ATKINS LIMITED

STRATEGIC REPORT FOR THE YEAR ENDED 31 MARCH 2014

Business review and future developments

Nature of the business

Atkins Limited's (the Company) core business is helping our clients to plan, design and enable capital programmes that resolve complex challenges in the built and natural environment. The Company is able to plan all aspects of its clients' projects, conducting feasibility studies and impact analyses covering technical, logistical, legal, environmental and financial considerations. The Company designs systems, infrastructures, processes, buildings and civil structures. The Company enables its clients' complex programmes by optimising procurement methods and managing supply chains on their behalf to reduce timescales, cost and risk. The Company's employees include engineers, architects, surveyors, cost and project managers, planners, management consultants, geologists and experts in information technology, telecommunications and environmental management.

Objectives of the business and future developments

The Company's primary objective is to drive shareholder value with unrelenting focus on operational excellence and to implement our growth strategy with the priority on portfolio optimisation and focused sector, as well as regional, expansion. This requires earnings growth in the long term, combined with strong cash generation. The Company's strategy is to develop further the Company's identity, drive excellence in all that we do and thus deliver core growth. During the year, we continued to make progress on these strategic objectives.

The Company is a major component of the group of companies headed by WS Atkins plc (the Group). The Company, and in turn the Group, made good progress in the last twelve months. Overall, our business performed in line with expectations. Our broad multidisciplinary offering has helped mitigate the impact of constrained public sector spending by providing competitive, cost effective, high quality expertise.

Further details of the objectives and future developments for the Group are disclosed in the WS Atkins plc consolidated financial statements for the year ended 31 March 2014.

Principal risks and uncertainties

We continue to manage a number of potential risks and uncertainties which could have a material impact on our long term performance. Many of these risks are common to other companies and we assess them to establish the principal risks for the Group. We continue to assess these risks under two main categories of strategic risk and operational risk. Effective risk management continues to be embedded in our governance framework, which is summarised in the Corporate Governance Report and the Strategic Report sections of the WS Atkins plc consolidated financial statements for the year ended 31 March 2014.

Results and dividends

Revenue

In the year ended 31 March 2014, the Company's revenue increased by 2.1% to £868.9m (2013: £850.8m).

Operating profit

Reported operating profit for the year was £44.3m, a decrease of £0.6m based on comparative (1.3%).

Profit after tax

The profit after tax for the year of £43.3m (2013: £30.4m restated) is shown in the income statement.

Cash

Net funds as at 31 March 2014 were £89.5m (2013: £70.5m). Cash generated from operating activities was £15.6m (2013: £49.9m).

Dividends

No dividends were paid during the year (2013: £nil).

ATKINS LIMITED

STRATEGIC REPORT FOR THE YEAR ENDED 31 MARCH 2014

Key performance indicators

Management uses a range of performance measures to monitor and manage the business. Those that are particularly important in monitoring our progress in generating shareholder value are considered key performance indicators (KPIs).

Our KPIs measure past performance and also provide information and context to anticipate future events and, in conjunction with our detailed knowledge and experience of the segments in which we operate, allow us to act early and manage the business going forward. We track volume, profitability, efficiency, secured workload and capacity.

Revenue, operating profit and margin, and operating cash flow provide indications as to the volume and quality of work we have done. They measure both profitability and the efficiency with which we have turned operating profits into cash. The KPIs for 2014 are shown in the table below, along with prior year comparatives.

	2014	Restated 2013	% change in year
Financial metrics			
Revenue	£868.9m	£850.8m	2.1%
Underlying operating profit	£44.3m	£40.6m	9.1%
Underlying operating margin	5.1%	4.8%	0.3%
Cash generated from continuing operations	£13.3m	£46.5m	(71.4)%

Disposal of UK highways services

On 27 February 2013 contracts were exchanged to dispose of the Company's highways services business, which formed part of its highways and transportation business, to Skanska Construction UK Limited (Skanska), a wholly owned subsidiary of Skanska AB. This disposal, which is in line with the Company's strategy of optimising its portfolio of businesses, completed on 4 October 2013. Further details of the sale are given in note 9 to the Financial Statement.

Corporate responsibility

The Company is committed to acting responsibly towards all its stakeholders, and the Group is committed to taking a leadership position within its sector. The Group's corporate responsibility strategy and performance is published on its website at www.atkinsglobal.com/cr. A summary of the year's activities is included in the WS Atkins plc consolidated financial statements for the year ended 31 March 2014, which are available on the Group's website at www.atkinsglobal.com/investors.

Approved by the board of directors and signed on its behalf by:

H A Baker

Company Secretary

10 September 2014

ATKINS LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2014

The directors present their annual report on the affairs of Atkins Limited (the Company), together with the Financial Statements and the independent auditor's report, for the year ended 31 March 2014.

The directors of a company are required to prepare a strategic report about that company for each financial year, designed to inform shareholders and help them assess how the directors have performed their duty to promote the success of the company. Additionally the directors are required to prepare a directors' report containing certain disclosures, some of which may be included in the strategic report if they are considered to be of strategic importance. The following information has been included in the Strategic Report and is incorporated into this report by reference:

- review of the performance and future developments of the Company
- principal risks and uncertainties
- the amount (if any) that the directors recommend by way of a dividend

Financial instruments

Details on the use of financial instruments and financial risk management are included in note 2 to the Financial Statements.

Pensions

IAS 19 (revised 2011) – Valuation and Accounting Treatment

The Company determines pension scheme funding with reference to actuarial valuations. During the year the Company adopted and retrospectively applied IAS 19 (revised 2011). IAS 19 (revised 2011) and the related consequential amendments have had an impact on the reporting of the Group's defined benefit scheme by replacing the interest cost and expected return on plan assets with a net interest charge on the net defined benefit liability. In addition, the standard requires that unvested past service costs and administration costs be recognised immediately in the income statement, which has also had a small impact on the Group's defined benefit liability. The effect of this resulted in the net defined benefit obligations at 31 March 2013 being restated as £278.3m (previously £281.5m). As at 31 March 2014 the Company's retirement benefit obligations were £320.4m (2013 restated: £278.3m).

The assumptions used in the IAS 19 (revised 2011) valuation are detailed in note 23 to the Financial Statements.

Funding

Cash contributions of £32.0m (2013: £21.0m) were made to the Atkins Pension Plan (the Plan) during the year. Under the latest agreed recovery plan the Company will contribute £32m to the Plan for each of the two years ending 31 March 2015, with annual contributions then escalating by 2.5% each year until 31 March 2025.

There were no pension settlement or curtailment gains in 2014 but in the comparative year the Plan recognised a net settlement gain of £0.1m in respect of an enhanced transfer value (ETV) exercise for the year ended 31 March 2013. The Railways Pension Scheme recognised a curtailment gain during the 2013 financial year in respect of the two new benefit bases that came into effect for certain members from 1 January 2013.

