transactions, including principally forward currency and commodity contracts and options to manage the cash flows and currency risks arising from the Company's underlying business activities operation.

Financial instruments give rise to price, credit, currency, liquidity and cash flow risks.

Information on how these risks arise and the objectives, policies and processes for their management and the methods used to measure each risk is set out below.

The Company, as part of the Coca-Cola Enterprises Inc. group, has established a risk and financial management framework whose primary objectives are to protect the companies within the group from events that hinder the achievement of the Group's performance objective. The objectives aim to limit undue counterparty risks, ensure sufficient working capital exists and monitor the management of risk at a business unit level.

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company's credit risk is primarily attributable to its trade receivables. In order to manage credit risk the Company performs an individual risk assessment based upon independent credit references, financial position, past experiences and other factors to incorporate the latest developments and qualitative information.

To maintain the relationships with key customers, the Company also strives to work in partnership with key distributors to deliver the products required whilst through the use of bank guarantees, trade insurance and payments in advance attempting to minimise the risk of being unable to recover a debt.

Directors' report

Financial instruments (continued)

Price risk

The Company is exposed to the risk of changes in commodity prices in relation to its purchase of certain raw materials.

The Company uses commodity forward contracts to hedge against this risk. All commodity forward contracts hedge future purchases of raw materials and the contracts are settled by physical delivery.

Currency risks

The Company is exposed to currency risks in respect of its purchases of raw materials and borrowings from group companies. The Company manages currency exposures within prescribed limits, mainly through the use of forward foreign currency exchange contracts.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. The Company aims to mitigate liquidity risk by managing cash generation by its operations, applying cash collection targets for key accounts and using the related party borrowing facilities available to the Company. Details of outstanding borrowing and their terms are included in note 19.

Cash flow risk

Cash flow risk is the risk or exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability such as future interest payments on a variable rate debt. The Company manages this risk (where significant) by use of derivatives.

Use of derivatives

The Company uses forward foreign currency contracts and options to manage the exposure arising on forecast payments as explained above.

Research and development

Research in the beverages field is undertaken on behalf of the Company by The Coca-Cola Company (TCCC). From time to time the Company engages third parties to undertake marketing research on its behalf.

Events since the balance sheet date

In 2016 the Company has repaid its outstanding loans with Bottling Holding Luxemburg SARL and Coca-Cola Enterprises Norge AS. Both loans were with principal £20m and average interest rate 1.03%.

Charitable contributions

During the year, contributions within Great Britain to charities amounted to £17,000 (2014: £18,000).

Directors' report

Disabled employees

The Company always considers carefully an application for employment by any registered disabled person. If an employee becomes disabled it is normal practice (where relevant) to offer an alternative job in all, but the most extreme circumstances and to provide retraining where necessary. The Company's inclusion and fair treatment policy covers training, development and promotion and applies to minority groups, including disabled people.

Employee involvement

The policy of informing employees is maintained through regular newsletters and electronic communications. Employees are encouraged to present their views and suggestions in respect of the Company's performance. Regular meetings are held between local management and employees to allow a free flow of information and ideas. These meetings include, but are not limited to, National & Local Business Connections meetings.

Directors' liabilities

At the date of signing these financial statements, the Company does not have any indemnity provisions to or in favour of one or more of its directors against liability in respect of proceedings brought by third parties, subject to the conditions set out in the Companies Act 2006.

Going Concern

After making enquires, the directors have a reasonable expectation that the Company and the group have adequate resources to continue in operational existence for the foreseeable future. Accordingly they continue to adopt the going concern basis in preparing the annual report and accounts.

Annual general meeting and auditors

Resolutions have been passed in accordance with the provisions of sections 366(a) and 386 of the Companies Act 2006 such that the Group is not required to hold an Annual General Meeting or annually reappoint the auditors.

Directors' statement as to disclosure of information to auditors

The directors who were members of the board at the time of approving the directors' report are listed on page 4. Having made enquiries of fellow directors and of the Company's auditors, each of these directors confirms that:

- to the best of each director's knowledge and belief, there is no information (that is, information needed by the Company's auditors in connection with preparing their report) of which the Company's auditors are unaware; and
- each director has taken all the steps a director might reasonably be expected to have taken to be aware of relevant audit information and to establish that the Company's auditors are aware of that information.

P. Van Reesch - Director

20th July, 2016

Statement of Directors' responsibilities

The directors are responsible for preparing the Strategic Report, Directors' Report and the financial statements in accordance with applicable UK law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss for that period.

In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent; and
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

on behalf of the board

P. Van Reesch - Director

20th July, 2016

Independent Auditor's report

We have audited the financial statements of Coca-Cola Enterprises Limited for the year ended 31 December 2015 which comprise the Statement of Comprehensive Income, the Statement of Changes in Equity, the Statement of Financial Position and the related notes 1 to 31. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice), including Financial Reporting Standard 101 'Reduced Disclosure Framework'.

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of directors and auditor

As explained more fully in the Directors' Responsibilities Statement set out on page 7, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2015 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 'Reduced Disclosure Framework'; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion the information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

P. Van Reesch - Director

20th July, 2016

1. Authorisation of financial statements and statement of compliance with FRS 101

The financial statements of Coca-Cola Enterprises Limited (the "Company") for the year ended 31 December 2015 were authorised for issue by the board of directors on 20 July 2016 and the balance sheet was signed on the board's behalf by P. Van Reesch. Coca-Cola Entity Limited is incorporated and domiciled in England and Wales.

These financial statements were prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101) and in accordance with applicable accounting standards.

The Company's financial statements are presented in Sterling and all values are rounded to the nearest thousand pounds (£000) except when otherwise indicated.

Preparation of consolidated financial statements

The Company has taken advantage of the exemption under s401 of the Companies Act 2006 not to prepare group accounts as it is a wholly owned subsidiary of Coca-Cola Enterprises Inc. Consequently, the financial statements represent information about the Company as an individual undertaking rather than the group.

The results of Coca-Cola Enterprises Limited are included in the consolidated financial statements of Coca-Cola Enterprises Inc. which are available from 2500 Windy Ridge Parkway, Atlanta, Georgia, 30339.

The principal accounting policies adopted by the Company are set out in note 2.

2. Accounting policies

2.1 Basis of preparation

The Company has transitioned to FRS 101 from previously extant UK Generally Accepted Accounting Practice for all periods presented. Transition tables showing all material adjustments are disclosed in note 31. The accounting policies which follow set out those policies which apply in preparing the financial statements for the year ended 31 December 2015.

