NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 30TH JUNE 1999

ACCOUNTING POLICIES 1.

(a) Basis of accounting

The accounts of the company have been prepared under the historical cost convention.

(b) Depreciation

Tangible fixed assets are written off over their estimated useful lives.

The following rates of depreciation are used:-

Leasehold property

- equal annual instalments over the term of the lease

Motor vehicles

- 25% and 15% on the reducing balance

Machinery and equipment

- 20% on the reducing balance

Computer

- 20% of cost

Furniture, fixtures and fittings - 15% on the reducing balance except for assets held under finance leases which are depreciated over the term of the lease on the straight line basis.

(c) Stocks and work in progress

Stocks consisting of raw materials have been valued at the lower of prime cost and net realisable value.

Finished goods and work in progress have been valued at the lower of cost plus attributable overheads and net realisable value.

(d) Deferred taxation

The deferred taxation provision is the amount required at current rates, using the liability method, to allow for timing differences arising from the effect of the allocation for taxation purposes of income and expenditure (including depreciation) to periods different from those used for accounting purposes, to the extent that there is a reasonable probability that such deferred taxation will be payable in the foreseeable future.

(e) Turnover

Turnover represents the amount receivable in the ordinary course of business for goods sold and services provided after deducting value added tax.

(f) Lease of assets

Assets held under hire purchase contracts are capitalised and depreciated over their useful lives. The corresponding hire purchase obligation is treated in the balance sheet as a liability. The interest element of the rental obligation is charged to profit and loss account over the period of the lease at a constant proportion of the outstanding balance of capital repayments.