The curtailment gain arose for members moving from the existing uncapped salary category or RPI capped salary category to the new CPI capped category. The reduction in the past service liability for this curtailment was £4.3m and this was recognised as a curtailment gain in the year ended 31 March 2013.

ATKINS LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2014 (CONTINUED)

Pensions (continued)

Charges

The total charge to the income statement in respect of defined benefit schemes was £14.2m (2013 restated: £10.5m), comprising service cost of £2.1m (2013 restated: £2.1m), administrative expenses of £0.2m (2013 restated: £0.2m), curtailment and settlement gains of £nil (2013: £4.4m) and a net interest expense of £11.9m (2013 restated: £12.6m). The charge relating to defined contribution schemes increased to £25.2m (2013: £24.2m).

Treasury policies and objectives

WS Atkins plc's (the ultimate parent company of Atkins Limited) Group Treasury function manages and monitors external funding and investment requirements and financial risks in support of the Group's corporate objectives. Details of the policies and procedures are set out in WS Atkins plc's consolidated financial statements for the year ended 31 March 2014. Details of the Company's financial risks and management policies are in note 2 of the Financial Statements.

Critical accounting policies

The Company's principal accounting policies are described in note 1 to the Financial Statements. The Financial Statements for the year ended 31 March 2014 have been prepared under International Financial Reporting Standards (IFRSs) as adopted by the European Union.

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting year. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results may ultimately differ from those estimates.

Material estimates applied across the Company's businesses and joint ventures are reviewed to a common standard and adjusted where appropriate to ensure that consistent treatment of similar and related issues that require judgement is achieved. Any revisions to estimates are recognised prospectively.

The accounting policies and areas that require the most significant estimates and judgements to be used in the preparation of the Financial Statements are in relation to contract accounting, including recoverability of receivables, and impairment of investments.

Contract accounting

The Company's contract accounting policy is central to how the Company values the work it has carried out in each financial year.

This policy requires forecasts to be made on the projected outcomes of projects. These forecasts require assessments and judgements to be made on changes in work scopes, changes in costs and costs to completion, for example. While the assumptions made are based on professional judgements, subsequent events may mean that estimates calculated prove to be inaccurate, with a consequent effect on the reported results.

Impairment of investments

Goodwill is subject to impairment review both annually and when there are indications that the carrying value may not be recoverable. The carrying value of goodwill is compared to the recoverable amount, which is the higher of value in use and fair value less costs to sell.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to a cash-generating unit (CGU), or groups of CGUs that is expected to benefit from the synergies of the combination. Each CGU or group of CGUs to which the goodwill is allocated represents the lowest level within the entity at which goodwill is monitored for internal management purposes.

Determining whether goodwill is impaired requires an estimation of the value in use of CGUs to which the goodwill has been allocated. The value in use calculation requires an estimate to be made of the timing and amount of future cash flows expected to arise from the CGU and the application of a suitable discount rate to calculate the present value. The discount rates used are based on the Group's weighted average cost of capital adjusted to reflect the specific economic environment of the relevant CGU.

ATKINS LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2014 (CONTINUED)

Critical accounting policies (continued)

Defined benefit pension schemes

Accounting for pensions involves judgement about uncertain events in the future such as inflation, salary levels at retirement, longevity rates, rates of return on plan assets and discount rates. Assumptions in respect of pensions and post-employment benefits are set after consultation with independent qualified actuaries. Management believes the assumptions are appropriate. However, a change in the assumptions used would have an impact on the Company's results and net assets. Any differences between the assumptions and the actual outcome will affect results in future years. An estimate of the sensitivity to changes in key assumptions is disclosed in note 23 to the Financial Statements.

Directors

The directors who served during the year and up to the date of signing these Financial Statements are included in the table below.

Indemnification of and insurance cover for directors and officers

Directors and officers of the Company benefit from directors' and officers' liability insurance cover in respect of legal actions brought against them. In addition, directors of the Company are indemnified in accordance with article 80 of the Company's articles of association to the maximum extent permitted by law. Neither the insurance nor the indemnities provide cover where the relevant director or officer has acted fraudulently or dishonestly.

Directors' remuneration

Directors' remuneration has been disclosed in note 5 to the Financial Statements.

Employees

Engagement

Ensuring our employees feel valued and positive at work underpins our ethos and supports our strategy for growth. We know there is always room for improvement, therefore, we ask our people what they think and then involve them in our plans for change.

Every year we ask our employees to participate in our Viewpoint employee engagement survey. The survey comprises a series of themed questions of strategic importance to Atkins, aligned to a pre-defined engagement model. This model measures our people's relationship with management, their jobs and the Company.

Group results were communicated via the world news centre of our Company wide intranet, with presentations of results by region/business unit arranged locally.

Day to day, the Group maintains regular communication with our employees through chief executive officer (CEO) letters, Group updates and information, project successes and stories about our people, which we make available via our Group wide intranet. Following the announcement of our financial results, we provide updates on our Group performance through an online presentation from our Group finance director and video interview with our Group CEO. We also make these available as a recorded telephone message and a written transcript.

ATKINS LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2014 (CONTINUED)

Employees (continued)

Our senior leadership teams hold meetings and open discussions to give employees the opportunity to ask questions about our strategy and future plans. Another popular communication channel is our CEO blogs, through which the Group's regional CEOs share informal thoughts, images and updates, and invite comments from employees.

Diversity

We are committed to building a diverse organisation to maximise the skills available to us in the geographies and markets in which we operate. Our policies have been adopted to ensure this commitment is implemented from the point of recruitment and continues throughout an individual's employment. Our people are supported to develop to their full potential regardless of sex, race, age, religion or belief, disability, sexual orientation, gender identity, marriage and civil partner status, pregnancy, parental obligations or background, subject to the laws of the jurisdictions in which we work.

The Company encourages recruitment, training, career development and promotion on the basis of aptitude and ability, without regard to disability. We are also committed to retaining and retraining as necessary employees who become disabled during the course of their employment.

Reward

Employee share ownership is encouraged across the Group to align the interests of our employees and our shareholders and to enable our employees to share in the success of the Company. In the UK, we operate a share incentive plan (SIP) that provides a tax-efficient mechanism for employees to become shareholders of WS Atkins plc. Approximately 12% of eligible employees participate in the SIP.

Political donations and expenditure

The Company made no political donations and incurred no political expenditure during the year ended 31 March 2014 (2013: £nil).

Share capital

Full details of the Company's issued share capital, including changes during the year, can be found in note 25 of these Financial Statements.

Directors' statement of responsibility

The directors are responsible for preparing the Directors' and Strategic Reports and the Financial Statements in accordance with applicable law and regulations.