The Company has taken advantage of the following disclosure exemptions under FRS 101:

- a) the requirements of paragraphs 45(b) and 46-52 of IFRS 2 Share based Payment;
- b) the requirements of IFRS 7 Financial Instruments: Disclosures;
- c) the requirements of paragraphs 91-99 of IFRS 13 Fair Value Measurement;
- d) the requirement in paragraph 38 of IAS 1 'Presentation of Financial Statements' to present comparative information in respect of:
 - (i) paragraph 79(a)(iv) of IAS 1;
 - (ii) paragraph 73(e) of IAS 16 Property, Plant and Equipment;
- e) the requirements of paragraphs 10(d), 10(f), 39(c) and 134-136 of IAS 1 Presentation of Financial Statements;
- f) the requirements of IAS 7 Statement of Cash Flows;
- g) the requirements of paragraphs 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors;
- h) the requirements of paragraph 17 of IAS 24 Related Party Disclosures;
- i) the requirements in IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member; and
- j) the requirements of paragraphs 134(d)-134(f) and 135(c)-135(e) of IAS 36 Impairment of Assets

2.2 Judgements and key sources of estimation uncertainty

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities as at the balance sheet date and the amounts reported for revenues and expenses during the year. However, the nature of estimation means that actual outcomes could differ from those estimates.

a) Judgements

The following judgements (apart from those involving estimates) have had the most significant effect on amounts recognised in the financial statements:

Lease classification

The Company has entered into property and equipment leases as the lessee. The classification of such leases as operating or finance lease requires the Company to determine, based on an evaluation of the terms and conditions of the arrangements, whether it retains or acquires the significant risks and rewards of ownership of these assets and accordingly whether the lease requires an asset and liability to be recognised in the balance sheet.

b) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Pension

The cost of the defined benefit pension plan is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and the long term nature of the plan, such estimates are subject to significant uncertainty. In determining the appropriate discount rate, management considers the interest rates of corporate bonds in the respective currency with at least AA rating, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation. The underlying bonds are further reviewed for quality, and those having excessive credit spreads are removed from the population of bonds on which the discount rate is based, on the basis that they do not represent high quality bonds. The mortality rate is based on publicly available mortality tables for the specific country. Future salary increases and pension increases are based on expected future inflation rates for the respective country. Further details are given in note 27.

Impairment of trade debtors

Coca-Cola Enterprise Limited strictly monitors its exposure to losses on trade receivables and maintains allowances for potential losses or adjustments. The allowances are determined by evaluating the aging of the receivables, analysing the history of adjustments, reviewing high-risk customers. Past due receivable balances are written off when the efforts have been unsuccessful in collecting the amounts due.

Impairment of assets

Coca-Cola Enterprises Limited assesses the recoverability of the carrying amount of its property, plant and equipment when events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. If it is determined that the carrying amount of an asset or asset group is not recoverable based upon the expected discounted future cash flows of the respective asset or asset group, an impairment loss is recorded equal to the excess of the carrying amount over the estimated recoverable amount.

Customer marketing programs

Coca-Cola Enterprises Limited participate in various programs and arrangements with customers designed to increase the sale of its products. Among the programs are arrangements under which allowances can be earned by customers for attaining agreed-upon sales levels or participating in specific marketing programs. The estimated amount of these sales incentives is based on the program's contractual terms, expected customer performance, and/or estimated sales volumes. These estimates are determined using historical customer experience and other factors, which sometimes require significant judgments.

20% to 33%

2. Accounting policies (continued)

2.3 Significant accounting policies

a) Foreign currency translation

The Company's financial statements are presented in Pounds (£000), which is also the Company's functional currency.

Transactions and balances

Transactions in foreign currencies are initially recorded in the Company's functional currency by applying the spot exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. All differences are taken to the statement of comprehensive income.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange rates used are:

	2015	2014
	€:£	€:£
Average rate	0.72606	0.80691
Closing rate	0.73711	0.77666

b) Investments

Investments in subsidiaries, associates and joint ventures are held at historical cost less any applicable provision for impairment.

c) Tangible fixed assets

Information technology equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Cost comprises the aggregate amount paid and the fair value of any other consideration given to acquire the asset and includes costs directly attributable to making the asset capable of operating as intended. Borrowing costs directly attributable to assets under construction and which meet the recognition criteria in IAS 23 are capitalised as part of the cost of that asset.

Depreciation is provided on all property, plant and equipment, other than land, on a straight-line basis over its expected useful life as follows:

Freehold buildings and long leasehold properties	-	2.5% to 5%
Plant and equipment:		
Machinery and equipment (including cold drink equipment)	-	7% to 20%
Furniture and fixtures	~	10% to 20%
Vehicles	-	8% to 25%

Short leasehold properties are depreciated over the life of the lease.

The carrying values of property, plant and equipment are reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable, and are written down immediately to their recoverable amount. Useful lives and residual values are reviewed annually and where adjustments are required these are made prospectively.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on de-recognition of the asset is included in the Statement of other comprehensive income in the period of de-recognition.

2.3 Significant accounting policies (continued)

d) Intangible assets

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method are reviewed at least at each financial year end.

Amortisation is provided on a straight-line basis over the expected useful life as follows:

Computer software – 20%

Customer list – 33.3%

e) Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists the Company makes an estimate of the asset's recoverable amount in order to determine the extent of the impairment loss. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses on continuing operations are recognised in the income statement in those expense categories consistent with the function of the impaired asset.

For assets where an impairment loss subsequently reverses, the carrying amount of the asset or cash generating unit is increased to the revised estimate of its recoverable amount, not to exceed the carrying amount that would have been determined, net of depreciation, had no impairment losses been recognised for the asset or cash generating unit in prior years. A reversal of impairment loss is recognised immediately in the income statement, unless the asset is carried at a revalued amount when it is treated as a revaluation increase.

f) Provisions for liabilities

A provision is recognised when the Company has a legal or constructive obligation as a result of a past event; it is probable that an outflow of economic benefits will be required to settle the obligation; and a reliable estimate can be made of the amount of the obligation. If the effect is material, expected future cash flows are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability.

g) Leases

Company as a lessee

Assets held under finance leases, which transfer to the Company substantially all the risks and benefits incidental to ownership of the leased item, are capitalised at the inception of the lease, with a corresponding liability being recognised for the lower of the fair value of the leased asset and the present value of the minimum lease payments. Lease payments are apportioned between the reduction of the lease liability and finance charges in the income statement so as to achieve a constant rate of interest on the remaining balance of the liability. Assets held under finance leases are depreciated over the shorter of the estimated useful life of the asset and the lease term.

