# ANNUAL REPORT AND FINANCIAL STATEMENTS 2018

#### BP INTERNATIONAL LIMITED

(Registered No.00542515)

#### **ANNUAL REPORT AND FINANCIAL STATEMENTS 2018**

Board of Directors: D J Bucknall

B Gilvary K A Thomson J C Lyons M J O'Sullivan J A Hodgson

The directors present the strategic report, their report and the audited financial statements for the year ended 31 December 2018.

#### STRATEGIC REPORT

#### Results

The loss for the year after taxation was \$391 million which, when added to the retained profit brought forward at 1 January 2018, after making a transitional adjustment for IFRS 9, of \$6,826 million, and after deducting total paid interim dividends to ordinary shareholders of \$535 million, gives a total retained profit carried forward at 31 December 2018 of \$5,900 million. This excludes exchange adjustments and mark to market movements taken directly to reserves.

### Principal activities and review of the business

The company, which is based in the UK, is engaged internationally in oil, petrochemicals and related financial activities. It also provides services to other BP group undertakings, including treasury activities, and holds investments in subsidiary and associated undertakings engaged in similar activities.

The key financial and other performance indicators during the year were as follows:

|                              | 2018       | 2017       | Variance |
|------------------------------|------------|------------|----------|
|                              | \$ million | \$ million | %        |
| Turnover                     | 66,960     | 47,116°    | 42       |
| Operating profit             | 341        | 2,935      | (88)     |
| (Loss) / profit for the year | (391)      | 2,732      | (114)    |
| Total equity                 | 55,834     | 56,997     | (2)      |
|                              | 2018       | 2017       | Variance |
|                              | %          | . %        | ,        |
| Quick ratio*                 | 66         | 55         | 11       |

<sup>\*</sup>Quick ratio is defined as current assets, excluding stock and financial assets due after one year, as a percentage of current liabilities.

Turnover has increased principally due to higher sales prices for both crude oil and oil products and an increase in sales volumes.

The movement in the operating result compared to the prior year is primarily due to the reversal of impairment charges against investments in 2017 which have not been repeated in 2018.

#### STRATEGIC REPORT

Downstream activities include the results of certain international businesses with head offices in the UK. Downstream businesses showed an operating profit for the year of \$720 million (2017 \$1,043 million). This includes dividends from subsidiary and associated undertakings of \$3 million (2017 \$3 million).

Other businesses and corporate activities, including administrative expenses of \$1,119m, generated an operating loss of \$379 million (2017 \$1,892 million profit). This includes dividend income from subsidiary and associated undertakings of \$2,175 million (2017 \$1,496 million), a net impairment charge of \$576 million (2017 net impairment reversal gain of \$1,227 million) and a loss on disposal of investments of \$662 million (2017 \$Nil).

The quick ratio at year end was 66% (2017 55%), an 11% improvement compared to the prior year. The company provides funding and receives deposits from other entities within the BP group which represent the majority of the short term debtor and creditor balances. Whilst these balances are repayable on demand, they are not expected to be called as they are held with controlled related parties. Therefore, it is within the company's control to ensure that it would not be in a position where its obligations would not be met as they fall due.

#### Principal risks and uncertainties

The company aims to deliver sustainable value by identifying and responding successfully to risks. Risk management is integrated into the process of planning and performance management for the BP group.

The risks listed below, separately or in combination, could have a material adverse effect on the implementation of the company's strategy, business, financial performance, results of operations, cash flows, liquidity, prospects, shareholder value and returns and reputation. Unless stated otherwise, further details on these risks are included within the risk factors in the strategic report of the BP group Annual Report and Form 20-F for the year ended 31 December 2018.

# Strategic and commercial risks

#### Prices and markets

The company's financial performance is subject to fluctuating prices of oil, gas, and refined products, technological change, exchange rate fluctuations and the general macroeconomic outlook.

#### Major project delivery

Failure to invest in the best opportunities or deliver major projects successfully could adversely affect the company's financial performance.

#### Geopolitical

The company is exposed to a range of political developments and consequent changes to the operating and regulatory environment.

# The impact of the UK's exit from the EU

Following the referendum in 2016, BP has been assessing the potential impact of Brexit on group companies. BP has been preparing for different scenarios for the UK's exit from the EU but does not believe any of these scenarios will pose a significant risk to the business. The BP board's geopolitical committee discussed this, most recently in May 2019. BP continues to monitor developments in this area in line with group risk management processes and procedures.

### Liquidity, financial capacity and financial, including credit, exposure

Failure to work within the group's financial framework could impact the company's ability to operate and result in financial loss.

#### Joint arrangements and contractors

The company may have limited control over the standards, operations and compliance of its partners, contractors and sub-contractors.

# Digital infrastructure and cybersecurity

#### STRATEGIC REPORT

Breach of the company's digital security or failure of its digital infrastructure could damage its operations and reputation.

#### Climate change and the transition to a lower carbon economy

Policy, legal, regulatory, technology and market change related to the issue of climate change could increase costs, reduce demand for our products, reduce revenue and limit growth opportunities.

### Competition

Inability to remain efficient, innovate and retain an appropriately skilled workforce could negatively impact delivery of the company's strategy in a highly competitive market.

#### Crisis management and business continuity

Potential disruption to the company's business and operations could occur if it does not address an incident effectively.

#### Insurance

The BP group's insurance strategy could expose the BP group to material uninsured losses which in turn could adversely affect the company.

#### Safety and operational risks

# Process safety, personal safety and environmental risks

The company is exposed to a wide range of health, safety, security and environmental risks that could result in regulatory action, legal liability, increased costs, damage to its reputation and potentially denial of its licence to operate.

#### Security

Hostile acts against the company's staff and activities could cause harm to people and disrupt its operations.

### Product quality

Supplying customers with off-specification products could damage the company's reputation, lead to regulatory action and legal liability, and potentially impact its financial performance.

#### Compliance and control risks

# Regulation

Changes in the regulatory and legislative environment could increase the cost of compliance and affect the company's provisions.

### Ethical misconduct and non-compliance

Ethical misconduct or breaches of applicable laws by the company's businesses or its employees could be damaging to its reputation, and could result in litigation, regulatory action and penalties.

#### Treasury and trading activities

Ineffective oversight of treasury and trading activities could lead to business disruption, financial loss, regulatory intervention or damage to the company's reputation.

# Reporting

Failure to accurately report the company's data could lead to regulatory action, legal liability and reputational damage.

#### Financial risk management

The company is exposed to a number of different financial risks arising from natural business exposures as well as its use of financial instruments including market risks relating to commodity prices, foreign currency exchange rates and interest rates, credit risk and liquidity risk. Further details on these financial risks are included within Note 19.

#### **DIRECTORS' REPORT**

#### **BP INTERNATIONAL LIMITED**

#### **Directors**

The present directors are listed on page 1.

D J Bucknall, B Gilvary and K A Thomson served as a directors throughout the financial year. Changes since 1 January 2018 are as follows:

|                | •  |   |   | Appointed                             |   | Resigned      |

| M J O'Sullivan |    |   |   | 26 February 2018                      |   | _             |
| R C Harrington |    |   |   | · · · · · · · · · · · · · · · · · · · | ٠ | 3 August 2018 |
| J A Hodgson    | •• |   | , | 5 September 2018                      |   | <del></del>   |

#### Directors' indemnity

The company indemnifies the directors in its Articles of Association to the extent allowed under section 232 of the Companies Act 2006. Such qualifying third party indemnity provisions for the benefit of the company's directors remain in force at the date of this report.

#### Dividends

During the year the company has declared and paid ordinary dividends of \$535 million (2017 \$500 million). The directors do not propose the payment of a final dividend.

#### Financial instruments

In accordance with section 414C of the Companies Act 2006 the directors have included information regarding financial instruments as required by Schedule 7 (Part 1.6) of the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 in the strategic report under Financial risk management.

#### Post balance sheet events

On 21 January 2019, the company was allotted 5,000,000 ordinary shares of £1 each for a total nominal value of £5,000,000 in Britannic Energy Trading Limited at par value. On 30 January 2019, a further 5,000,000 ordinary shares of £1 each were allotted at par value for a total nominal value of £5,000,000.

#### **Future developments**

The directors aim to maintain the management policies which have resulted in the company's growth in recent years. They believe that the company is in a good position to take advantage of any opportunities which may arise in the future.

It is the intention of the directors that the business of the company will continue for the foreseeable future.

#### **DIRECTORS' REPORT**

# Directors' statement as to the disclosure of information to the auditor

The directors who were members of the board at the time of approving the directors' report are listed on page 1. Having made enquiries of fellow directors and of the company's auditor, each of these directors confirms that:

- To the best of each director's knowledge and belief, there is no information relevant to the preparation of the auditor's report of which the company's auditor is unaware; and
- Each director has taken all the steps a director might reasonably be expected to have taken to be aware of relevant audit information and to establish that the company's auditor is aware of that information.

# STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE FINANCIAL STATEMENTS

# BP INTERNATIONAL LIMITED

The directors are responsible for preparing the Strategic Report, the Directors' Report and the financial statements in accordance with applicable UK law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law) including Financial Reporting Standard 101 'Reduced Disclosure Framework'. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and the profit or loss for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- · make judgements and estimates that are reasonable and prudent;
- state whether applicable United Kingdom accounting standards have been followed, subject to any
  material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors confirm that they have complied with these requirements and, having a reasonable expectation that the company has adequate resources to continue in operational existence for at least the next 12 months from the date these financial statements were approved, continue to adopt the going concern basis in preparing the financial statements.

#### INDEPENDENT AUDITOR'S REPORT

#### TO THE MEMBERS OF BP INTERNATIONAL LIMITED

#### Report on the audit of the financial statements

#### Opinion

In our opinion the financial statements of BP International Limited (the company):

- give a true and fair view of the state of the company's affairs as at 31 December 2018 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 "Reduced Disclosure Framework"; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- the profit and loss account;
- · the statement of comprehensive income;
- the balance sheet;
- the statement of changes in equity; and.
- the related notes 1 to 31.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 "Reduced Disclosure Framework" (United Kingdom Generally Accepted Accounting Practice).

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Conclusions relating to going concern

We are required by ISAs (UK) to report in respect of the following matters where:

- the directors' use of the going concern basis of accounting in preparation of the financial statements is not appropriate;
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant
  doubt about the company's ability to continue to adopt the going concern basis of accounting for a period of at least
  twelve months from the date when the financial statements are authorized for issue.

We have nothing to report in respect of these matters.

#### Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in respect of these matters.

#### Responsibilities of directors

As explained more fully in the statement of directors' responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### INDEPENDENT AUDITOR'S REPORT

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

# Report on other legal and regulatory requirements

#### Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- · the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified any material misstatements in the strategic report or the directors' report.

#### Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report in respect of the following matters if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- · the financial statements are not in agreement with the accounting records and returns; or
- · certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in respect of these matters.

#### Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

# FOR THE YEAR ENDED 31 DECEMBER 2018

#### **BP INTERNATIONAL LIMITED**

# 1. Authorisation of financial statements and statement of compliance with Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101)

The financial statements of BP International Limited for the year ended 31 December 2018 were approved by the board of directors on <u>17 109/2019</u> and the balance sheet was signed on the board's behalf by J A Hodgson. BP International Limited is a private company, limited by shares incorporated, domiciled and registered in England and Wales (registered number 00542515). The company's registered office is at Chertsey Road, Sunbury on Thames, Middlesex, TW16 7BP, United Kingdom. These financial statements were prepared in accordance with Financial Reporting Standard 101 'Reduced Disclosure Framework' (FRS 101) and the provisions of the Companies Act 2006.

# 2. Significant accounting policies, judgements, estimates and assumptions

The significant accounting policies and critical accounting judgements, estimates and assumptions of the company are set out below.

### Basis of preparation

These financial statements have been prepared in accordance with FRS 101. The financial statements have been prepared under the historical cost convention and modified to include the revaluation of certain financial instruments. Historical cost is generally based on the fair value of the consideration given in exchange for the assets.

The accounting policies that follow have been consistently applied to all years presented, except where otherwise indicated.

These financial statements are separate financial statements. The company has taken advantage of the exemption under s400 of the Companies Act 2006 not to prepare consolidated financial statements, because it is included in the group financial statements of BP p.l.c. Details of the parent in whose consolidated financial statements the company is included are shown in Note 30 to the financial statements.

As permitted by FRS 101, the company has taken advantage of the disclosure exemptions available under that standard in relation to:

- (a) the requirements of paragraphs 62, B64(d), B64(e), B64(g), B64(h), B64(j) to B64(m), B64(n)(ii), B64 (o)(ii), B64(p), B64(q)(ii), B66 and B67 of IFRS 3 Business Combinations
- (b) the requirements of paragraphs 10(d), 10(f), 16, 38A, 38B, 38C, 38D, 40A, 40B, 40C, 40D and 111 of IAS 1 Presentation of Financial Statements
- (c) the requirement in paragraph 38 of IAS 1 Presentation of Financial Statements to present comparative information in respect of:
  - (i) paragraph 79(a)(iv) of IAS 1
  - (ii) paragraph 73(e) of IAS 16 Property, Plant and Equipment and
  - (iii) paragraph 118(e) of IAS 38 Intangible Assets.
- (d) the requirements of IAS 7 Statement of Cash Flows
- (e) the requirements of paragraphs 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors in relation to standards not yet effective
- (f) the requirements of paragraph 17 and 18A of IAS 24 Related Party Disclosures
- (g) the requirements of IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member; and
- (h) the requirements of paragraphs 134(d) to 134(f) and 135(c)-135(e) of IAS 36, Impairment of Assets.

(i) the requirement of the second sentence of paragraph 110 and paragraphs 113(a), 114, 115, 118, 119(a) to (c), 120 to 127 and 129 of IFRS 15 Revenue from Contracts with Customers

Where required, equivalent disclosures are given in the group financial statements of BP p.l.c. The group financial statements of BP p.l.c. are available to the public and can be obtained as set out in Note 30.

The financial statements are presented in US dollars and all values are rounded to the nearest million dollars (\$ million), except where otherwise indicated.

#### Critical accounting policies: use of judgements, estimates and assumptions

Inherent in the application of many of the accounting policies used in preparing the financial statements is the need for management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual outcomes could differ from the estimates and assumptions used. The critical judgements and estimates that could have a significant impact on the results of the company are set out below and should be read in conjunction with the information provided in the Notes to the financial statements.

#### Significant judgement: interests in other entities

Judgement is required in assessing the level of control or influence over another entity in which the company holds an interest. Depending upon the facts and circumstances in each case, the company may obtain control, joint control or significant influence over the entity or arrangement. Transactions which give the company control of a business are business combinations. If the company obtains joint control of an arrangement, judgement is also required to assess whether the arrangement is a joint operation or a joint venture. If the company has neither control nor joint control, it may be in a position to exercise significant influence over the entity, which is then accounted for as an associate held at cost.

### Significant judgements and estimates: impairment of investments

Determination as to whether, and how much, an investment is impaired involves management estimates on highly uncertain matters such as the effects of inflation and deflation on operating expenses, discount rates, production profiles, reserves and resources, and future commodity prices, including the outlook for global or regional market supply-and-demand conditions for crude oil, natural gas and refined products.

Management judgement is required to determine whether an indicator of potential impairment exists in relation to the company's investments.

For value in use calculations, future cash flows are adjusted for risks specific to the cash-generating unit and are discounted using a pre-tax discount rate. The pre-tax discount rate is based upon the cost of funding the group derived from an established model, adjusted to a pre-tax basis. Fair value less costs of disposal calculations use the post-tax discount rate. The discount rates applied in impairment tests are reassessed each year.

In 2018 the post-tax discount rate used was 6% (2017 6%) and the pre-tax discount rate was 9% (2017 9%). Where the asset is located in a country which is judged to be higher risk an additional 2% premium was added to the discount rate (2017 2%). The judgement of classifying a country as higher risk takes into account various economic and geopolitical factors.

The long-term price assumptions used to determine recoverable amount based on value-in-use impairment tests from 2024 onwards are derived from \$75 per barrel for Brent and \$4/mmBtu for Henry Hub, both in 2015 prices, inflated for the remaining life of the asset (2017 \$75 per barrel and \$4/mmBtu, both in 2015 prices, from 2023 onwards). The price assumptions used for the five-year period to 2023 have been set such that there is a gradual transition from current market prices to the long-term price assumptions as noted above, with the rate of increase reducing in the later years.

In cases where fair value less costs to sell is used to determine the recoverable amount of an asset, where recent market transactions for the asset are not available for reference, accounting judgements are made about the assumptions market participants would use when pricing the asset. Fair value less costs to sell may be determined based on similar recent market transaction data or using discounted cash flow techniques. Where discounted cash flow analyses are used to calculate fair value less costs to sell, the discount rate used is based upon the cost of funding the group derived from an established model.

#### Significant accounting policies

#### Going concern

The directors have a reasonable expectation that the company has adequate resources to continue in operational existence for at least the next 12 months from the date these financial statements were approved and the financial statements have therefore been prepared under the going concern basis. Refer to the Strategic Report for further details.

#### Foreign currency

The functional and presentation currency of the financial statements is US dollars. The functional currency is the currency of the primary economic environment in which an entity operates and is normally the currency in which the entity primarily generates and expends cash.