Company law requires the directors to prepare Financial Statements for each financial year. The directors have prepared the Company's Financial Statements in accordance with applicable law and IFRSs as adopted by the European Union. In preparing these Financial Statements, the directors have also elected to comply with IFRSs issued by the International Accounting Standards Board (IASB). Under company law the directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing the Financial Statements, the directors are required to:

- select suitable accounting policies and then apply them consistently
- make judgements and accounting estimates that are reasonable and prudent
- state whether applicable International Financial Reporting Standards (IFRSs) as adopted by the European Union, and IFRSs as issued by the IASB, have been followed, subject to any material departures disclosed and explained in the financial statements
- prepare the Financial Statements on the going concern basis, unless it is inappropriate to presume that the Company will continue in business.

ATKINS LIMITED**DIRECTORS' REPORT
FOR THE YEAR ENDED 31 MARCH 2014 (CONTINUED)****Directors' statement of responsibility (continued)**

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and that enable them to ensure that the Directors' and Strategic Reports and Financial Statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Each of the directors, whose names are listed in this Annual Report and Financial Statements, confirms that, to the best of his/her knowledge:

- the Directors' Report contained in the Annual Report includes a fair review of the development and performance of the business and the position of the Company, together with a description of the principal risks and uncertainties that it faces
- the Company Financial Statements, which have been prepared in accordance with IFRSs as adopted by the European Union, give a true and fair view of the assets, liabilities, financial position and profit of the Company.

The Directors of the Company consider that the Annual Report and Accounts, taken as a whole, is fair, balanced and understandable, and that it provides the information necessary for shareholders to assess the Company's performance, business model and strategy.

Disclosure of audit information

The directors confirm that, as at the date this report was approved, so far as each director is aware, there is no relevant audit information of which the Company's auditor are unaware and that he or she has taken all the steps that he or she ought to have taken as a director in order to make himself or herself aware of any relevant audit information and to establish that the Company's auditor are aware of that information.

Going concern

The directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future and therefore continue to adopt the going concern basis in preparing the Financial Statements.

Approved by the board of directors and signed on its behalf by:

H A Baker
Company Secretary
10 September 2014

ATKINS LIMITED

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ATKINS LIMITED

Report on the financial statements

Our opinion

In our opinion the Financial Statements, defined below:

- give a true and fair view of the state of the Company's affairs as at 31 March 2014 and of its profit and cashflows for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards (IFRSs) as
- have been prepared in accordance with the requirements of the Companies Act 2006.

This opinion is to be read in the context of what we say in the remainder of this report.

What we have audited

The Financial Statements, which are prepared by Atkins Limited, comprise:

- the balance sheet as at 31 March 2014;
- the income statement and statement of comprehensive income for the year then ended;
- the statement of cash flows for the year then ended;
- the statement of changes in equity for the year then ended; and
- the notes to the Financial Statements, which include a summary of significant accounting policies and other explanatory information.

The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

In applying the financial reporting framework, the directors have made a number of subjective judgements, for example in respect of significant accounting estimates. In making such estimates, they have made assumptions and considered future events.

What an audit of financial statements involves

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) ("ISAs (UK & Ireland)"). An audit involves obtaining evidence about the amounts and disclosures in the Financial Statements sufficient to give reasonable assurance that the Financial Statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of:

- whether the accounting policies are appropriate to the Company's circumstances and have been consistently applied and adequately disclosed;
- the reasonableness of significant accounting estimates made by the directors; and
- the overall presentation of the Financial Statements.

In addition, we read all the financial and non-financial information in the Annual Report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on other matters prescribed by the Companies Act 2006

In our opinion the information given in the Strategic Report and the Directors' Report for the financial year for which the Financial Statements are prepared is consistent with the Financial Statements.

ATKINS LIMITED

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ATKINS LIMITED (CONTINUED)

Other matters on which we are required to report by exception

Adequacy of accounting records and information and explanations received

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the Financial Statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

Directors' remuneration

Under the Companies Act 2006 we are required to report to you if, in our opinion, certain disclosures of directors' remuneration specified by law are not made. We have no exceptions to report arising from this responsibility.

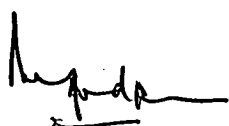

Responsibilities for the financial statements and the audit

Our responsibilities and those of the directors

As explained more fully in the directors' statement of responsibility (pages 6 and 7), the directors are responsible for the preparation of the Financial Statements and for being satisfied that they give a true and fair view.

Our responsibility is to audit and express an opinion on the Financial Statements in accordance with applicable law and ISAs (UK & Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

The notes on pages 14 to 63 are an integral part of these financial statements.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014

1 Accounting policies

Atkins Limited (the Company) is a private limited company incorporated and domiciled in England and Wales. The address of its registered office is Woodcote Grove, Ashley Road, Epsom, Surrey, KT18 5BW, England.

The principal accounting policies applied in the preparation of these Financial Statements are set out below. These policies have been consistently applied to all the years presented, including the application of new IFRSs and interpretations, unless otherwise stated.

Basis of preparation

The Financial Statements of the Company have been prepared in accordance with IFRSs as adopted by the European Union (EU), the Companies Act 2006 that applies to companies reporting under IFRS, and the IFRS Interpretations Committee standards (IFRS IC) applicable to companies reporting under IFRS. The Financial Statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, and financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Financial Statements, are disclosed under critical accounting policies on page 43 of the Business Review of the WS Atkins plc consolidated financial statements for the year ended 31 March 2014 as well as in the Directors' Report of the Company.

Changes in accounting policy and disclosure

New and amended standards adopted by the Company

The following standards have been adopted by the Company for the first time for the financial year beginning on 1 April 2013 and have a material impact on the Company:

IAS 19, *Employee benefits*, was revised in June 2011. The impact of the changes to the Company's accounting policies have been as follow: to replace the interest cost and expected return on plan assets with a net interest charge on the net defined benefit liability; to recognise immediately in the income statement unvested past service cost and administration costs; this also had a small impact on the Company's defined benefit liability. For the comparative year ended 31 March 2013, the restated profit after tax is £4.0m lower and other comprehensive expense is £4.4m lower than previously reported. The effect of this resulted in the net defined benefit obligation at 1 April 2012 being restated as £248.8m (previously £251.6m); and 31 March 2013 as £278.3m (previously £281.5m), see note 23. Comparative information has been restated for the effect of the retrospective application of the amendment to IAS 19 as disclosed in note 33.

The following standards have been adopted by the Company for the first time for the financial year beginning on 1 April 2013 and do not have a material impact on the Company:

Amendment to IAS 1, *Financial statement presentation regarding other comprehensive income*. The main change resulting from this amendment is a requirement for entities to group items presented in 'other comprehensive income' (OCI) on the basis of whether they are potentially reclassifiable to profit or loss subsequently (reclassification adjustments). This amendment has been applied retrospectively and the presentation of items of comprehensive income have been reclassified. There has been no measurable impact on the Financial Statements as a result of applying the amendments to IAS 1.