Leases where the lessor retains a significant portion of the risks and benefits of ownership of the asset are classified as operating leases and rentals payable are charged in the income statement on a straight line basis over the lease term (including incentives and fixed escalation clauses)

Determining whether an arrangement is, or contains, a lease shall be based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets (the asset) and whether the arrangement conveys a right to use the asset.

Company as a lessor

Lease income on operating leases is recognised over the term of the lease on a straight-line basis.

2.3 Significant accounting policies (continued)

h) Financial instruments

i) Financial assets

Initial recognition and measurement

Financial assets within the scope of IAS 39 are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Company determines the classification of its financial assets at initial recognition.

All financial assets are recognised initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

The Company's financial assets include cash, trade and other receivables, loan notes and derivative financial instruments.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at fair value through profit of loss

Financial assets at fair value through profit or loss include financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. This category includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IAS 39.

Derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Financial assets at fair value through profit and loss are carried in the balance sheet at fair value with changes in fair value recognised in interest receivable and similar income and interest payable and similar costs in the income statement.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are initially recognised at fair value and subsequently measured at amortised cost using the effective interest (EIR) method, less impairment.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in interest receivable and similar income in the income statement. Losses arising from impairment are recognised in the income statement in other operating expenses.

ii) Financial liabilities

Initial recognition and measurement

Financial liabilities within the scope of IAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Company determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognised initially at fair value and in the case of loans and borrowings, plus directly attributable transaction costs.

Subsequent measurement

The measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss includes financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term. Derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in profit or loss.

2.3 Significant accounting policies (continued)

h) Financial instruments (continued)

Interest bearing loans and borrowings

Obligations for loans and borrowings are recognised when the Company becomes party to the related contracts and are measured initially at the fair value of consideration received less directly attributable transaction costs.

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method.

Gains and losses arising on the repurchase, settlement or otherwise cancellation of liabilities are recognised in interest receivable and similar income and interest payable and similar costs respectively.

Derecognition of financial liabilities

A liability is generally derecognised when the contract that gives rise to it is settled, sold, cancelled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, such that the difference in the respective carrying amounts together with any costs or fees incurred are recognised in profit or loss.

iii) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

iv) Fair values

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include using recent arm's length market transactions; reference to the current fair value of another instrument that is substantially the same; discounted cash flow analysis or other valuation models.

v) Derivative financial instruments and hedging

The Company uses derivative financial instruments such as forward currency forward contracts and options to hedge its foreign exchange exposures arising on forecast payments in foreign currencies. Derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives that do not qualify for hedge accounting are taken to the income statement.

i) Stocks

Stocks are stated at the lower of cost and net realisable value. Cost equals purchase price or production cost in the case of products manufactured by the Group. Production cost consists of material and direct labour costs together with a reasonable proportion of manufacturing overheads on the basis of normal activity level.

Net realisable value is based on estimated selling price less any further costs expected to be incurred to completion and disposal.

j) Trade and other debtors

Trade debtors, which generally have 40-60 day terms, are recognised and carried at the lower of their original invoiced value and recoverable amount. Where the time value of money is material, receivables are carried at amortised cost. Provision for impairment is made through profit or loss when there is objective evidence that the Company will not be able to recover balances in full. Balances are written off when the probability of recovery is assessed as being remote.

k) Cash at bank and in hand

Cash and short term deposits in the balance sheet comprise cash at banks and in hand and short term deposits with an original maturity of three months or less.

2.3 Significant accounting policies (continued)

I) Income taxes

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted by the balance sheet date.

Deferred income tax is recognised on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements, with the following exceptions:

deferred income tax assets are recognised only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, carried forward tax credits or tax losses can be utilised.

Deferred income tax assets and liabilities are measured on an undiscounted basis at the tax rates that are expected to apply when the related asset is realised or liability is settled, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date. Deferred income tax assets and liabilities are offset, only if a legally enforcement right exists to set off current tax assets against current tax liabilities, the deferred income taxes relate to the same taxation authority and that authority permits the company to make a single net payment.

Income tax is charged or credited to other comprehensive income if it relates to items that are charged or credited to other comprehensive income. Similarly, income tax is charged or credited directly to equity if it relates to items that are credited or charged directly to equity. Otherwise income tax is recognised in the income statement.

m) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

n) Pensions and other post-employment benefits

The Company operates a defined benefit pension scheme, which requires contributions to be made to an administered fund. The scheme was closed to new members in October 2005 from which time membership of a defined contribution plan is available.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method, which attributes entitlement to benefits to the current period (to determine current service cost) and to the current and prior periods (to determine the present value of defined benefit obligation) and is based on actuarial advice. Past service costs are recognised in the Statement of comprehensive income on a straight-line basis over the vesting period or immediately if the benefits have vested. When a settlement (eliminating all obligations for benefits already accrued) or a curtailment (reducing future obligations as a result of a material reduction in the scheme membership or a reduction in future entitlement) occurs, the obligation and related plan assets are re-measured using current actuarial assumptions and the resultant gain or loss is recognised in the income statement during the period in which the settlement or curtailment occurs.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability during the period as a result of contribution and benefit payments. The net interest is recognised in profit or loss as other finance revenue or cost.

Remeasurements, comprising actuarial gains and losses, the effect of the asset ceiling and the return on the net assets (excluding amounts included in net interest), are recognised immediately in other comprehensive income in the period in which they occur.

The defined benefit pension asset or liability in the balance sheet comprises the present value of the defined benefit obligation (using a discount rate based on high quality corporate bonds), less the fair value of plan assets out of which the obligations are to be settled directly. Fair value is based on market price information and in the case of quoted securities is the published bid price. The value of a net pension benefit asset is restricted to the present value of any amount the Company expects to recover by way of refunds from the plan or reductions in the future contributions.

Contributions to defined contribution schemes are recognised in the income statement in the period in which they become payable.

2.3 Significant accounting policies (continued)

(o) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration receivable, excluding discounts, rebates; value added tax and other sales taxes. The following criteria must also be met before revenue is recognised:

Sale of goods

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on dispatch of goods.

Rendering of services

Revenue from the sale of services is recognised when the outcome of a transaction can be estimated reliably, revenue associated with the transaction shall be recognised by reference to the stage of completion of the transaction at the end of the reporting period. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- a) the amount of revenue can be measured reliably;
- b) it is probable that the economic benefits associated with the transaction will flow to the entity;
- c) the stage of completion of the transaction at the end of the reporting period can be measured reliably; and
- d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Interest income

Revenue is recognised as interest accrues using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to its net carrying amount.

p) Share-based payments

Equity-settled transactions

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date on which they are granted and is recognised as an expense over the vesting period, which ends on the date on which the relevant employees become fully entitled to the award.