Assets and liabilities of foreign currency branches are translated into US dollars at rates of exchange ruling at the balance sheet date. The profit and loss account is translated into US dollars using average rates of exchange. Exchange differences arising when the opening net assets and the profits for the year retained by foreign currency branches are translated into US dollars are taken directly to reserves and reported in other comprehensive income. When a foreign currency branch is disposed of the cumulative amount of foreign currency differences included in other comprehensive income is reclassified to the profit and loss account.

#### **Investments**

Fixed asset investments in subsidiaries and associates are held at cost. The company assesses investments for an impairment indicator annually. If any such indication of possible impairment exists, the company makes an estimate of the investment's recoverable amount. Where the carrying amount of an investment exceeds its recoverable amount, the investment is considered impaired and is written down to its recoverable amount.

Where these circumstances have reversed, the impairment previously made is reversed to the extent of the original cost of the investment.

All other fixed asset investments are stated in the financial statements at cost less provisions for impairment.

# Interests in associates

An associate is an entity over which the company has significant influence, through the power to participate in the financial and operating policy decisions of the investee, but which is not a subsidiary or a joint arrangement.

#### Intangible assets

Intangible assets, other than goodwill, are stated at the amount initially recognized, less accumulated amortization and accumulated impairment losses.

Intangible assets are carried initially at cost unless acquired as part of a business combination. Any such asset is measured at fair value at the date of the business combination and is recognized separately from goodwill if the asset is separable or arises from contractual or other legal rights.

Intangible assets with a finite life are amortized on a straight-line basis over their expected useful lives. For patents, licences and trademarks, expected useful life is the shorter of the duration of the legal agreement and economic useful life, and can range from three to fifteen years. Computer software costs generally have a useful life of three to five years.

The expected useful lives of assets and the amortization method are reviewed on an annual basis and, if necessary, changes in useful lives or the amortization method are accounted for prospectively.

The carrying value of intangible assets is reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

#### Tangible assets

Tangible assets are stated at cost, less accumulated depreciation and accumulated impairment losses. The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into the location and condition necessary for it to be capable of operating in the manner intended by management, the initial estimate of any decommissioning obligation, if any, and, for assets that necessarily take a substantial period of time to get ready for their intended use, directly-attributable finance costs. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset. The capitalized value of a finance lease is also included within tangible assets.

Exchanges of assets are measured at fair value unless the exchange transaction lacks commercial substance or the fair value of neither the asset received nor the asset given up is reliably measurable. The cost of the acquired asset is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. Where fair value is not used, the cost of the acquired asset is measured at the carrying amount of the asset given up. The gain or loss on derecognition of the asset given up is recognized in profit or loss.

Expenditure on major maintenance refits or repairs comprises the cost of replacement assets or parts of assets, inspection costs and overhaul costs. Where an asset or part of an asset that was separately depreciated is replaced and it is probable that future economic benefits associated with the item will flow to the company, the expenditure is capitalized and the carrying amount of the replaced asset is derecognized. Inspection costs associated with major maintenance programmes are capitalized and amortized over the period to the next inspection. Overhaul costs for major maintenance programmes, and all other maintenance costs are expensed as incurred.

Tangible assets are depreciated on a straight-line basis over their expected useful lives. The typical useful lives of the company's tangible assets are as follows:

Downstream 4 to 10 years Corporate & other 4 to 12 years

The expected useful lives and depreciation method of tangible assets are reviewed on an annual basis and, if necessary, changes in useful lives or the depreciation method are accounted for prospectively.

The carrying amounts of tangible assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

An item of tangible assets is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the profit and loss account in the period in which the item is derecognized.

#### Impairment of intangible and tangible assets

The company assesses assets or groups of assets for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable, for example, changes in the company's business plans, changes in commodity prices, low plant utilisation or evidence of physical damage. If any such indication of impairment exists, the company makes an estimate of the asset's recoverable amount. Individual assets are grouped for impairment assessment purposes at the lowest level at which there are identifiable cash flows that are largely independent of the cash flows of other groups of assets. An asset group's recoverable amount is the higher of its fair value less costs to sell and its value in use. Where the carrying amount of an asset group exceeds its recoverable amount, the asset group is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are adjusted for the risks specific to the asset group and are discounted to their present value typically using a pre-tax discount rate that reflects current market assessments of the time value of money. Fair value less costs to sell is identified as the price that would be received to sell the asset in an orderly transaction between market participants and does not reflect the effects of factors that may be specific to the entity and not applicable to entities in general.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such a reversal, the depreciation charge is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

#### Stocks

Stocks, other than stocks held for trading purposes, are stated at the lower of cost and net realizable value. Cost is determined by the first-in first-out method and comprises direct purchase costs, cost of production, transportation and manufacturing expenses. Net realizable value is based on estimated selling price less any further costs expected to be incurred to completion and disposal. Net realizable value is determined by reference to prices existing at the balance sheet date, adjusted where the sale of inventories after the reporting period gives evidence about their net realizable value at the end of the period.

Stocks held for short-term trading purposes are stated at fair value less costs to sell and any changes in fair value are recognized in the profit and loss account.

Supplies are valued at the lower of cost on a weighted average basis and net realizable value.

Leases

Agreements under which payments are made to owners in return for the right to use a specific asset are accounted for as leases. Leases that transfer substantially all the risks and rewards of ownership are recognized as finance leases. All other leases are accounted for as operating leases.

Finance leases are capitalized at the commencement of the lease term at the fair value of the leased item or, if lower, at the present value of the minimum lease payments. Finance charges are allocated to each period so as to achieve a constant rate of interest on the remaining balance of the liability and are charged directly against income. Capitalized leased assets are depreciated over the shorter of the estimated useful life of the asset or the lease term. Operating lease payments are recognized as an expense on a straight-line basis over the lease term except where capitalized as exploration or appraisal expenditure.

For all leases, contingent rents are recognized in the profit and loss account in the period in which they are incurred.

#### Financial assets

Financial assets are recognized initially at fair value, normally being the transaction price. In the case of financial assets not at fair value through profit or loss, directly attributable transaction costs are also included.

The subsequent measurement of financial assets depends on their classification, as set out below. The company derecognizes financial assets when the contractual rights to the cash flows expire or the financial asset is transferred to a third party. This includes the derecognition of receivables for which discounting arrangements are entered into.

From 1 January 2018, the company classifies its financial assets as measured at amortized cost or fair value through profit or loss. The classification depends on the business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

#### Financial assets measured at amortized cost

Financial assets are classified as measured at amortized cost when they are held in a business model the objective of which is to collect contractual cash flows and the contractual cash flows represent solely payments of principal and interest. Such assets are carried at amortized cost using the effective interest method if the time value of money is significant. Gains and losses are recognized in the profit and loss account when the loans and receivables are derecognized or impaired and when interest is recognized using the effective interest method. This category of financial assets includes trade and other receivables.

#### Financial assets measured at fair value through profit or loss

Financial assets are classified as measured at fair value through profit or loss when the asset does not meet the criteria to be measured at amortized cost. Such assets are carried on the balance sheet at fair value with gains or losses recognized in the income statement. Derivatives, other than those designated as effective hedging instruments, are included in this category.

#### Derivatives designated as hedging instruments in an effective hedge

Such derivatives are carried on the balance sheet at fair value. The treatment of gains and losses arising from revaluation is described below in the accounting policy for derivative financial instruments and hedging activities.

#### Cash equivalents

Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to insignificant risk of changes in value and generally have a maturity of three months or less from the date of acquisition. Cash equivalents are classified as financial assets measured at amortized cost or fair value through profit or loss.

### Impairment of financial assets measured at amortized cost

The company assesses on a forward looking basis the expected credit losses associated with financial assets classified as measured at amortized cost at each balance sheet date. Expected credit losses are measured based on the maximum contractual period over which the company is exposed to credit risk. Since this is typically less than 12 months, there is no significant difference between the measurement of 12-month and lifetime expected credit losses for the company's in-scope financial assets. The measurement of expected credit losses is a function of the probability of default, loss given default and exposure at default. The expected credit loss is estimated as the difference between the asset's carrying amount and the present value of the future cash flows the company expects to receive, discounted at the financial asset's original effective interest rate. The carrying amount of the asset is adjusted, with the amount of the impairment gain or loss recognized in the profit and loss account.

A financial asset or group of financial assets classified as measured at amortized cost is considered to be creditimpaired if there is reasonable and supportable evidence that one or more events that have a detrimental impact on the estimated future cash flows of the financial asset (or group of financial assets) have occurred. Financial assets are written off where the company has no reasonable expectation of recovering amounts due.

#### Financial liabilities

The measurement of financial liabilities is as follows:

#### Financial liabilities measured at fair value through profit or loss

Financial liabilities, including financial guarantees, that meet the definition of held for trading are classified as measured at fair value through profit or loss. Such liabilities are carried on the balance sheet at fair value with gains or losses recognized in the profit and loss account. Derivatives, other than those designated as effective hedging instruments, are included in this category.