Amendment to IFRS 7, *Financial instruments: Disclosures*, on asset and liability offsetting. This amendment introduces new disclosures of information about the significance of financial instruments to an entity.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014

1 Accounting policies (continued)

IFRS 13, *Fair value measurement*. The objective of the standard is to define the term "fair value" and to establish guidance and disclosure requirements for fair value measurement that should be applied across standards. In the new standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between independent market participants at the measurement date. For non-financial assets, the fair value is determined based on the highest and best use of the asset as determined by a market participant. There has been no measurable impact on the Financial Statements as a result of applying IFRS 13.

Annual Improvement 2011. These Annual Improvements address six areas, none of which materially impacted the Company's primary statements.

New standards and interpretations not yet adopted by the Company

The following accounting standards, interpretations and amendments have been issued by the IASB but had either not been adopted by the European Union or were not yet effective in the European Union for the financial year beginning 1 April 2013:

- IFRS 9, *Financial Instruments*
- IFRS 11, *Joint Arrangements*
- IFRS 12, *Disclosure of Interests in Other Entities*
- IFRS 14, *Regulatory deferral accounts*
- IAS 27 (revised 2011), *Separate financial statements*
- IAS 28 (revised 2011), *Associates and joint ventures*
- IAS 36, *Impairment of Assets* on recoverable amount disclosures
- Amendments to the following standards:
 - IFRS 12 and IAS 27: *Investment Entities*
 - IFRS 11 and IFRS 12: *Transition Guidance*
 - IAS 19, *Employee Benefits: Defined Benefit Plans: Employee Contributions*
 - IAS 32, *Financial instruments: Presentation*
 - IAS 39, *Financial Instruments: Recognition and Measurement*

The Company is currently assessing the impact of the new standards, amendments and interpretations that are not yet effective. The Company does not currently believe adoption of these would have a material impact on the results or financial position of the Company.

Going concern

The directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future and therefore continue to adopt the going concern basis in preparing the Financial Statements.

Basis of consolidation

The Company is an indirect wholly-owned subsidiary of WS Atkins plc and is included in its consolidated financial statements which are publicly available. Consequently, the Company has taken advantage of the exemption from preparing consolidated financial statements under section 400 of the Companies Act 2006.

Employee benefit trusts

The accounts of the employee benefit trusts (EBTs) are incorporated into the results of the Company as, although they are administered by independent trustees and their assets are held separately from those of the Company, in practice, the Company's recommendations on how the assets are used for the benefit of employees are normally followed. The Company bears the major risks and rewards of the assets held by the EBTs until the shares vest unconditionally with the employees. Shares in WS Atkins plc held by the EBTs are shown as an increase in accumulated losses. Other assets and liabilities held by the EBTs are consolidated with the assets of the Company.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)****1 Accounting policies (continued)****Foreign currency transactions and translation*****Functional and presentation currency***

The financial statements are presented in pounds sterling (£), which is the Company's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

Revenue

Revenue from long term contracts comprises the value of work performed during the period calculated in accordance with the Company's policy for contract accounting set out below. Revenue from other contract activities represents fee income receivable in respect of services provided during the period.

Under certain services contracts, the Company manages customer expenditure and is obliged to purchase goods and services from third party contractors and recharge them to the customer at cost. The amounts charged by contractors and recharged to customers are excluded from revenue and cost of sales where the Company is acting solely as an agent. Receivables, payables and cash relating to these transactions are included in the balance sheet.

Revenue recognition and contract accounting

The value of contract work in progress comprises the costs incurred on contracts plus an appropriate proportion of overheads and attributable profit. Fees invoiced on account are deducted from the value of work in progress and the balance is separately disclosed in trade and other receivables as amounts recoverable on contracts, unless such fees exceed the value of the work in progress on any contract in which case the excess is separately disclosed in trade and other payables as fees invoiced in advance.

Revenue is recognised on the majority of the Company's contracts on a percentage completion basis when the outcome of a contract or project can be reasonably foreseen. Under the percentage completion method, the percentage of the total forecast revenue reported at any point in time is calculated based upon the proportion of total costs incurred to date as a percentage of total forecast costs or, in some cases, based upon the estimated physical per cent complete of the total work to be performed under the contract.

In some cases, a margin provision is then made, depending on how far progressed each project is and the risk profile of the project. Where contracts span two or more accounting periods, profit is not generally recognised until the contract is 50% complete. In addition, provision is made in full for estimated losses and, where the outcome of a contract cannot be reasonably foreseen, profit is taken on completion.

Revenue recognition on outsourcing contracts is determined by reference to the proportion of the annual service delivered to date. Where the costs of obligations in relation to the non-renewal or termination of a contract are higher in the final period of the contract, a proportion of revenue is deferred each period to meet these anticipated costs. Full provision is made for losses on outsourcing contracts if the forecast costs of fulfilling the contract throughout the contract period exceed the forecast income receivable. In assessing the amount of the loss to provide on an outsourcing contract, account is taken of the Company's share of the forecast results from any joint ventures which the contract is servicing.

Interest income

Interest income is recognised on a time apportionment basis using the effective interest method. When a receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)****1 Accounting policies (continued)*****Dividend income***

Dividend income is recognised when the right to receive payment is established.

Pre-contract costs

The Company accounts for all pre-contract costs in accordance with IAS 11, *Construction contracts*. Costs incurred before it becomes probable that a contract will be obtained are charged to expenses. Directly attributable costs incurred after that point are recognised in the balance sheet and charged to the income statement over the duration of the contract or, in the case of PPP/PFI concessions, over the same period as the Company's interest in any special purpose company (SPC) charges the equivalent capitalised amounts to the income statement.

Bid recovery fees are deferred and credited to the income statement over the duration of the contract or, in the case of PPP/PFI concessions, over the same period as the Company's interest in any SPC credits the equivalent capitalised amounts to the income statement. Where the Company's interest in any SPC reduces, the deferred bid recovery fees are credited to the income statement in proportion to the reduction of the Company's interest.

Exceptional items

Exceptional items are disclosed separately in the Financial Statements where it is necessary to do so to provide further understanding of the financial performance of the Company. They are items of income or expense that have been shown separately due to the significance of their nature or amount.

Retirement benefit schemes

The Company has both defined contribution and defined benefit pension plans.

A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

A defined benefit plan is a pension plan that typically defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

For the defined benefit plan, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the Balance Sheet with a charge or credit recognised in other comprehensive income in the period in which it occurs. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit pension costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements)
- net interest expense or income
- remeasurement.

The net retirement benefit liabilities recognised in the Balance Sheet represents the actual deficit in the Company's defined benefit plan.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)****1 Accounting policies (continued)****Retirement benefit schemes (continued)**

For defined contribution plans, the Company pays contributions into a separate entity. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expenses when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or reduction in the future payments is available.

Share-based payments

The Company operates a number of equity and cash settled share-based compensation plans, under which the entity receives services from employees as consideration for equity instruments (options) or cash (phantom allocations) of the Group.