Fair value is determined by an external actuary using an appropriate pricing model. Fair value is determined using a Black-Scholes model, unless the awards are subject to market conditions, in which case a Monte Carlo simulation model is used. The Monte Carlo simulation model utilises multiple input variables to estimate the probability that market conditions will be achieved.

In valuing equity-settled transactions, no account is taken of any service and performance (vesting conditions), other than performance conditions linked to the price of the shares of the Company (market conditions). Any other conditions which are required to be met in order for an employee to become fully entitled to an award are considered to be non-vesting conditions. Like market performance conditions, non-vesting conditions are taken into account in determining the grant date fair value.

No expense is recognised for awards that do not ultimately vest, except for awards where vesting is conditional upon a market vesting condition or a non-vesting condition, which are treated as vesting irrespective of whether or not the market vesting condition or non-vesting condition is satisfied, provided that all other non-market vesting conditions are satisfied.

At each balance sheet date before vesting, the cumulative expense is calculated, representing the extent to which the vesting period has expired and management's best estimate of the achievement or otherwise of non-market vesting conditions and of the number of equity instruments that will ultimately vest or, in the case of an instrument subject to a market condition or a non-vesting condition, be treated as vesting as described above.

Performance share units are only recognised when it becomes probable that the performance criteria specified in the plan will be achieved.

The movement in cumulative expense since the previous balance sheet date is recognised in the income statement. As the Company's share-based payments involve equity instruments of the ultimate parent company, Coca-Cola Enterprises,

2.3 Significant accounting policies (continued)

(p) Share-based payments (continued) Equity-settled transactions (continued)

Inc ("CCE, Inc"), a corresponding increase is recognised in equity as a contribution from the parent with a corresponding entry in equity.

The Company pays a charge to CCE, Inc in respect of the cost of awards made to its employees based on the fair value at vesting, in the case of an award of shares, or exercise in the case of an award of options. These payments are charged directly to equity, as they represent a return of the capital contribution recognised at the grant date, up to the amount of that contribution, and a distribution thereafter.

Where the terms of an equity-settled award are modified or a new award is designated as replacing a cancelled or settled award, the cost based on the original award terms continues to be recognised over the original vesting period. In addition, an expense is recognised over the remainder of the new vesting period for the incremental fair value of any modification, based on the difference between the fair value of the original award and the fair value of the modified award, both as measured on the date of the modification. No reduction is recognised if this difference is negative.

Where an equity-settled award is cancelled (including when a non-vesting condition within the control of the entity or employee is not met), it is treated as if it had vested on the date of cancellation, and any cost not yet recognised in the income statement for the award is expensed immediately. Any compensation paid up to the fair value of the award at the cancellation or settlement date is deducted from equity, with any excess over fair value being treated as an expense in the income statement.

r) Government grants

Government grants are recognised when it is reasonable to expect that the grants will be received and that all grant related conditions will be met, usually on submission of a valid claim for payment. Grants of revenue nature are credited to income so as to match them with the expenditure to which they relate.

3. Turnover		
Turnover is analysed as follows:		
	2015	2014
•	£000	£000
Sale of goods	1,741,655	1,752,427
Rendering of services	12,497	5,472
	1,754,152	1,757,899
Deferred revenue	2015 £000	2014 £000
At 1 January Deferred during the year Released to the income statement At 31 December	(3,751) (2,747) 3,751 (2,747)	(3,751) (3,751) 3,751 (3,751)
Current Non-current	(2,747)	(3,751)

The deferred revenue refers to the accrual and release of transactions related to consignment sales of production. As at 31 December 2015, the estimated liability was approximately £2.7m (2014: £3.8m).

4. Operating profit

This is stated after charging/(crediting):

	2015 £000	2014 £000
Depreciation of property, plant and equipment	55,380	56,470
Amortisation of intangible assets	742	276
Cost of stocks recognised as an expense (included in cost of sales) Including: — write-down of stocks to net realisable value	888,041 558	914,317 912
Net foreign currency exchange differences	(12,518)	1,620
Net loss on financial assets and financial liabilities at fair value through profit and loss	7,867	3,752
Government grants	(52)	(52)
Operating lease payments — minimum lease payments	13,605	15,238
	953,623	992,533

5. Auditor's remuneration

The Company paid the following amounts to its auditors in respect of the audit of the financial statements and for other services provided to the Company. Another part of the auditor's remuneration for the period ended 31 December 2015 is borne by a fellow group undertaking.

	2015	2014
	£000	£000
Audit of the financial statements	247 247	261 261

The Company has taken advantage of the exemption not to disclose amounts paid for non-audit services as these are disclosed in the group accounts of its ultimate parent Coca-Cola Enterprises, Inc.

6. Staff costs and Directors' remuneration

(a) Staff costs

	2015	2014
	£000	£000
Wages and salaries	141,819	138,888
Social security costs	19,181	18,917
Other pension costs (note 28)	35,791	31,950
	196,791	189,755

Included in other pension costs are £27.9m (2014: £24.7m) in respect of defined benefit schemes and £7.9m (2014: £7.3m) in respect of the defined contribution scheme.

Included in wages and salaries is a total expense of share-based payments of £6.1m (2014: £3.8m), all of which arise from transactions, accounted as equity-settled share-based payments transactions.

Short-term loans and deposits third parties

Interest income from pension assets (note 27)

Total interest receivable and similar income

Total interest income for financial assets measured at amortised cost

9. Taxation (continued)

(d) Reconciliation of the total tax charge

The tax expense in the income statement for the year is lower than the standard rate of corporation tax in the UK of 20.25 % (2014: 21.49%). The differences are reconciled below:

	2015	2014
	£000	£000
Profit from continuing operations before taxation	251,880	247,314
Tax calculated at UK standard rate of corporation tax of 20.25% (2014:		
21.49%)	(50,997)	(53,156)
Expenses not deductible for tax purposes	(390)	(256)
Group relief	767	10,294
Adjustment for tax in respect of previous periods	95	10
Change in tax laws and rate	3,093	110
Total tax expense reported in the profit or loss	(47,432)	(42,998)

(e) Change in Corporation Tax rate

The UK corporation tax rate was reduced from 21% to 20% effective 1 April 2015. The corporation tax will be further reduced to 19% for the financial year beginning 1 April 2017. Another reduction to 18% corporation tax is enacted for the financial year beginning 1 April 2020. Any deferred tax expected to reverse in the year to 31 December 2016 has been remeasured using the rates substantively enacted at 31 December 2015.