### Derivatives designated as hedging instruments in an effective hedge

Such derivatives are carried on the balance sheet at fair value. The treatment of gains and losses arising from revaluation is described below in the accounting policy for derivative financial instruments and hedging activities.

# Financial liabilities measured at amortized cost

All other financial liabilities are initially recognized at fair value, net of transaction costs. For interest-bearing loans and borrowings this is typically equivalent to the fair value of the proceeds received net of issue costs associated with the borrowing.

After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any issue costs, and any discount or premium on settlement. Gains and losses arising on the repurchase, settlement or cancellation of liabilities are recognized in interest receivable and similar income and interest payable and similar expenses respectively. This category of financial liabilities includes trade and other payables and finance debt.

#### Derivative financial instruments and hedging activities

The company uses derivative financial instruments to manage certain exposures to fluctuations in foreign currency exchange rates, interest rates and commodity prices as well as for trading purposes. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives relating to unquoted equity instruments are carried at cost where it is not possible to reliably measure their fair value subsequent to initial recognition. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

Contracts to buy or sell a non-financial item (for example oil, oil products, gas and power) that can be settled net in cash or another financial instrument, or by exchanging financial instruments as if the contracts were

financial instruments, with the exception of contracts that were entered into and continue to be held for the purpose of the receipt or delivery of a non-financial item in accordance with the company's expected purchase, sale or usage requirements, are accounted for as financial instruments. Contracts to buy or sell equity investments, including investments in associates, are also financial instruments. Gains or losses arising from changes in the fair value of derivatives that are not designated as effective hedging instruments are recognized in the profit and loss account.

If, at inception of a contract, the valuation cannot be supported by observable market data, any gain or loss determined by the valuation methodology is not recognized in the profit and loss account but is deferred on the balance sheet and is commonly known as 'day-one profit or loss'. This deferred gain or loss is recognized in the profit and loss account over the life of the contract until substantially all the remaining contract term can be valued using observable market data at which point any remaining deferred gain or loss is recognized in the profit and loss account. Changes in valuation from the initial valuation at inception of a contract are recognized immediately through the profit and loss account.

For the purpose of hedge accounting, hedges are classified as:

- · Fair value hedges when hedging exposure to changes in the fair value of a recognized asset or liability.
- Cash flow hedges when hedging exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction.

Hedge relationships are formally designated and documented at inception, together with the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged, the existence at inception of an economic relationship and subsequent measurement of the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk, the hedge ratio and sources of hedge ineffectiveness. Hedges meeting the criteria for hedge accounting are accounted for as follows:

### Fair value hedges

The change in fair value of a hedging derivative is recognized in the profit and loss account. The change in the fair value of the hedged item attributable to the risk being hedged is recorded as part of the carrying value of the hedged item and is also recognized in the profit and loss account, where it offsets. The company applies fair value hedge accounting for hedging interest rate risk and certain currency risks on fixed rate finance debt.

Fair value hedge accounting is discontinued only when the hedging relationship or a part thereof ceases to meet the qualifying criteria. This includes when the risk management objective changes or when the hedging instrument is sold, terminated or exercised. The accumulated adjustment to the carrying amount of a hedged item at such time is then amortized prospectively to profit or loss as finance interest expense over the hedged item's remaining period to maturity.

### Costs of hedging

Time value of options and the foreign currency basis spread of cross-currency interest rate swaps are excluded from hedge designations and accounted for as costs of hedging. Changes in fair value of the time-value component of option contracts and the foreign currency basis spread of cross-currency interest rate swaps are recognized in other comprehensive income to the extent that they relate to the hedged item. For transaction-related hedged items, the amount recognized in other comprehensive income is reclassified to profit or loss when the hedged transaction affects profit or loss. For time-period related hedged items, the amount recognized in other comprehensive income is amortized to profit or loss on a straight line over the term of the hedging relationship.

# Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement. Level 1 inputs are quoted

prices in active markets for identical assets or liabilities. Level 2 inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability. Level 3 inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or BP's assumptions about pricing by market participants.

### Significant judgement and estimate: valuation of derivative financial instruments

In some cases the fair values of derivatives are estimated using internal models due to the absence of quoted prices or other observable, market-corroborated data. This applies to the company's longer-term derivative contracts. The majority of these contracts are valued using models with inputs that include price curves for each of the different products that are built up from available active market pricing data and modelled using the maximum available external pricing information. Additionally, where limited data exists for certain products, prices are determined using historical and long-term pricing relationships. Price volatility is also an input for options models. Changes in the key assumptions, in particular price curves, could have a material impact on the carrying amounts of derivative assets and liabilities in the next financial year. The impact on net assets and the profit and loss account would be limited as a result of offsetting movements on derivative assets and liabilities. For more information see Note 20.

In some cases, judgement is required to determine whether contracts to buy or sell commodities meet the definition of a derivative. In particular, longer-term contracts to buy and sell Liquefied Natural Gas ("LNG") are not considered to meet the definition as they are not considered capable of being net settled due to a lack of liquidity in the LNG market and so are accounted for on an accruals basis.

#### Offsetting of financial assets and liabilities

Financial assets and liabilities are presented gross in the balance sheet unless both of the following criteria are met: the company currently has a legally enforceable right to set off the recognized amounts; and the company intends to either settle on a net basis or realize the asset and settle the liability simultaneously. If both of the criteria are met, the amounts are set off and presented net. A right of set off is the company's legal right to settle an amount payable to a creditor by applying against it an amount receivable from the same counterparty. The relevant legal jurisdiction and laws applicable to the relationships between the parties are considered when assessing whether a current legally enforceable right to set off exists.

### Provisions and contingent liabilities

Provisions are recognized when the company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where appropriate, the future cash flow estimates are adjusted to reflect the risks specific to the liability.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax risk-free rate that reflects current market assessments of the time value of money. Where discounting is used, the increase in the provision due to the passage of time is recognized in the profit and loss account. Provisions are discounted using a nominal discount rate of 3.0% (2017 2.5%).

Provisions are split between amounts expected to be settled within 12 months of the balance sheet date (current) and amounts expected to be settled later (non-current).

Contingent liabilities are possible obligations whose existence will only be confirmed by future events not wholly within the control of the company, or present obligations where it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are not recognized in the financial statements but are disclosed unless the possibility of an outflow of economic resources is considered remote.

#### **Taxation**

Income tax expense represents the sum of current tax and deferred tax.

Income tax is recognized in the profit and loss account, except to the extent that it relates to items recognized in other comprehensive income or directly in equity, in which case the related tax is recognized in other comprehensive income or directly in equity.

Current tax is based on the taxable profit for the period. Taxable profit differs from net profit as reported in the profit and loss account because it is determined in accordance with the rules established by the applicable taxation authorities. It therefore excludes items of income or expense that are taxable or deductible in other periods as well as items that are never taxable or deductible. The company's liability for current tax is calculated using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is provided, using the balance sheet method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognized for all taxable temporary differences except:

- Where the deferred tax liability arises on the initial recognition of goodwill;
- Where the deferred tax liability arises on the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit nor taxable profit or loss; or
- In respect of taxable temporary differences associated with investments in subsidiaries and associates and interests in joint arrangements, where the company is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilized. An exception is where the deferred tax asset relates to the deductible temporary difference arising from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit nor taxable profit or loss.

In respect of deductible temporary differences associated with investments in subsidiaries and associates and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable or increased to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets and liabilities are not discounted.

Deferred tax assets and liabilities are offset only when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the current tax assets and liabilities on a net basis or to realize the assets and settle the liabilities simultaneously.

Where tax treatments are uncertain, if it is considered probable that a taxation authority will accept the company's proposed tax treatment, income taxes are recognized consistent with the company's income tax filings. If it is not considered probable, the uncertainty is reflected using either the most likely amount or an expected value, depending on which method better predicts the resolution of the uncertainty.

#### Turnover

Revenue from contracts with customers is recognized when or as the company satisfies a performance obligation by transferring control of a promised good or service to a customer. The transfer of control of oil, petroleum and chemical products, and other items usually coincides with title passing to the customer and the customer taking physical possession. The company principally satisfies its performance obligations at a point in time; the amounts of revenue recognized relating to performance obligations satisfied over time are not significant.

When, or as, a performance obligation is satisfied, the company recognizes as revenue the amount of the transaction price that is allocated to that performance obligation. The transaction price is the amount of consideration to which the company expects to be entitled. The transaction price is allocated to the performance obligations in the contract based on standalone selling prices of the goods or services promised.

Contracts for the sale of commodities are typically priced by reference to quoted prices. Revenue from term commodity contracts is recognized based on the contractual pricing provisions for each delivery. Certain of these contracts have pricing terms based on prices at a point in time after delivery has been made. Revenue from such contracts is initially recognized based on relevant prices at the time of delivery and subsequently adjusted as appropriate.