In accordance with IFRS 2, *Share-based payments*, the cost of share-based payments awarded after 7 November 2002 is charged to the income statement over the performance and vesting periods of the instruments. The cost is based on the fair value of the awards made at the date of grant adjusted for the number of awards expected to vest. In accordance with the transitional provisions within IFRS 2, no charge is made in respect of instruments awarded before 7 November 2002. In the case of equity settled awards, the credits associated with the amounts charged to the income statement are included in retained earnings/accumulated losses until the awards are exercised. In the case of cash settled awards, the credits associated with the amounts charged to the income statement are held as a liability in the balance sheet until the awards are transferred, at which point a cash amount (based on the share price of WS Atkins plc at the vesting date) is paid to the employee. Where awards are settled by the new issue of shares, any proceeds received in respect of share options are credited to share capital and share premium in WS Atkins plc. Where awards are settled in shares held by the EBTs, any proceeds are credited to retained earnings/accumulated losses.

Income tax

Current and deferred income tax are recognised in the income statement for the period except where the taxation arises as a result of a transaction or event that is recognised in other comprehensive income or directly in equity. Income tax arising on transactions or events recognised in other comprehensive income or directly in equity is charged or credited to other comprehensive income or directly to equity respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Financial Statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

No deferred tax is recognised on the unremitted earnings of overseas subsidiaries, branches and joint ventures, except where it is known that the earnings will be distributed.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

1 Accounting policies (continued)

Intangible assets

Goodwill

Goodwill arises on the acquisition of a business and represents the excess of the fair value of the consideration given for a business over the Company's interest in the fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree.

Goodwill is stated at cost less impairment. Prior to 1 April 2004, goodwill was amortised over its estimated useful economic life. Amortisation ceased on 1 April 2004 and the carrying value of existing goodwill was frozen at that date and is subject to impairment reviews.

For the purpose of impairment testing, goodwill acquired in a business acquisition is allocated to each of the CGUs, or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, which is the higher of value in use and fair value less costs to sell. Any impairment is recognised immediately as an expense and is not subsequently reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill that arose prior to 1 April 1997 was written off to retained earnings/accumulated losses. Profit or loss on disposal of the underlying businesses to which this goodwill related will not include goodwill previously recorded as a deduction from equity.

Software licences

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring into use the specific software. These costs are amortised using the straight line method to allocate the cost of the software licences over their useful lives of between two and five years. Software licences are stated at cost less accumulated amortisation.

Corporate information systems

In accordance with IAS 38, *Intangible assets*, the Company's corporate information systems are treated as an intangible asset. Costs included are those directly attributable to the design, construction and testing of new systems (including major enhancements and internally generated costs) from the point of inception to the point of satisfactory completion where the probable future economic benefits arising from the investment can be assessed with reasonable certainty at the time the costs are incurred. Maintenance and minor modifications are expensed in the income statement as incurred. The corporate information systems recognised as assets are amortised using the straight line method to allocate the cost of the corporate information systems over their estimated useful life of six years. Corporate information systems are stated at cost less accumulated amortisation.

Property, plant and equipment

Property, plant and equipment is carried at cost less accumulated depreciation and impairment. Cost comprises purchase price after discounts and rebates plus all directly attributable costs of bringing the asset to working condition for its intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

1 Accounting policies (continued)

Property, plant and equipment (continued)

Freehold land is not depreciated. Depreciation on other assets is calculated using the straight line method to write off the cost less residual value of each asset over its estimated useful life, as follows:

Freehold buildings	- 10 to 50 years
Leasehold land and buildings	- over the life of the lease
Plant, machinery and vehicles	- 3 to 12 years

The assets' useful lives are reviewed, and adjusted if appropriate, at the end of each financial reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within administrative expenses in the income statement.

Impairment of non-financial assets

Assets that have an indefinite useful life, such as goodwill, are not subject to amortisation and are tested annually for impairment and when there are indications that the carrying value may not be recoverable. Assets that are subject to amortisation are reviewed for impairment wherever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash flows (CGUs). Prior impairments of non-financial assets (other than goodwill) are reviewed for possible reversal at each reporting date.

Investments in subsidiaries

Investments in subsidiaries, joint ventures and associates are stated at cost less impairments. Any impairment is charged to the income statement. Impairment testing for investments in subsidiaries is described above.

Financial assets

Classification

The Company classifies its financial assets into the following two categories: at fair value through profit or loss, and loans and receivables. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if expected to be settled within 12 months, otherwise they are classified as non-current.

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Company is the mid market price. These instruments are included in Level 1, see note 2.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2, see note 2.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)****1 Accounting policies (continued)*****Loans and receivables***

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets except where the maturity is greater than 12 months after the balance sheet date, in which case they are included as non-current assets. The Company's loans and receivables comprise trade and other receivables, and cash and cash equivalents.

Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade date - the date on which the Company commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets are derecognised when the right to receive cash flows from the investments has expired or has been transferred and the Company has transferred substantially all risks and rewards of ownership.

Trade receivables are recognised at original invoice amount less provision for impairment which, due to their short term nature, approximates to their fair value.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Impairment of financial assets***Assets carried at amortised cost***

The Company assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a loss event) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in payments, the probability that they will enter bankruptcy or financial reorganisation, and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Any impairment is charged to the income statement. Impairment testing for trade receivables is described below in the accounting policy paragraph relating to trade receivables. For other receivables carried at amortised cost, impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in the income statement.

Inventories

Inventories are stated at cost less impairment. Cost is determined using the first in, first out method.

Trade receivables

Trade receivables are amounts due from customers for services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognised at fair value. A provision for impairment of trade receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)****1 Accounting policies (continued)****Cash and cash equivalents**

Cash and cash equivalents include cash in hand, demand deposits and other short term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Derivative financial instruments and hedging activities

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument and, if so, the nature of the item being hedged. The Company designates certain derivatives as hedges of a particular risk associated with a recognised asset or liability or a highly probable forecast transaction (cash flow hedge).

The Company documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Company also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items.

The fair values of various derivative instruments used for hedging purposes are disclosed in note 21. The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in the income statement.

Amounts accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss (for example, when the forecast cash flow that is hedged takes place).

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast cash flow is ultimately recognised in the income statement. When a forecast cash flow is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

Lease obligations**Finance leases**

Lease arrangements that transfer substantially all the risks and rewards of ownership to the lessee are treated as finance leases. Assets held under finance leases are capitalised within property, plant and equipment at the lease's commencement and depreciated over the shorter of the lease term and the useful life of the asset. A liability is recognised for the present value of the minimum lease payments within current and/or non-current liabilities as appropriate. Rental payments are apportioned between capital and interest expense to achieve a constant rate of interest charge on the outstanding obligation.