(f) Deferred tax

The deferred tax included in the Company's balance sheet is as follows:

The deferred tax included in the company's balance sheet is as i	Ollows.

Capitalised borrowing costs

The aggregate amount of borrowing costs capitalised during the year ended 31 December 2015 was £0.03m (2014: nil). The rate used to determine the amount of borrowing costs eligible for capitalisation was 1.79% which is the effective rate of the general borrowing pool used to finance the construction.

Assets held under finance leases

The carrying value of plant and equipment held under finance leases and hire purchase contracts at 31 December 2015 was £1m (2014: £2.3m). In 2015 and 2014 there were no additions of property, plant and equipment under finance lease and hire purchase contracts.

Assets Retirement Obligation

The carrying value of assets retirement obligation, included in Land and Buildings at 31 December 2015 was £2m (2014: £2.8m).

13. Derivatives - non-current

(a) Forward currency contracts

The fair value of forward currency derivative contracts was determined using quoted forward exchange rates matching the maturity of the contracts.

(b) Investments in subsidiaries

Name of company	Holding	Proportion of voting rights and shares held	Nature of Business
Coca-Cola Enterprises Pension Scheme Trustee Limited	Ordinary shares	100%	Other activities auxiliary to insurance and pension funding

The registered capital of Coca-Cola Enterprises Pension Scheme Trustee Limited as of 31 December 2015 is £2 (2014: £2).

(c) Business acquisition

On 21 November 2014, as part of an internal reorganisation within the Coca-Cola Enterprises Inc. group, Daly CBM Limited (DCBM) and Daly Electrical Services Limited (DESL), agreed to sell to Coca-Cola Enterprises Limited the whole of their business (a business for maintenance and repair of equipment) as a going concern and transfer all of their assets and liabilities. The assets and liabilities of DALY CBM and DESL were accounted by the Company using the predecessor accounting method and recognized on the basis of their carrying amounts as reported in the consolidated financial statements of the ultimate parent – CCE Inc. The carrying amount of the net assets transferred was £1.8m, of which £1m were identified as customer list intangible assets. The consideration paid was equal to the carrying amount of the net assets transferred: to DCBM - £0.5m paid in cash and to DESL - £1.3m settled against a loan payable.

20. Obligations under leases and hire purchase contracts

The Company uses finance leases contracts to acquire property and vehicles. These leases have terms of renewal but no purchase options and escalation clauses. Renewals are at the option of the lessee. Future minimum lease payments under finance leases are as follows:

	2015	2014
	£000	£000
Future minimum lease payments due:		
Not later than one year	705	1,232
After one year but not more than five years	975	2,049
More than five years	840	878
·	2,520	4,159
Less: finance charges allocated to future periods	(470)	(617)
Present value of minimum lease payments	2,050	3,542
The present value of minimum lease payments is analysed as follows:		
Not later than one year	603	1,104
After one year but not more than five years	786	1,721
More than five years	661	717
•	2,050	3,542

Operating lease agreements where the Company is lessee

The Company has entered into commercial leases on certain properties, motor vehicles and items of machinery. These leases have an average duration of between 1 and 15 years. Only the property lease agreements contain an option for renewal, with such options being exercisable three months before the expiry of the lease term at rentals based on market prices at the time of exercise. There are no restrictions placed upon the lessee by entering into these leases.

Future minimum rentals payable under non-cancellable operating leases are as follows:

	2015	2014
	£000	£000
Not later than one year	11,963	10,877
After one year but not more than five years	22,070	23,081
After five years	20,179	23,792
·	54,212	57,750

Operating lease agreements where the Company is lessor

The Company has entered into a sub leasing arrangement. This non-cancellable lease is usually signed for a period of one year and can be renewed for another 1-year period after expiry.

Future minimum rentals receivable under non-cancellable operating leases are as follows:

	2015	2014
	£000	£000
Not later than one year	13	26
After one year but not more than five years	-	13
After five years	-	-

Environmental costs

The provision in respect of environmental costs reflects the levy imposed on packaging waste. All of the associated outflows are estimated to occur within one year of the balance sheet date.

Insurance claims

Provision for insurance claims is made in respect of claims notified, and for claims incurred but which have not yet been notified, based on advice from the Company's external insurance advisers. The associated outflows are estimated to arise over a period of up to five years from the balance sheet date.

Customer claims

The provision in respect of customer claims reflects expected costs to be incurred in respect of audits conducted by customers on invoicing and retrospective discounts from prior years.

Assets retirement obligation provision

Provisions for assets retirement obligations are recognised on a lease by lease basis, in accordance with our lease contracts.

Restructuring/termination provisions

The restructuring provisions relate to employee termination payments expected to be made redundant in respect of various ongoing restructuring projects.

22. Authorised, issued and called up share capital

	2015	2014	2013	2015	2014	2013
	thousands	thousands	thousands	£000	£000	£000
Authorised, allotted, called up and fully paid						
Ordinary shares of £0.01 each	358	358	358	4	4	4
Deferred shares of £1.0 each	200	200	200	200	200	200

The deferred shares carry no rights to vote or receive dividends and on a winding-up the holders are entitled only to receive payment of the amount paid up on the share after the repayment to each holder of an ordinary share of a sum of £5 per share.

23. Share-based payments

The Company maintains share-based compensation plans that provide for the granting of non-qualified share options and restricted shares (units), some with performance conditions, to certain executive and management level employees. We believe that these awards better align the interests of our employees with the interests of our shareowners. The share based payment schemes in place are an Employee Share Plan, a Share Options Plan, and a Restricted Shares Plan. The charge for the year ended 31 December 2015 for all non -Employee Share Plan awards was £6.1m (2014: £3.8m) and the recharge by Coca-Cola Enterprises, Inc. recognised directly in the Share Based Payment Reserve was £6.2m (2014: £8.8m).

Employee Share Plan

The former Coca-Cola Enterprises Limited UK Employee Share Plan which had operated since March 2001 and had been approved by HM Revenue and Customs was closed in September 2010 as a result of the corporate restructure connected to the transaction between The Coca-Cola Company and Coca-Cola Enterprises, Inc., Coca-Cola Enterprises Limited's ultimate parent company.