Physical exchanges with counterparties in the same line of business and to facilitate sales to customers are reported net, as are sales and purchases made with a common counterparty, as part of an arrangement similar to a physical exchange.

Where the company acts as agent on behalf of a third party to procure or market energy commodities, any associated fee income is recognized but no purchase or sale is recorded.

Where forward sale and purchase contracts for oil and oil products have been determined to be for short-term trading purposes, the associated sales and purchases are reported net within turnover whether or not physical delivery has occurred.

Revenue associated with the sale of oil, petroleum and chemical products, oil forward sales / purchase contracts and sales / purchases of trading stock is included on a net basis in turnover.

## Interest income

Interest income is recognized as the interest accrues using the effective interest rate – that is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

# Dividend income

Dividend income from investments is recognized when the shareholders' right to receive the payment is established.

#### Research costs

Research costs are expensed as incurred.

# Finance costs

All finance costs are recognized in the profit and loss account in the period in which they are incurred.

#### Dividends payable

Final dividends are recorded in the financial statements in the year in which they are approved by the company's shareholders. Interim dividends are recorded in the year in which they are approved and paid.

#### Impact of new International Financial Reporting Standards

The company adopted two new accounting standards issued by the IASB with effect from 1 January 2018, IFRS 9 'Financial instruments' and IFRS 15 'Revenue from contracts with customers'. There are no other new or amended standards or interpretations adopted during the year that have a significant impact on the financial statements.

#### IFRS 9 'Financial Instruments'

IFRS 9 'Financial Instruments' was issued in July 2014 and replaced IAS 39 'Financial Instruments: Recognition and Measurement'. The company adopted IFRS 9 and the related consequential amendments to other IFRSs in the financial reporting period commencing 1 January 2018. The company has applied the new standard in accordance with the transition provisions of IFRS 9. Comparatives have not been restated and adjustments on transition have been reported in opening retained earnings at 1 January 2018.

The company's revised accounting policies in relation to financial instruments are provided above.

The overall impact on transition to IFRS 9 was a reduction of \$10,172,000 in net assets, net of tax. This adjustment mainly related to an increase in the loss allowance for financial assets in the scope of IFRS 9's impairment requirements. As comparatives have not been restated the closing balance at 31 December 2017 for certain line items in the balance sheet differ from the opening balance at 1 January 2018 (as summarized below).

|                                    |                     |                   | \$ million                             |

|                                    | 6,566               | 6,556             | (10)                                   |

#### Classification and measurement

IFRS 9 provides a single classification and measurement approach for financial assets that reflects the business model in which they are managed and their cash flow characteristics. For financial liabilities the existing classification and measurement requirements of IAS 39 are largely retained.

The table below illustrates the classification and carrying amounts of financial assets under IFRS 9 and IAS 39 at the date of initial application, 1 January 2018. There were no differences in classification or carrying amounts for financial liabilities.

|                                  |   |   |                                       |   | •   | \$ million                            |
|----------------------------------|---|---|---------------------------------------|---|---|---------------------------------------|
| 1 January 2018                   | Classification under IAS 39                   | Classification<br>under IFRS 9          | Carrying<br>amount<br>under IAS<br>39 | Measurement category adjustment on transition | Measurement<br>attribute<br>adjustment<br>on transition | Carrying<br>amount<br>under<br>IFRS 9 |
| Financial assets                 | <del></del>                                   | •                                       | •                                     | <del></del>                                   |   |                                       |
| Loans                            | Loans and receivables                         | Fair value<br>through<br>profit or loss | . —                                   | 44  | (3)   | 41                                    |
| Trade and other receivables      | Loans and receivables                         | Amortized cost                          | 89,187                                | (44)  | (10)  | 89,133                                |
| Derivative financial instruments | Derivative hedging instruments                | Derivative hedging instruments          | 1,415                                 | _   |   | 1,415                                 |
| Cash and cash equivalents        | Loans and receivables                         | Amortized cost                          | 17,625                                | . —   | _   | 17,625                                |
| Cash and cash equivalents        | Available-<br>for-sale<br>financial<br>assets | Amortized cost                          | 2,058                                 | (658)   | . · —   | 1,400                                 |
| Cash and cash equivalents        | Available-<br>for-sale<br>financial<br>assets | Fair value<br>through<br>profit or loss | ·                                     | 2,058   | _   | 2,058                                 |
| Cash and cash equivalents        | Held-to-<br>maturity<br>investments           | Amortized cost                          | 1,400                                 | (1,400)                                       | ·<br>÷-   | _                                     |
|                                  |   |   | 111,685                               |   | (13)  | 111,672                               |

Certain loans that were classified as loans and receivables under IAS 39 have been classified as mandatorily measured at FVTPL under IFRS 9, as a result of the business model in which they are held. The adjustment of \$3 million to the carrying amount of these assets on transition reflects the difference between amortized cost measurement under IAS 39 and fair value measurement under IFRS 9.

Cash and cash equivalents that were classified as available-for-sale and held-to-maturity financial assets under IAS 39 have been classified as either measured at amortized cost or measured at FVTPL under IFRS 9. Cash and cash equivalents measured at FVTPL comprise money market funds that do not give rise to cash flows that are solely payments of principal and interest. For cash and cash equivalents that have been reclassified to measured at amortized cost, the carrying amount of those assets at the end of the reporting period approximate their fair value. The fair value gain or loss that would have been recognized in other comprehensive income in the reporting period if those financial assets had not been reclassified to amortized cost is immaterial.

Adjustments to the carrying amount of financial assets classified as measured at amortized cost under IFRS 9 relate entirely to the additional loss allowance required by the new standard's expected credit loss model. There were no financial assets or financial liabilities which the company had previously designated as at FVTPL under IAS 39 that were required to be reclassified, or which the company has elected to reclassify upon the application of IFRS 9. The company did not elect to designate at FVTPL any financial assets or financial liabilities at the date of initial application of IFRS 9.

#### **Impairment**

The financial asset impairment requirements of IFRS 9 introduce a forward-looking expected credit loss model that results in earlier recognition of credit losses than the incurred loss model of IAS 39. The adjustment to the 2018 opening balance sheet relating to expected credit loss reduced both the carrying amounts of financial assets and the profit and loss account reserve.

The table below reconciles the ending impairment allowances in accordance with IAS 39 and the provisions in accordance with IAS 37 to the opening loss allowances determined in accordance with IFRS 9.

|                             |                             |                             |                             |   | \$ million                  |
|-----------------------------|-----------------------------|-----------------------------|-----------------------------|---|-----------------------------|
| 1 January 2018              | Classification under IAS 39 | Classification under IFRS 9 | IAS 39<br>loss<br>allowance | Measurement<br>attribute<br>adjustment on<br>transition | IFRS 9<br>loss<br>allowance |
| Financial assets            |                             |                             |                             |   | 1                           |
| Trade and other receivables | Loans and receivables       | Amortized cost              | (126)                       | (10)  | (136)                       |
| Total loss allowance        |                             |                             | (126)                       | (10)  | (136.)                      |

#### Hedge accounting

Under IFRS 9 all existing hedging relationships qualified as continuing hedging relationships and the company has applied hedge accounting prospectively to certain of its commodity price risk management activities for which hedge accounting was not possible under IAS 39.

IFRS 9 also introduces a new way of treating fair value movements on the time value and foreign currency basis spreads of certain hedging instruments. Whereas under IAS 39 these movements were recognized in profit or loss, the group is either required, or has elected to initially recognize these movements within equity to the extent that they relate to the hedged item. An adjustment to the 2018 opening balance sheet was made to transfer \$270 million of losses net of related tax from the profit and loss account reserve to the costs of hedging reserve for relevant hedging instruments existing on transition.

### IFRS 15 'Revenue from Contracts with Customers'

IFRS 15 'Revenue from Contracts with Customers' was issued in May 2014 and replaced IAS 18 'Revenue' and certain other standards and interpretations. IFRS 15 provides a single model for accounting for revenue arising from contracts with customers, focusing on the identification and satisfaction of performance obligations. The company adopted IFRS 15 from 1 January 2018 and applied the 'modified retrospective' transition approach to implementation.

The company's revised accounting policy in relation to revenue is provided above. A disaggregation of revenue is provided in note 3.

The company identified certain minor changes in accounting relating to its revenue from contracts with customers but the new standard had no material effect on the company's net assets as at 1 January 2018 and so no transition adjustment is presented.

# 3. Turnover and other income

Turnover is mainly comprised of sales of goods.