Operating leases

Where the Company acts as lessee in an operating lease arrangement, the lease payments are charged as an expense to the income statement on a straight line basis over the lease term. Lease incentives received are also recognised on a straight line basis over the lease term.

Where the Company acts as lessor in an operating lease arrangement, rental income from operating leases is accounted for on a straight line basis over the period of the lease. Lease incentives provided are also recognised over the lease term on a straight line basis.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)****1 Accounting policies (continued)****Trade payables**

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognised at fair value.

Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Provisions for other liabilities and charges

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated.

Vacant property provisions are recognised when the Company has committed to a course of action that will result in the property becoming vacant. The provision is calculated based on projected discounted cash flows to the end of the lease, after making assumptions for void and rent free periods. The pre-tax rate used reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

Disposal groups held for sale

Disposal groups are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell.

2 Financial risk management**Financial risk factors**

The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk, and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. The Company uses derivative financial instruments to hedge certain risk exposures.

Risk management is carried out by a central treasury department (Group Treasury) under policies approved by the WS Atkins plc board of directors (the Board). Group Treasury identifies, evaluates and hedges financial risks in close cooperation with the Company's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and investment of excess liquidity.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

2 Financial risk management (continued)

Financial risk factors (continued)

These policies are further described within the 'Treasury policies and objectives' section of the Financial Performance Review on page 42 of the WS Atkins plc consolidated financial statements for the year ended 31 March 2014.

Where individual sensitivities are disclosed below, all other variables are held constant.

a) Market risk

Financial instruments affected by market risk include amounts due to fellow group undertakings, cash and derivative financial instruments. The following foreign exchange risk and interest rate risk analyses, required by IFRS 7, *Financial Instruments: Disclosures*, are intended to illustrate the sensitivity to changes in market variables, being primarily the US dollar to sterling exchange rates and UK interest rates.

The following assumptions were made in calculating the sensitivity analyses:

- changes in the carrying value of derivative financial instruments designated as hedges are fully effective with no impact on the income statement
- changes in the carrying value of other financial instruments not in hedging relationships only affect the income statement.

i) Foreign exchange risk

Foreign exchange risk arises from a small proportion of commercial transactions undertaken in currencies other than the local functional currency, and from financial assets and liabilities denominated in currencies other than the local functional currency.

Group policy is for each business to undertake commercial transactions in its own functional currency whenever possible. When this is not possible, the Group manages its foreign exchange risk from future commercial transactions using appropriate derivative contracts arranged via Group Treasury. Cash flows are reviewed on a monthly basis throughout the duration of projects and the future cover amended as appropriate.

Trade receivables and payables denominated in currencies other than the local functional currency arise from commercial transactions and are therefore largely hedged as part of the process described above. Remaining financial assets and liabilities denominated in currencies other than the local functional currency include bank accounts, and intercompany loans and funding balances. These are generally unhedged.

The Company's primary exposure to foreign exchange risk on unhedged financial instruments arises mainly in respect of movements between the US dollar (including dollar pegged currencies) and sterling.

At 31 March 2014, if sterling had strengthened by a reasonably possible change of 10% against the US dollar then post-tax profit for the year would have been lower by approximately £0.6m lower (2013: £0.1m lower) and equity would have been £0.6m lower (2013: £0.1m lower). If sterling had weakened by a reasonably possible change of 10% against the US dollar, post-tax profit for the year would have been higher by approximately £0.5m higher (2013: £0.1m higher) and equity would have been £0.5m higher (2013: £0.1m higher).

ii) Interest rate risk

The Company's exposure to interest rate risk arises from cash and intercompany loan balances. The majority of these items are at floating rates of interest; changes in the interest rate results in changes in interest-related cash flows. No interest hedging is currently undertaken by the Company. If interest rates for the year to 31 March 2014 had been 10 basis points higher/lower, then post-tax profit for the year would have been approximately £0.2m (2013: £0.1m) higher/lower.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

2 Financial risk management (continued)

iii) Price risk

Price risk is the risk that a decline in the value of assets adversely impacts the profitability of the Company.

The Company does not have any equity securities in its balance sheet and is not materially exposed to commodity price risk. Certain longer term project and framework contracts include indexation clauses that are applied to unit rates to offset the effect of inflation on input costs over the duration of the agreement. The Company is exposed to price risk to the extent that inflation differs from the index used and forecast project outcomes that form the basis of revenue recognition include an estimate of this risk where it is present.

b) Credit risk

Credit risk is the risk that the Company will suffer financial loss as a result of counterparties defaulting on their contractual obligations.

Credit risk arises from cash and cash equivalents, and derivative financial instruments as well as credit exposures to customers, including outstanding receivables and committed transactions, with the maximum exposure to the risk equivalent to 100% of the carrying value disclosed in the Company's balance sheet at 31 March. The Company does not hold any collateral as security. The Company's policy is that cash and investments should not be concentrated with any one counterparty.

For trade and other receivables, concentration of credit risk is very limited due to the Company's broad customer base. An assessment of credit quality of the customer is made where appropriate using a combination of external rating agencies, past experience and other factors. In circumstances where credit information is unavailable or poor, the risk is mitigated primarily by the use of advance payments resulting in positive cash flows. Exposure and payment performance are monitored closely both at individual project and client level, with a series of escalating debt recovery actions taken where necessary. In view of current economic circumstances, additional management attention remains focused on the recovery of debtors.

c) Liquidity risk

The Company funds its activities through cash generated from its operations, intercompany balances and, where necessary, bank borrowings and finance leases. The Company's banking facilities are part of a wider Group facility and include bank facilities and private placement debt. Cash flow forecasting is performed in the Company's operating units and aggregated by a central finance department. Group Treasury monitors rolling forecasts of the Company's liquidity requirements to ensure that the Company has sufficient cash to meet operational needs and to meet the Company's commitments as they fall due.

Any surplus cash is invested by Group Treasury in interest bearing current accounts, term deposits and money market deposits, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the forecasts mentioned above.

The table below analyses the Company's non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

	On demand or within 1 year £m	Between 1 and 2 years £m	Between 2 and 5 years £m	Over 5 years £m	Total £m
2014					
Finance leases	-	-	-	-	-
Trade payables	45.7	-	-	-	45.7
Amounts due to fellow group undertakings	139.9	-	-	-	139.9

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

2 Financial risk management (continued)

	On demand or within 1 year £m	Between 1 and 2 years £m	Between 2 and 5 years £m	Over 5 years £m	Total £m
2013					
Finance leases	1.7	1.5	2.1	0.4	5.7
Trade payables	48.6	-	-	-	48.6
Amounts due to fellow group undertakings	178.3	-	-	-	178.3

d) Concentrations of financial instruments

The carrying amounts of the Company's financial assets and liabilities, excluding derivative financial instruments, were denominated in the following currencies:

	Financial assets 2014 £m	Financial liabilities 2014 £m	Financial assets 2013 £m	Financial liabilities 2013 £m
Sterling	625.9	184.6	622.1	230.6
US dollar	6.9	0.8	16.9	0.8
Euro	0.2	0.2	2.7	0.5
Saudi Arabian riyal	2.6	-	4.1	-
Other	4.5	-	1.5	0.2
Total	640.1	185.6	647.3	232.1

Financial assets consist of trade receivables (net), intercompany receivables, amounts due from joint ventures and cash and cash equivalents.