In November 2010 HM Revenue and Customs approval was received to open a new Share Plan, the Coca-Cola Enterprises Limited UK Employee Share Plan. The plan was opened to employees in December 2010 and operates in the same way as the former plan. Under the new plan employees have the opportunity to purchase Coca-Cola Enterprise, Inc. shares (partnership shares) out of pre-tax salary up to a maximum value of £1,800 per year (£1,500 per year before December 2014). For each share purchased by the employee the Company provides a free matching share. During the 2015 financial year 75,753 (2014: 78,748) matching shares were purchased by the Trustee of the Plan at a cost to the Company of £2.32m (2014: £2.18m).

The following table illustrates the number and weighted average exercise prices (WAEP) of, and movements in, matching shares during the year.

	2015	2015	2014	2014
	No.	WAEP(£)	No.	WAEP(£)
Exercised	31,594	30.30	27,681	27.71
Outstanding at 31 December	387,439	33.66	352,838	28.78

Share Options

Share options (1) are granted with exercise prices equal to or greater than the fair value of CCE, Inc. stock on the date of grant; (2) generally vest over a period of 36 months; and (3) expire 10 years from the date of grant. Some of the share options granted contained market conditions that require the share price to increase for a defined period (25 percent for one-half of the award to vest and 50 percent for the other one-half of the award to vest). Generally, when options are exercised, CCE, Inc issue new shares, rather than issuing treasury shares. Options are normally treated as forfeited if the employee leaves the Company before the options vest.

The following table illustrates the number and weighted average exercise prices (WAEP) of, and movements in, share options during the year.

	2015	2015	2014	2014
	No.	WAEP(£)	No.	WAEP(£)
Exercised	227,855	13.30	184,479	14.30
Outstanding at 31 December	1,121,383	28.20	973,367	22.10

23. Share-based payments (continued)

Restricted Shares (Units) & Performance Shares (Units)

Restricted shares (units) generally vest upon continued employment for a period of at least 42 months and the attainment of certain share price or performance targets. Certain of the restricted shares (units) expire five years from the date of grant if the share price or performance targets have not been met. The restricted share awards entitle the participant to full dividends and voting rights whereas restricted share unit awards entitle the participant to hypothetical dividends (which vest, in some cases, only if the restricted share units vest), but not voting rights. Unvested restricted shares (units) are restricted as to disposition and subject to forfeiture.

Some of the restricted shares (units) granted were performance share units for which the ultimate number of shares earned will be determined at the end of a three-year performance period. These performance share units are subject to the performance criteria of compounded annual growth in net income per share over the performance period, as adjusted for certain items detailed in the plan document. The purpose of the adjustments is to ensure a consistent year-over-year comparison of the specified performance criteria.

The following table illustrates the number and weighted average exercise prices (WAEP) of, and movements in, restricted and performance units during the year.

	2015	2015	2014	2014
	No.	WAEP(£)	No.	WAEP(£)
Exercised	103,159	30.90	201,840	15
Outstanding at 31 December	729,631	31.33	541,266	25

24. Reserves

Share -based payment reserve

The share-based payment reserve is used to recognise the value of equity-settled share-based payments provided to employees, including key management personnel, as part of their remuneration. Refer to note 23 for further details of these plans.

25. Post balance sheet event

In 2016 the Company has repaid its outstanding loans with Bottling Holding Luxemburg SARL and Coca-Cola Enterprises Norge AS. Both loans were with principal £20m and average interest rate 1.04%.

On August 6, 2015, the ultimate parent company Coca-Cola Enterprises Inc. (CCE) entered into agreement with The Coca-Cola Company (TCCC), Coca-Cola Iberian Partners S.A. (CCIP), the privately-owned Coca-Cola bottler operating primarily in Spain and Portugal, and Coca-Cola Erfrischungsgetränke AG (CCEAG), the wholly-owned TCCC bottler operating in Germany, under which:

- The parties agreed to combine their respective businesses by combining CCE, CCIP, and CCEAG. The merger will be effected through the contribution of CCIP and CCEAG to a newly created entity, Coca-Cola European Partners, plc (CCEP), and the merger of CCE with and into a newly formed indirect U.S. subsidiary of CCEP (MergeCo), with MergeCo continuing as the surviving entity. Upon completion of the Merger, CCEP will consist of businesses involved in the marketing, production, and distribution of beverages in Andorra, Belgium, France, Germany, Great Britain, Iceland, Luxemburg, Monaco, the Netherlands, Norway, Portugal, Spain, and Sweden.
- Following the Merger, CCEP will directly and indirectly wholly-own all contributed assets and liabilities of CCE,
 CCIP and CCEAG.

On 28th May 2016, the merger and the formation of CCEP Plc were officially completed.

26. Contingent liabilities

As at 31 December 2015 the Company has a duty deferment guarantee of £275k (2014: 275k) with HMRC – Customs and Excise for the import of raw materials and consumables.

As at 31 December 2015 there is a claim by HMRC involving the tax treatment of some van vehicles provided to CCE employees for the performance of their duties. Potential tax liability exposure includes income tax and NIC for tax year 2011/2012 for £1.2m. The Company and counsels consider this claim to be out of time and the likelihood of incurring such a payment obligation in the future to be remote.

27. Pensions and other post-employment benefits

The Coca-Cola Enterprises Pension Scheme ("the Scheme") is a defined benefit arrangement. A full actuarial valuation was carried out as at 31 December 2015 by a qualified independent actuary.

The assets and liabilities of the schemes at 31 December are:

	2015	2014	2013
	£000	£000	£000
Scheme assets at fair value			
Equities	546,056	528,171	491,720
Bonds	264,511	263,809	213,352
Properties	92,974	63,249	53,562
Other	20,573	45,951	45,282
Fair value of scheme assets	924,114	901,180	803,916
Present value of scheme liabilities	(944,679)	(875,778)	(755,524)
Defined benefit pension plan (deficit)/surplus	(20,565)	25,402	48,392

The pension schemes have not invested in any of the Company's own financial instruments nor in properties or other assets used by the Company.

