Notes to the Abbreviated Accounts

Year Ended 31 January 2015

1. ACCOUNTING POLICIES

Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Cash flow statement

In the opinion of the director the company qualifies as a small company and accordingly a cash flow statement is not required.

Turnover

Turnover is recognised consistently with the right to receive consideration in exchange for the performance of supplying services

In respect of long-term contracts and contracts for on-going services, turnover represents the value of work done in the year, including estimates of amounts not invoiced. Turnover in respect of long-term contracts and contracts for on-going services is recognised by reference to the stage of completion.

Fixed assets

All fixed assets are initially recorded at cost.

Depreciation

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows:

Plant & Machinery	-	15% reducing balance
Fixtures & Fittings	-	20% reducing balance
Motor Vehicles	-	25% reducing balance
Equipment	-	15% reducing balance
Computer Equipment	-	33.3% reducing balance

Stocks

Stocks are stated at the lower of cost and net realisable value. Cost is computed on a first in first out basis. The cost of work in progress and finished goods includes all production overheads and depreciation and the attributable proportion of indirect overheads based on the normal level of activity. Net realisable value is based on estimated selling price less the estimated cost of disposal.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions:

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