An analysis of the company's turnover and other income is as follows:

|   |        | 2018       | 2017          |
|---|--------|------------|---------------|
|   | _      | \$ million | \$ million    |
| Revenue from contracts with customers           |        | 66,890     | 47,116        |
| Group gain/(loss) sharing arrangements          |        | 19         | . —           |
| Held for trading gain/(loss)                    |        | . 51       | <del></del> . |
|   | _      | 66,960     | 47,116        |
|   |        |            |               |
| Other operating income                          |        | 68         | 179           |
| Interest receivable and similar income (Note 6) |        | 2,705      | 2,184         |
| Income from shares in group undertakings        |        | 2,178      | 1,499         |
|   | ·<br>_ |            | • •           |
|   |        | 71,911     | 50,978        |

An analysis of turnover by class of business is set out below:

| Class of business: Downstream 67,781 47,70 |                              | . 2018     | 2017       |
|--|------------------------------|------------|------------|
| Downstream 67,781 47,70                    |                              | \$ million | \$ million |

| Other interest expense        |   |    |   |   | 318        | · — .      |
| Total interest expense        | • |    | • |   | 3,262      | 2,530      |

#### 8. Taxation

The company is a member of a group for the purposes of relief within Part 5, Corporation Tax Act 2010.

The taxation charge in the profit and loss account is made up as follows:

|  | 2018       | 2017       |
|--|------------|------------|
| Current tax  | \$ million | \$ million |
| UK corporation tax on income for the year            | 1 ·        | 4          |
| UK tax (overprovided) / underprovided in prior years | 1          | _ ·        |
| Overseas tax on income for the year                  | 6          | 20         |
| Total current tax charged                            | 8          | 24         |
|  |            |            |
| Deferred tax   |            |            |
| Origination and reversal of temporary differences    | 142        | (167)      |
| Adjustments in prior year temporary differences      | 25         | . —        |
| Total deferred tax credited                          | 167        | (167)      |
|  |            |            |
| Tax (credited) / charged on profit                   | 175        | (143)      |

# (a) Reconciliation of the effective tax rate

The tax assessed on the profit for the year is lower than the standard rate of corporation tax in the UK of 19% for the year ended 31 December 2018 (2017 19.25%). The differences are reconciled below:

|  | 2018       | 2017       |
|--|------------|------------|
|  | UK         | UK         |
|  | \$ million | \$ million |
| (Loss) / profit before tax                             | (216)      | 2,589      |
| Tax charge / (credit)                                  | 175        | (143)      |
| Effective tax rate                                     | (81)%      | (5.52)%    |
|  |            | 2017       |
|  | 2018       | 2017       |
|  | UK         | UK         |
|  | %          | <b>%</b> . |
| UK corporation tax rate:                               | 19%        | 19.25%     |
| In arrange / (de arrange) respective from              |            |            |
| Increase / (decrease) resulting from:                  | (101)      | (0.05)     |
| Non-deductible expenditure / non-taxable income        | (121)      | (9.05)     |
| Overseas tax   | (4) .      | .0:77      |
| Free group relief                                      | . (88)     | (1.44)     |
| Deferred tax provided at lower rates                   | . 8        |            |
| Adjustments to tax charge in respect of previous years | (12)       | (11.23)    |
| Dividends not subject to UK tax                        | 192        | (4.67)     |
| Movements in unrecognised deferred tax                 | (75)       | 0.85       |
| Effective tax rate                                     | (81)       | (5.52)     |

The reconciling items shown above are those that arise for UK corporation tax purposes, rather than overseas tax purposes.

#### Change in corporation tax rate

The UK corporation tax rate reduced to 19% with effect from 1 April 2017, and will further reduce to 17% from 1 April 2020. Deferred tax has been measured using these rates, which have been substantively enacted at 31 December 2018.

#### (b) Provision for deferred tax

The deferred tax included in the profit and loss account and balance sheet is as follows:

|  | · Profit and lo | ss account | Balance sheet |       |  |
|--|-----------------|------------|---------------|-------|--|
| Deferred tax asset                           | 2018            | 2017       | 2018          | 2017  |  |
|  | \$000           | \$000      | \$000         | \$000 |  |
| Decommissioning and other provisions         | , 3             | (3)        |               | 3     |  |
| Depreciation in excess of capital allowances | 150             | (150)      |               | 150   |  |
| Other deductible temporary differences       | 14              | (14)       |               | . 14  |  |
| Net credit for deferred tax assets '         | 167             | (167)      |               | 167   |  |

# (c) Factors that may affect future tax charges

Deferred tax has not been recognized on deductible temporary differences of \$1,031 million (2017 \$47 million) relating to fixed assets as they are not expected to give rise to any future tax benefit. Of these fixed asset temporary differences, \$Nil (2017 \$(2) million) related to movements in foreign exchange rates.

Deferred tax has not been recognized on deductible temporary differences relating to provisions of \$62 million (2017 \$12 million), foreign tax credits of \$Nil (2017 \$2 million) or other deductible temporary differences of \$48 million (2017 \$195 million) as they are not expected to give rise to any future tax benefit.

On 2 April 2019 the European Commission ("EC") issued its final decision in relation to the UK's tax rules in respect of controlled foreign companies ("CFCs"). These rules charge tax in respect of foreign entities controlled from the UK that are subject to a lower level of tax. There was an exemption for 75% of this charge if the CFCs' activities related to financing. The EC has concluded this exemption is in breach of the EU State Aid rules and that the tax related to this exemption must be repaid. The UK government has applied to the EU courts for annulment of the EC decision. Based on our current assessment, any impact on the financial statements is not expected to be material.

### 9. Directors and employees

# (a) Remuneration of directors

None of the directors received any fees or remuneration for qualifying services as a director of the company during the financial year (2017 \$Nil).

B. Gilvary is a director of BP p.l.c, the ultimate parent undertaking, in whose accounts information required by the Companies Act 2006 as regards to emoluments is given. The remaining directors are senior executives of, and are remunerated by, BP p.l.c. and receive no remuneration for services to this company or its subsidiary undertakings.

#### (b) Employee costs

The company had no employees during the year (2017 Nil).

# 10. Intangible assets

| At 31 December 2017 |   | 94,425                     | 25                       | 3                                    | 3          | 94,456     |

During the year the company made additional investments into its existing shareholdings of BP Finance p.l.c (\$2,732 million), BP Technology Ventures Limited (\$450 million), Britannic Trading Limited (\$25 million) and Britannic Energy Trading Limited (\$14 million). The company also bought a 100% shareholding in BP South America Holdings Limited for \$4,810 million.

Disposals in the year largely relate to the company's investment in BP Australia Swaps Management Limited (BPASM), which had a carrying value brought forward of \$6,142 million. On 24 July 2018, BPASM undertook a share capital reduction by cancelling and extinguishing 1,500,000,000 ordinary shares of US\$1.00 each and made a capital payment of \$1,200 million to the company. On 2 November 2018, a second capital reduction was approved, with BPASM cancelling and extinguishing a further 1,812,500,000 ordinary shares of US\$1.00 each and returning an additional \$1,450 million of capital to the company. The two capital reductions resulted in a decrease in carrying value of \$3,312 million to \$2,830 million. As the total disposal proceeds were \$2,650 million, this generated a loss on disposal of \$662 million.

The company was required to perform an impairment review of its investments in the year. As a result of this review, an impairment charge of \$338 million was recognized against the company's \$2,624 million investment in BP Regional Australasia Holdings Pty Limited. An additional \$238 million impairment charge was recognised against the company's \$263 million investment in Britannic Trading Limited.

The investments in the subsidiary and associated undertakings are unlisted.

The subsidiary and other undertakings of the company at 31 December 2018 and the percentage of equity capital held set out below are the investments which principally affected the profits or net assets of the company. The principal country of operation is generally indicated by the company's country of incorporation or by its name.

All voting rights are equal to percentage of share capital owned unless otherwise noted below.

Valuation and qualifying accounts relating to trade and other receivables comprise expected credit loss allowances in 2018 and impairment provisions recognized on an incurred loss basis in comparative periods. The adjustment on adoption of IFRS 9 relates to the additional loss allowance required by the new standard's expected credit loss model. There were no significant changes to the gross carrying amounts of trade and other receivables during the year that affected the estimation of the loss allowance at 31 December 2018.

In addition to the amounts presented above, expected loss allowances on cash and cash equivalents classified as measured at amortized cost totalled \$6 million (1 January 2018 \$Nil). For further information on the company's credit risk management policies see Note 19.

Valuation and qualifying accounts are deducted in the balance sheet from the assets to which they apply.

For further information on the adjustments on adoption of IFRS 9 see Note 2.

|                                     |            | · ·        |
| Total creditors                     | 137,670    | 150,722    |

Materially all of the company's trade payables have payment terms in the range of 30 to 60 days and give rise to operating cash flows. The active management of supplier payment terms within this range enables the company to optimize and reduce volatility in cash flow.

#### 17. Bank loans and overdrafts

At 31 December 2018 the company had access to the Group's undrawn borrowing facilities amounting to \$7,625 million (2017 \$7,625 million).