The amounts recognised in the Statement of Comprehensive Income for the year are analysed as follows:

	2015	2014
	£000	£000
Recognised in the profit or loss		
Current service cost	27,864	24,659
Administrative expenses	1,459	1,278
Recognised in arriving at operating profit	29,323	25,937
Of the total charge, £ 29.3 m was included in administrative expenses.		
Net interest income on plan assets (note 7)	(1,404)	(2,714)
Total recognised in the profit or loss	27,919	23,223
Taken to the Other Comprehensive Income		
Actuarial losses arising from changes in financial and demographic assumptions	42,113	23,613
Total recognised in other comprehensive income	42,113	23,613

27. Pensions and other post-employment benefits (continued)

Changes in the present value of the defined benefit pension obligations are analysed as follows:

	2015	2014
·	£000	£000
At 1 January	(875,778)	(755,524)
Current service cost	(27,864)	(24,659)
Interest cost	(32,561)	(33,631)
Benefits paid	14,966	16,293
Actuarial losses due to change in financial and demographic assumptions	(22,397)	(81,220)
Actuarial (losses)/gains due to plan experience	(1,033)	2,975
Contributions paid by participants	(12)	(12)
Defined benefit obligation	(944,679)	(875,778)
Changes in the fair value of plan assets are analysed as follows:	,	
	2015	2014
	£000	£000
At 1 January	901,180	803,916
Interest income on plan assets	33,965	36,346
Contributions by employer	24,065	23,844
Contributions by employees	12	12
Benefits paid	. (14,966)	(16,293)
Actuarial gains and (losses)	(18,683)	54,633
Administrative expenses	(1,459)	(1,278)
Fair value of plan assets at 31 December	924,114	901,180

Pension contributions are determined with the advice of independent qualified actuaries, Aon Hewitt, on the basis of annual valuations using the projected unit credit method. The projected unit credit method is an accrued benefits valuation method in which the scheme liabilities make allowance for future earnings. Scheme assets are stated at their market values at the respective balance sheet dates and overall expected rates of return are established by applying published brokers' forecasts to each category of scheme assets.

	2015	2014
	. %	%
Main assumptions:		
Rate of salary increases	3.25	3.13
Rate of increase in pensions in payment		
- Pension accrued before 6 July 2010	3.13	3.00
- Pension accrued after 5 July 2010	2.25	2.13
Discount rate	3.75	3.75
Inflation assumption	2.13	2.13
Post-retirement mortality (in years)		
Current pensioners at 65 – male	87.30	87.30
Current pensioners at 65 – female	89.80	89.70
Future pensioners at 65 – male	88.90	88.80
Future pensioners at 65 – female	91.60	91.50

Many of the key financial assumptions are derived directly from the yields on AA-rated or high quality corporate bonds. The assumptions for inflation and for increases in pensions are based on the yield gap between long-term index-linked and long-term fixed interest gilt securities. Mortality rates are based on S1 Normal Base Tables adjusted to reflect recent experience in the scheme.

The post-retirement mortality assumptions allow for expected increases in longevity. The "current" disclosures above relate to assumptions based on longevity (in years) following retirement at the balance sheet date, with "future" being that relating to an employee retiring in 2035.

27. Pensions and other post-employment benefits (continued)

The sensitivities regarding the principal assumptions used to measure the scheme liabilities are set out below:

Assumption	Change in assumption	Impact on scheme liabilities
Discount rate	Increase by 0.5%	Decrease with £101.3m
Inflation assumption	Increase by 0.5%	Increase with £95.7m
Rate of salary increases	Increase by 0.5%	Increase with £35m
Life expectancy	Increase by 1 year	Increase with £23.7m

28. Off-balance sheet arrangements

The Company enters into operating lease arrangements for the hire of buildings and plant & equipment as these arrangements are a cost effective way of obtaining the short-term benefits of these assets. The annual commitments under these arrangements are disclosed in note 20. There are no other material off-balance sheet arrangements.

29. Related party transactions

During the year the Company entered into transactions, in the ordinary course of business, with other related parties. The Company has taken advantage of the exemption under paragraph 8(k) of FRS101 not to disclose transactions with fellow wholly owned subsidiaries. Transactions entered into, and trading balances outstanding at 31 December with other related parties, are described below:

Purchase transactions during the year and balances with The Coca-Cola Company and its subsidiary and associate undertakings are detailed below:

		2015	2014	2015	2014
		£'000	£'000	£'000	£'000

Coca-Cola Bottlers Sales and Service Company LLC	Marketing support	-	-	1	61
		31,085	62,626	9,979	16,590

Sales and purchases between related parties are made on an arm's length basis. The Company has not provided or benefited from any guarantees for any related party receivables or payables. During the year ended 31 December 2015, the Company has not made any provision for doubtful debts relating to amounts owed by related parties (2014: nil and 2013: nil).

30. Ultimate Group undertaking

The Company's immediate parent company is Coca-Cola Enterprises Great Britain Limited. The Company's ultimate UK parent company continues to be Bottling Great Britain Limited. The Company's ultimate parent undertaking and controlling party is Coca-Cola Enterprises, Inc., a corporation incorporated in the United States of America. Copies of the group financial statements of Coca-Cola Enterprises Inc. are available from 2500 Windy Ridge Parkway, Atlanta, Georgia 30339.

31. Transition to FRS 101

For all periods up to and including the year ended 31 December 2014, the Company prepared its financial statements in accordance with previously extant United Kingdom generally accepted accounting practice (UK GAAP). These financial statements, for the year ended 31 December 2015, are the first the Company has prepared in accordance with FRS 101.

Accordingly, the Company has prepared individual financial statements which comply with FRS 101 applicable for periods beginning on or after 1 January 2014 and the significant accounting policies meeting those requirements are described in the relevant notes.

In preparing these financial statements, the Company has started from an opening balance sheet as at 1 January 2014, the Company's date of transition to FRS 101, and made those changes in accounting policies and other restatements required for the first-time adoption of FRS 101. As such, this note explains the principal adjustments made by the Company in restating its balance sheet as at 1 January 2014 prepared under previously extant UK GAAP and its previously published UK GAAP financial statements for the year ended 31 December 2014.

On transition to FRS 101, the Company has applied the requirements of paragraphs 6-33 of IFRS 1 "First time adoption of International Financial Reporting Standards".

'Exemptions Applied

IFRS 1 allows first-time adopters certain exemptions from the general requirements to apply IFRSs as effective for December 2015 year ends retrospectively. The Company has taken advantage of the following exemptions:

- IFRS 2 Share based payment has not been applied to any equity instruments that were granted on or before 7
 November 2002, nor has it been applied to equity instruments granted after 7 November 2002 that vested before 1
 January 2005. This treatment is consistent with the transitional provisions taken when the Company adopted FRS 20, the UK equivalent standard.
- Cumulative actuarial gains and losses on pensions and other post-employment benefits are recognised in full in equity on the date of transition to IFRS. This is the same treatment as under UK GAAP.
- The Company has taken the exemption not to restate business combinations that were completed before the date of transition to IFRS. There were no transactions that fall within the scope of IFRS 3 during the period since the Company's date of transition to FRS 101.
- The Company has elected to use a deemed cost to determine the cost of its investments in subsidiaries and associates. Deemed cost is the previous GAAP carrying amount as at transition date.
- The Company has taken advantage of the exceptions to retrospective application of de-recognition of financial assets and liabilities.
- Capitalised borrowing costs have been capitalised in accordance with previous GAAP, and carried forward at the
 amount previously capitalised in its opening statement of financial position at the date of transition, without
 adjustment.
- The Company has applied the transitional provisions in IFRIC 4 and as such has determined whether an arrangement existing at the date of transition to IFRS contains a lease on the basis of facts and circumstances existing at that date.

