### Notes to the financial statements for the year ended 30 June 2022 (continued)

#### 1. Accounting policies (continued)

##### Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost, using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established based on an expected credit loss model (general or simplified approach as detailed under impairment of financial assets). The amount of the loss is recognised in the income statement.

When a trade receivable is uncollectible, it is written off against the impairment provision for trade receivables. Subsequent recoveries of amounts previously written off are credited against cost of sales in the income statement. Short-term trade receivables do not carry any interest and are stated at their amortised cost, as reduced by appropriate allowances for estimated irrecoverable amounts.