#### 18. Obligations under leases

Operating lease payments represent rentals payable by the company for certain of its land and buildings, plant and machinery, and other assets. Leases of land and buildings largely relate to office accommodation. Leases are negotiated for an average term of fifteen years and the rentals are fixed for an average of five years. Leases of land and buildings are typically subject to rent reviews at specified intervals and provide for the lessee to pay all insurance, maintenance and repair costs.

At the balance sheet date, the company had outstanding commitments for future minimum lease payments under non-cancellable operating leases, which fall due as follows:

|                   |                  | 2018                  |            | 2017             |                   |               |  |  |  |  |  |

#### DTT

#### . Financial instruments and financial risk factors

The accounting classification of each category of financial instruments, and their carrying amounts, is set out below. Current year amounts are presented based on the classification, measurement and impairment requirements of IFRS 9. Comparatives are presented based on the classification, measurement and impairment requirements of IAS 39.

| At 31 December 2018              | Note | Measured at amortized cost | Mandatorily<br>measured at fair<br>value through<br>profit or loss | Derivative<br>hedging<br>instruments  | Total carrying amount |

For all financial instruments, the carrying amount is either the fair value, or approximates the fair value.

Information on gains and losses on derivative financial assets and financial liabilities classified as measured at fair value through profit or loss is provided in the derivative gains and losses section of Note 20.

Interest income and expenses arising on financial instruments is disclosed in Notes 6 and 7 respectively.

#### Financial risk factors

The management of financial risks is performed at BP group level. The main risk factors applicable to the company are market risk (including commodity price risk) and credit risk. Further details on these financial risks are included within Note 29 of the BP group Annual Report and Form 20-F for the year ended 31 December 2018.

#### Market risk

The company, as part of the BP group, measures commodity price risk exposure arising from its trading positions in liquid periods using value-at-risk techniques. These techniques make a statistical assessment of the market risk arising from possible future changes in market prices over a one-day holding period. The value-at-risk measure is supplemented by stress testing. Trading activity occurring in liquid periods is subject to value-at-risk limits for each trading activity and for this trading activity in total. The BP group board has delegated a limit of \$100 million value at risk in support of this trading activity. Alternative measures are used to monitor exposures which are outside liquid periods and which cannot be actively risk-managed.

#### Credit risk

The maximum credit exposure associated with financial assets is equal to the carrying amount. The company does not aim to remove credit risk entirely but expects to experience a certain level of credit losses.

Management information used to monitor credit risk, which reflects the impact of collateral held, indicates that the risk profile of financial assets which are subject to review for impairment under IFRS 9 is as set out below.

Financial instruments subject to offsetting, enforceable master netting arrangements and similar agreements

The following table shows the gross amounts of recognized financial assets and liabilities (i.e. before offsetting) and the amounts offset in the balance sheet.

Amounts which cannot be offset under IFRS, but which could be settled net under the terms of master netting agreements if certain conditions arise, and collateral received or pledged, are also shown in the table to show the total net exposure of the group.

#### Liquidity risk

Liquidity risk is the risk that suitable sources of funding for the company's business activities may not be available. The company's liquidity is managed centrally with operating units forecasting their cash and currency requirements to the central treasury function. Unless restricted by local regulations, subsidiaries pool their cash surpluses to treasury, which will then arrange to fund other subsidiaries' requirements, or invest any net surplus in the market or arrange for necessary external borrowings, while managing the company's overall net currency positions.

The company manages liquidity risk associated with derivative contracts based on the expected maturity of both derivative assets and liabilities as indicated in Note 20. Management does not currently anticipate any cash flows that could be of a significantly different amount, or could occur earlier than the expected maturity analysis provided.

The company also utilizes various arrangements in order to manage its working capital including discounting of receivables and, in the supply and trading business, the active management of supplier payment terms, inventory and collateral. In line with normal industry practice some supplier arrangements utilize letter of credit (LC) facilities. In certain of those arrangements the company's payments are made to the supplier of the LC rather than the supplier.

#### 20. Derivatives and other financial instruments

In the normal course of business the company enters into derivative financial instruments (derivatives), to manage its normal business exposures in relation to commodity prices, foreign currency exchange rates and interest rates, including management of the balance between floating rate and fixed rate debt consistent with risk management policies and objectives.

For information on significant estimates and judgements made in relation to the application of hedge accounting and the valuation of derivatives, see Derivative financial instruments and hedging activities within Note 2.

The fair values of derivative financial instruments at 31 December are set out below.

#### Derivatives held for trading

The company maintains active trading positions in a variety of derivatives. The contracts may be entered into for risk management purposes, to satisfy supply requirements or for entrepreneurial trading. Certain contracts are classified as held for trading, regardless of their original business objective, and are recognized at fair value with changes in fair value recognized in the profit and loss account. Trading activities are undertaken by using a range of contract types in combination to create incremental gains by the arbitraging process between markets, locations and time periods. The net of these exposures is monitored using market value-at-risk techniques.

#### Embedded derivatives .

Prior to the development of an active gas trading market, UK gas contracts were priced using a basket of available price indices, primarily relating to oil products, power and inflation. After the development of an active UK gas market, certain contracts were entered into or renegotiated using pricing formulae not directly related to gas prices, for example, oil product and power prices. In these circumstances, pricing formulae have been determined to be derivatives, embedded within the overall contractual arrangements that are not clearly and closely related to the underlying commodity. The resulting fair value relating to these contracts is recognized on the balance sheet with gains or losses recognized in the profit and loss account. All embedded derivatives are valued using inputs that include price curves for each of the different products that are built up from active market pricing data. Where necessary, these are extrapolated to the expiry of the contracts (the last of which is in 2018) using all available external pricing information. Additionally, where limited data exists for certain products, prices are interpolated using historical and long-term pricing relationships.

The fair values of derivative financial instruments at 31 December are set out below:

#### Level 3 derivatives

The following table shows the changes during the year in the net fair value of derivatives held for trading purposes within level 3 of the fair value hierarchy.

|   | Oil Price  | Other        |
|---|------------|--------------|
|   | \$ million | \$ million   |
| Net fair value of contracts as at 1 January 2018    | . (3)      | 115          |
| Losses recognized in the income statement           | (1)        | (8)          |
| Settlements   | . 3        | <del>.</del> |
| Net fair value of contracts as at 31 December 2018  | (1)        | . 107        |
|   |            |              |
|   | Oil Price  | Other        |
|   | \$ million | \$ million   |
| Net fair value of contracts as at 1 January 2017    | (2)        | .100         |
| (Losses) / gains recognized in the income statement | (3)        | 10           |
| Settlements   | 2          | 5            |
| Net fair value of contracts as at 31 December 2017  | (3)        | 115          |

#### Derivative gains and losses

Gains and losses relating to derivative contracts are included within Turnover in the profit and loss account depending upon the nature of the activity and type of contract involved. The contract types treated in this way include futures, options, swaps and certain forward sales and forward purchases contracts, and relate to both currency and commodity trading activities. Gains or losses arise on contracts entered into for risk management purposes, optimisation activity and entrepreneurial trading. They also arise on certain contracts that are for normal procurement or sales activity for the group but that are required to be fair valued under accounting standards. Also included within sales and other operating revenues are gains and losses on inventory held for trading purposes.

The total amount relating to all these items (excluding gains and losses on realized physical derivative contracts that have been reflected gross in the income statement within sales and purchases) was a net gain of \$70 million (2017 \$489 million net gain). This number does not include gains and losses on realized physical derivative contracts that have been reflected gross in the profit and loss account within sales and purchases or the change in value of transportation and storage contracts, but does include the associated financially settled contracts. The net amount for actual gains and losses relating to derivative contracts and all related items therefore may differ significantly from the amount disclosed above.

#### Fair value hedges

At 31 December 2018, the company held interest rate and cross-currency interest rate swap contracts as fair value hedges of the interest rate risk and foreign currency risk arising from company fixed rate debt issuances. The interest rate swaps are used to convert US dollar denominated fixed rate borrowings into floating rate debt. The cross-currency interest rate swaps are used to convert sterling, euro, Swiss franc, Australian dollar, Canadian dollar and Norwegian krone denominated fixed rate borrowings into US dollar floating rate debt. The company manages all risks derived from debt issuance, such as credit risk, however, the company applies hedge accounting only to certain components of interest rate and foreign currency risk in order to minimize hedge ineffectiveness. Note 29 of the BP group Annual Report and Form 20-F for the year ended 31 December 2018 outlines the group's approach to interest rate and foreign currency exchange risk management.

The interest rate and foreign currency exposures are identified and hedged on an instrument-by-instrument basis. For interest rate exposures, the company designates as a fair value hedge the benchmark interest rate component only. This is an observable and reliably measurable component of interest rate risk. For foreign currency exposures, the company excludes from the designation the foreign currency basis spread component implicit in the cross-currency interest rate swaps. This is separately calculated at hedge designation, is recognized

in other comprehensive income over the life of the hedge and amortized to the income statement on a straightline basis, in accordance with the company's policy on costs of hedging.