Restatement of equity from UK GAAP to FRS 101

Reclassifications

1. Reclassification of software costs to intangibles

Under previous UK GAAP software costs were recognised as Tangible fixed assets. On transition to FRS 101 the Company assessed that the software costs incurred are not an integral part of the related hardware. As such, these software costs are reclassified as intangible assets.

2. Deferred tax on pension liability

Under previous UK GAAP the pension liability or asset was required to be shown net of the related deferred tax asset or liability. Under FRS 101 the pension liability or asset is required to be shown gross and the related deferred tax is included within deferred tax asset or liability position on the balance sheet.

3. Other reclassifications

Certain reclassifications of comparative information included in the statement of financial position were made in order to ensure consistency with the presentation of current period's figures and improve understandability of financial information:

- Restructuring provisions related to employee termination payments of £4.3m as of 1 January 2014 and £2.5m as of 31 December 2014 were presented within Provisions for liabilities (previously presented within Creditors: amounts falling due within one year) to ensure consistency with the presentation of the current period figures.
- Payables to other group undertakings of £10.6m as of 1 January 2014 were presented within Creditors: amounts falling due within one year (previously presented net of receivables from parent company within Debtors) to ensure consistency with the presentation of the current period figures.
- Prepayments for inventories of £6.9m as of 1 January 2014 and £7.6m as of 31 December 2014 were presented within Stocks (previously presented within Debtors) to ensure consistency with the presentation of the current period figures.

Remeasurements

4. Current and deferred tax

The transitional adjustments lead to deductible temporary differences. According to the accounting policies in Note 2, the Company has to account for such differences. Deferred tax adjustments are recognised in correlation to the underlying transaction in retained earnings as follows:

	1 January 2014	31 December 2014
Deferred tax liability	£000	£000
Accelerated capital allowances, due to change in the tax base	(7,154)	(7,200)
Share- based payments	2,778	2,227
Losses carried forward per hedge transactions	1,276	2,026
Assets retirement obligations – assets and liabilities	349	. 243
Other losses carried forward due to change in accounting policy	53	27
Rolled over gains in relation to industrial buildings	(629)	(629)
Increase in deferred tax liabilities	(3,327)	(3,306)

5. Derivative financial instruments

The fair value of forward foreign exchange contracts is recognised under FRS 101, and was not recognised under UK GAAP. The contracts were not designated as hedging instruments and have been recognised as derivative financial instruments at fair value through profit and loss account. The transitional adjustments, regarding the recognition of the financial assets and financial liabilities on the balance sheet are presented in the below table:

	1 January 2014	31 December 2014
Type of financial instrument	£000	£000
Derivative forward contracts, recognised as a current asset	790	2,071
Derivative forward contracts, recognised as a non-current asset	25	-
Derivative forward contracts, recognised as a current liability	(6,827)	(8,351)
Derivative forward contracts, recognised as a non-current liability	(366)	(3,851)
Net effect on total comprehensive income	(6,378)	(10,131)

6. Lease classification

Certain lease arrangements that were classified and treated as operating lease arrangement under UK GAAP have been reclassified as finance leases on transition to FRS 101. This resulted in recognition of the following finance lease assets and liabilities on the balance sheet:

Net effect on total comprehensive income	(225)	(88)
Finance lease non-current liability	(2,655)	(1,520)
Finance lease current liability	(1,260)	(1,058)
Tangible fixed assets	3,690	2,490
	£000	£000
	1 January 2014	31 December 2014

7. Asset Retirement Obligations

Under FRS 101, the assets and liabilities related to asset retirement obligation have been recognised on the balance sheet. Under UK GAAP, these amounts do not qualify for recognition. The result has been recognised against retained earnings the following way:

	1 January 2014	31 December 2014
	£000	£000
Asset retirement obligation asset (tangible assets)	2,838	2,794
Asset retirement obligation provision	(4,585)	(4,010)
Net effect on total comprehensive income	(1,747)	(1,216)

8. Derecognition of National Insurance Contributions (NIC) on Share-Based Payments

Under UK GAAP, the company was required to recognise an acrual for National Insurance Contributions (NIC) in relation to its share-based payment transactions (prior to the exercise/vesting date of the related share-based payment awards). Under FRS 101, the Company has elected to account for these taxes in the period when the tax is actually due as the amount does not qualify for recognition as a liability according to IAS 37, and has been derecognised against retained earnings. Under FRS 101, the Company reversed the short term payable related to NIC expected to be owed on unexercised/unvested share-based payment awards amounting to £2,015k at the date of the transition (2014: £1,552k).

9. Depreciation of idle assets

IAS 16 requires that depreciation of an asset should cease when the asset is either classified as held for sale in accordance with IFRS 5 or derecognized. Depreciation does not cease when an asset is idle. At the date of transition to FRS 101, a decrease of £230k was recognised in property, plant and equipment net of accumulated depreciation due to Depreciation for 2013 that was not recorded. This amount has been recognised against retained earnings.

10. Share-based payments

FRS 101 requires the fair value of the share options to be determined using an appropriate pricing model recognised over the vesting period. No additional expense has been recognised in profit or loss for the year ended 31 December 2014. Share options reserve totalling £5,775k (1 January 2014: £5,446k), has been recognised as a separate component of equity against retained earnings.

11. Impact of remeasurements on total comprehensive income

The effect of the remeasurement differences on reported total comprehensive income of the Company for the year ended 31 December 2014 is as follows:

	£000
Profit for the financial year under UK GAAP	220,048
Actuarial losses under UK GAAP	(30,718)
Total comprehensive income under UK GAAP	189,330
Recognition of deferred tax liabilities (note 4)	21
Recognition of derivative financial instruments (note 5)	(3,753)
Recognition of finance lease contracts (note 6)	137
Recognition of asset retirement obligations (note 7)	531
Derecognition of NIC on share based payments (note 8)	(463)
Recognition of depreciation on idle assets (note 9)	230
Deferred and current tax on share based payments recognized directly in equity under FRS 101	(608)
Total comprehensive income as at 31 December 2014 under FRS 101	185,425