Financial liabilities consist of trade payables, intercompany payables and borrowings.

Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for its shareholder and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The Company maintains or adjusts its capital structure through the payments of dividends to its shareholder and through its intercompany balances.

The Company monitors capital on the basis of the ratio of its net debt plus defined benefit pension deficit net of total deferred tax to adjusted earnings before interest, taxes, depreciation and amortisation (EBITDA). This policy is unchanged from the prior year.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

2 Financial risk management (continued)

Capital risk management (continued)

The ratios of net debt plus defined benefit pension deficit net of total deferred tax to adjusted EBITDA at 31 March 2014 and 2013 were as follows:

	2014	Restated 2013
	£m	£m
Total borrowings (note 19)	-	(5.2)
Less: cash and cash equivalents (note 18)	89.5	75.7
Net funds	89.5	70.5
Defined benefit pension deficit (note 23)	(320.4)	(278.3)
Net deferred tax (note 15)	77.7	78.7
Net deficit after defined benefit pension deficit net of total deferred tax	(153.2)	(129.1)
Profit before interest and tax	57.6	41.1
Add: depreciation (note 3)	5.9	6.9
Add: amortisation (note 3)	3.4	2.3
EBITDA	66.9	50.3
Less: exceptional item (note 8)	-	(4.3)
Adjusted EBITDA	66.9	46.0
Ratios of net funds plus defined benefit pension deficit net of total deferred tax to adjusted EBITDA	2.3	2.8

As detailed in note 1, during the year the Company adopted and retrospectively applied IAS 19 (revised 2011). As a result, profit before interest and tax, net defined benefit pension deficit and net deferred tax for the year ended 31 March 2013 have been restated. See notes 15, 23 and 33 for further details regarding the impact of the adoption of IAS 19 (revised 2011) on the Company.

Offsetting financial assets and financial liabilities

As at 31 March 2014

	Gross amounts of recognised financial assets/ (liabilities)	Gross amounts of recognised financial assets/ (liabilities) set off the balance sheet	Net amounts of financial assets/ (liabilities) presented in the balance sheet	Related amounts not set off in balance sheet		Net amount

Receipts under operating leases	(2.7)	(2.7)
Payments under operating leases	23.6	28.6

Services provided by the Company's auditors

During the year the Company obtained the following services from the Company's auditor:

	2014 £m	2013 £m
Statutory audit	0.4	0.4
Other services including tax advisory services and services relating to pensions	0.4	0.4
Total	0.8	0.8

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

4 Employee benefit costs

The monthly average number of full time equivalent people (including directors) employed by the Company during the financial year, split by activity amounted to:

	2014	2013
	Number	Number
Management and Administration	656	655
Technical	6,693	6,927
Total	7,349	7,582

Aggregate employee benefit costs of those people amounted to:

		2014	Restated 2013
	Note	£m	£m
Wages and salaries		346.8	346.4
Social security costs		36.9	36.6
Defined benefit current service cost	23	2.1	2.1
Settlement and curtailment gains	23	-	(4.3)
Charge for defined contribution schemes	23	25.2	24.2
Share based payment	26	5.6	4.6
		416.6	409.6

As detailed in note 1, during the year the Company adopted and retrospectively applied IAS 19 (revised 2011), which reduced the defined benefit current service cost. The cost for the year ended 31 March 2013 has been restated accordingly from £2.2m to £2.1m. See note 34 for further details regarding the impact of the adoption of IAS 19 (revised 2011) on the Company.

Wages and salaries for 2014 includes a net £0.4m credit to redundancy costs, due to an overaccrual of costs in the prior year in relation to the operational services business disposal (2013: £3.4m).

5 Directors' remuneration

The directors' aggregate emoluments in respect of their qualifying services were:

	2014	2013
	£m	£m
Salaries and other employee benefits	2.9	3.2
Post-employment benefits	0.2	0.1
Share based payments (note 26)	0.8	0.6
	3.9	3.9

Emoluments of the highest paid director:

	2014	2013
	£m	£m
Emoluments receivable	0.7	0.5

Key management comprises only the directors.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

5 Directors' remuneration (continued)

The current year bonus included in 'Salaries and other employee benefits' excludes the current year deferred share element which will be recognised within the share based payment charge in subsequent years following award (refer note 26).

The highest paid director exercised share options during the year and was granted share awards under a long-term incentive plan (LTIP).

Ten directors exercised options over shares in WS Atkins plc during the year to 31 March 2014 (2013: nine).

During the 2009 period, the principal defined benefit scheme was closed to future accrual of benefits and therefore none of the directors were accruing pension benefits under a defined benefit scheme (2013: nil). Ten directors received contributions to a money purchase scheme (2013: nine).

H S Drewett is a director of WS Atkins plc, the Company's ultimate parent company, and is also a director of a number of other subsidiary companies in the Group, as was A H Griffiths until his resignation on 30 July 2014. The services provided by these directors to this Company and to a number of other subsidiaries of the Group are of a non-executive nature, and their emoluments for services as directors of Atkins Limited in these financial statements are nil.

The emoluments and key management compensation of D A Lawson are borne by another Group company. D A Lawson is a director of a number of fellow Group undertakings and, therefore, it is not possible to make an accurate apportionment of his emoluments in respect of those undertakings.

6 Net finance costs

	2014	Restated 2013
	£m	£m
Interest payable on finance lease liabilities	-	0.3
Unwinding of discount (note 22)	0.1	0.1
Net finance costs on post-employment benefit liabilities (note 23)	11.9	12.6
Other finance costs	-	0.4
Finance costs	12.0	13.4
Interest receivable on short term deposits	(0.3)	(0.1)
Other finance income	(2.0)	(2.3)
Finance income	(2.3)	(2.4)
Net finance costs	9.7	11.0

As detailed in note 1, during the year the Company adopted and retrospectively applied IAS 19 (revised 2011), which increased net finance costs. Net finance costs on net post-employment benefit liabilities for the year ended 31 March 2013 have been restated accordingly from £7.5m to £12.6m; total net finance costs have been restated from £5.8m to £10.9m. See note 33 for further details regarding the impact of the adoption of IAS 19 (revised 2011) on the Company.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