The company applies hedge accounting where there is an economic relationship between the hedged item and the hedging instrument. The existence of an economic relationship is determined initially by comparing the critical terms of the hedging instrument and those of the hedged item and it is prospectively assessed using linear regression analysis. The company issues fixed rate debt and enters into interest rate and cross-currency interest rate swaps with critical terms that match those of the debt and on a 1:1 hedge ratio basis. The hedge ratio is determined by comparing the notional amount of the derivative with the notional amount of the debt. The hedge relationship is designated for the full term and notional value of the debt. Both the hedging instrument and the hedged item are expected to be held to maturity.

The company has identified the following sources of ineffectiveness, which are not expected to be material:

- derivative counterparty's credit risk which is not offset by the hedged item. This risk is mitigated by
  entering into derivative transactions only with high credit quality counterparties; and
- sensitivity to interest rate between the hedged item and the derivatives. This is driven by differences in payment frequencies between the instrument and the bond.

The table below summarizes the change in the fair value of hedging instruments and the hedged item used to calculate ineffectiveness in the period.

|   |   |   | . \$ million   |
|---|---|---|--|
| At 31 December 2018                                     | Change in fair value of hedging instruments used to calculate ineffectiveness | Change in fair<br>value of hedged<br>item used to<br>calculate<br>ineffectiveness | Hedge ineffectiveness recognised in profit or (loss) |
| Fair value hedges                                       |   | · · · · · · · · · · · · · · · · · · ·   |  |
| Interest rate risk on finance debt                      | (188)   | 181   | (7)  |
| Interest rate and foreign currency risk on finance debt | 812   | (810)   | 2  |

The table below summarizes the carrying amount of the derivatives designated as hedging instruments in fair value hedge relationships at 31 December 2018.

|   |               | •           | \$ million                |  |
|---|---------------|-------------|---------------------------|--|
|   | Carrying amou |             | Nominal amount of hedging |  |
| At 31 December 2018                                     | Assets        | Liabilities | instruments               |  |
| Fair value hedges                                       |               |             | · ·                       |  |
| Interest rate risk on finance debt                      | 146           | (445)       | , 20,513                  |  |
| Interest rate and foreign currency risk on finance debt | . 158         | (789)       | 16,580                    |  |

All hedging instruments are presented within derivative financial instruments on the company balance sheet. Ineffectiveness arising on fair value hedges is included within the cost of sales section of the income statement.

The table below summarizes the profile by tenor of the nominal amount of the derivatives designated as hedging instruments in fair value hedge relationships at 31 December 2018. The weighted average floating interest rate of these interest rate swaps and cross-currency interest rate swaps was 3.04% and 4.07% respectively.

| Interest rate risk on debt                      |        | (14,587)                       | 288    |  | (360)               |  |
| Interest rate and foreign currency risk on debt |        | (16,883)                       |        | (62)   |                     |  |

The hedged item for all fair value hedges is presented within finance debt on the group balance sheet.

#### Movement in reserves related to hedge accounting

The table below provides a reconciliation of the costs of hedging reserves on a pre-tax basis by risk category.

|   |  | \$ million |
|---|--|------------|
|   | Costs of hedging reserves                                |            |
|   | Interest rate<br>and foreign<br>currency<br>risk on debt | Total      |
| As at 31 December 2017                                |  | •          |
| Adjustment on adoption of IFRS 9                      | (270)  | (270)      |
| As at 1 January 2018                                  | (270)  | (270)      |
|   |  |            |
| Recognised in other comprehensive income              |  |            |
| Costs of hedging marked to market                     | (244)  | (244)      |
| Costs of hedging reclassified to the income statement | 58   | 58         |
|   | (186)  | (186)      |
| As at 31 December 2018                                | (456)  | (456)      |

Costs of hedging relates to the foreign currency basis spreads of hedging instruments used to hedge the company's interest rate and foreign currency risk on debt which is a time-period related item.

#### 21. Capital management

The company defines capital as total equity (which is the company's net asset value). We maintain our financial framework to support the pursuit of value growth for shareholders, while ensuring a secure financial base. During 2010 we lowered our gearing band for the group from a historical range of 20-30% down to 10-20% to manage uncertainties, mainly in relation to the Deepwater Horizon incident. Having finalized these agreements, we have re-established a 20-30% gearing band going forward.

#### 22. Other provisions

|                                    |   | ·. · |     | 2018       | 2017       |
|------------------------------------|---|------|-----|------------|------------|

For information on significant judgements and estimates made in relation to provisions, see Provisions within Note 2.

#### 23. Called up share capital

|   | ` | 2018       | 2017       |
|---|---|------------|------------|
|   |   | \$ million | \$ million |
| Issued and fully paid:  |   |            |            |
| 33,538,111,932 ordinary of £1 each for a total nominal value of £33,538,111,932 |   | 50,641     | 50,641     |
|   |   | 50,641     | 50,641     |

#### 24. Reserves

#### Called up share capital

The balance on the called up share capital account represents the aggregate nominal value of all ordinary shares in issue.

#### Cash flow hedge reserve

The cash flow hedge reserve records the portion of the gain or loss on a hedging instrument in a cash flow hedge that is determined to be an effective hedge. For further information on the accounting for cash flow hedges see Note 2 - Derivative financial instruments and hedging activities.

#### Costs of hedging reserve

This reserve records the change in fair value of the foreign currency basis spread of financial instruments to which cost of hedge accounting has been applied. The accumulated amount relates to time-period related hedged items and is amortized to profit or loss over the term of the hedging relationship.

Prior to the company's adoption of IFRS 9 changes in the fair value of such foreign currency basis spreads were recognized in profit or loss. On adoption of the new standard a transfer from the profit and loss account reserve to the costs of hedging reserve was made in order to reflect the opening reserves position for relevant hedging instruments existing on transition. For further information on the accounting for costs of hedging see Note 2 - Derivative financial instruments and hedging activities.

#### Foreign currency translation reserve

The foreign currency translation reserve is used to record the currency fluctuations in relation to the foreign currency branches.

#### Profit and loss account

The balance held on this reserve is the retained profits of the company.

In 2018, the company paid interim ordinary dividends of \$535 million (2017 \$500 million). The dividend per share was \$0.02 (2017 \$0.01).

#### 25. Capital commitments

Authorized and contracted future capital expenditure by the company for which contracts had been placed but not provided in the financial statements at 31 December 2018 is estimated at \$472 million (2017 \$84 million).

#### 26. Guarantees and other financial commitments

The company has issued guarantees under which amounts outstanding at 31 December 2018 were \$29,375 million (2017 \$29,887 million), the majority of which relate to obligations of fellow subsidiaries of BP p.l.c. No material losses are likely to arise from these guarantees.

### 27. Related party transactions

The company has taken advantage of the exemption contained within paragraphs 8(k) and (j) of FRS 101, and has not disclosed transactions entered into with wholly-owned group companies or key management personnel.

During the year the company entered into transactions, in the ordinary course of business, with other related parties. Transactions entered into, and trading balances outstanding at 31 December, are as follows:

| Related party                          |         | Sales to related party                | Purchases<br>from related<br>party | Amounts owed from related party | Amounts owed to related party           |
|--|---------|---------------------------------------|------------------------------------|---------------------------------|---|
|  |         | \$ million                            | \$ million                         | \$ million                      | \$ million                              |
|  |         |                                       |                                    |                                 |   |
| Aker BP ASA                            |         |                                       |                                    |                                 |   |

#### 28. Off-balance sheet arrangements

The company enters into operating lease arrangements for the rental of buildings and plant and equipment as these arrangements are a cost efficient way of obtaining the short-term benefits of these assets. The operating lease charges for the year are disclosed in Note 4 and the whole obligation under these arrangements is disclosed in Note 18.

#### 29. Post balance sheet events

On 21 January 2019, the company was allotted 5,000,000 ordinary shares of £1 each for a total nominal value of £5,000,000 in Britannic Energy Trading Limited at par value. On 30 January 2019, a further 5,000,000 ordinary shares of £1 each were allotted at par value for a total nominal value of £5,000,000.

### 30. Immediate and ultimate controlling parent undertaking

The immediate parent undertaking is BP p.l.c., a company registered in England and Wales. The ultimate controlling parent undertaking is BP p.l.c., a company registered in England and Wales, which is the parent undertaking of the smallest and largest group to consolidate these financial statements. Copies of the consolidated financial statements of BP p.l.c. can be obtained from its registered address: 1 St James's Square, London, SW1Y 4PD.

#### 31. Related undertakings

In accordance with Section 409 of the Companies Act 2006, disclosed below is a full list of related undertakings in which the company holds an interest of 20% or greater, along with the country of incorporation and the percentage of share capital owned as at 31 December 2018.