7 Income tax (expense)/income

a) Analysis of charge in the year

	2014	Restated 2013
	£m	£m
Current income tax		
- Current year	(1.3)	(3.0)
- Adjustment in respect of prior year	(2.4)	(0.6)
Deferred income tax (note 15)	8.3	3.3
Income tax on profit per income statement	4.6	(0.3)
Profit before taxation per income statement	47.9	30.1
Effective income tax rate	9.6%	-1.0%

b) Factors affecting income tax rate

The income tax rate for the year is lower (2013: lower) than the standard rate of corporation tax in the UK of 23% (2013: 24%). The differences are explained below:

	2014	Restated 2013
	%	%
UK statutory income tax rate	23.0	24.0
Increase/(decrease) resulting from:		
Expenses not deductible for tax purposes	4.6	4.1
Adjustment in respect of prior periods	(6.7)	(12.7)
Effect of share-based payments	0.8	0.6
Loss relief claimed for nil payment	(5.8)	(9.1)
Effect of changes in tax rates	6.7	4.3
Research & development tax credits	(8.0)	(13.3)
Overseas tax	0.7	1.1
Losses not previously recognised for tax	(5.7)	-
Effective income tax rate	9.6	(1.0)

c) Income tax on components of other comprehensive income

	2014	Restated 2013
	Post-employment benefit liability	Post-employment benefit liability
	£m	£m
At 1 April	48.0	39.9
Deferred income tax	6.3	8.1
At 31 March	54.3	48.0

The restatement of the effective income tax rate and the underlying income tax rate for the year ended 31 March 2013 is due to the adoption and retrospective application by the Company of IAS19 (revised 2011). See note 33 for further details regarding the impact of the adoption of IAS19 (revised 2011) on the Company.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

8 Exceptional items

Exceptional items are disclosed separately on the face of the income statement and in the notes to the Financial Statements where it is necessary to do so to provide further understanding of the financial performance of the Company. They are items of income or expense that have been shown separately due to the significance of their nature or amount.

An analysis of the amount presented as an exceptional item in these Financial Statements is given below:

	2014	2013
	£m	£m
Curtailment gain relating to one-off pension events for the year ended 31 March 2013 (note 23)	-	4.3

The curtailment gain is included within administrative expenses in the Company's income statement.

9 Net profit on disposal of business

	2014	2013
	£m	£m
Profit/(loss) on disposal of business		
UK highways services	12.7	-
UK highways services transaction costs released/(incurred)	0.6	(3.8)
Net profit/(loss) on disposal	13.3	(3.8)

Net profit on disposal of business

UK highways services

On 27 February 2013 contracts were exchanged to dispose of the Company's highways services business, which formed part of its highways and transportation business, to Skanska Construction UK Limited (Skanska), a wholly owned subsidiary of Skanska AB. The business was sold for a cash consideration of £16.0m (subject to certain completion adjustments), together with a deferred conditional amount of £2.0m.

The profit on disposal before tax recognised at 31 March 2014 is shown below.

	2014
	£m
Net consideration received or receivable at date of disposal	
Initial cash consideration	16.0
Fair value of deferred consideration	-
Disposal consideration paid	16.0
Assets and liabilities at date of disposal	
Property, plant and equipment	5.1
Inventories	1.0
Borrowings	(4.8)
Net assets	1.3
Profit on disposal before costs	14.7
Disposal costs incurred	(2.0)
Profit on disposal	12.7

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

9 Net profit on disposal of business (continued)

At 31 March 2013, disposal costs of £3.8m were provided for, comprising transaction costs of £2.4m and restructuring costs of £1.4m. Following the conclusion of this transaction in 2014, £0.6m of the restructuring costs were not required and were subsequently released.

The disposal of the Company's highways services business is not reported as a discontinued operation at 31 March 2014 as it did not represent a major line of business.

10 Assets held for sale

Highways services

In the year ended 31 March 2013, the Company presented the assets and liabilities relating to the Company's UK highways services business, which formed part of its highways and transportation business, as held for sale following the exchange of contracts on 27 February 2013. The transaction completed on 4 October 2013 and the profit on disposal is shown in note 9.

Whilst the assets and liabilities of the highways services business represent a disposal group, the business was not reported as a discontinued operation at 31 March 2013 as it does not represent a major line of business.

The major classes of assets and liabilities of the disposal group in 2013 were as follows:

	2013 £m
Assets classified as held for sale:	
Property, plant and equipment (note 13)	5.0
Inventories (note 17)	0.8
Total assets of the disposal group	5.8
Liabilities directly associated with assets classified as held for sale:	
Borrowings (note 19)	(5.2)
Total liabilities of the disposal group	(5.2)
Total net assets of the disposal group	0.6

11 Goodwill

	2014 £m	2013 £m
Cost at 1 April	40.0	40.2
Completion adjustment	-	(0.2)
Cost at 31 March	40.0	40.0
Aggregate impairment at 1 April and 31 March	-	-
Net book value at 31 March	40.0	40.0

Impairment test for goodwill

Goodwill is not amortised but tested for impairment in accordance with IAS 36, *Impairment of assets*, at least annually or more frequently if events or changes in circumstances indicate a potential impairment.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

11 Goodwill (continued)

Goodwill is allocated to the Company's CGU, or group of CGUs, that management has identified in order to carry out impairment tests. The following is a summary of goodwill allocation by CGU or group of CGUs, summarised at the operating segment level:

	2014	2013
	£m	£m
UK	36.7	36.7
Energy	3.3	3.3
Total	40.0	40.0

For further information on each of the above segments, refer to the WS Atkins plc consolidated financial statements for the year ended 31 March 2014.

The impairment test involves comparing the carrying value of the CGU or group of CGUs to which goodwill has been allocated to their recoverable amount. The recoverable amount of all CGUs has been determined based on value in use calculations. An impairment loss is recognised immediately when the carrying value of those assets exceeds their recoverable amount.

Recoverable amount

Value in use calculations

Methodology

The internal value in use calculations use cash flow projections based on the following financial year's budget approved by the Board, which is based on past performance and management's expectations of market developments. The key assumptions in the budget relate to revenue and profit margins. Budgeted revenue is based on management's knowledge of actual results from prior years, along with the existing committed and contracted workload, as well as management's future expectations of the level of work available within the market. Profit margins are based on current margins being achieved in conjunction with economic conditions in the market or country of operation.

The cash flow projections from that budget are extrapolated for the next four years using an estimated growth rate of 2.4% and projected margin. As required by IAS 36, cash flows beyond the five year period are extrapolated based on the long term average growth rate for the primary country in which the CGU operates. The growth rates are derived from the International Monetary Fund's World Economic Outlook published Gross Domestic Product (GDP) growth rates. Projected margins reflect the historical and budgeted performance of the CGU. The projections do not include the impact of future restructuring projects to which the Company is not yet committed.

The cash flows have been discounted using the CGUs specific pre-tax discount rate of 11.7%. The discount rates have been calculated based on the WS Atkins plc Group's weighted average cost of capital using the capital asset pricing model to determine the cost of equity and risks specific to the CGU. The discount rates are revised annually using updated market information.

Assumptions

The growth rate and discount rate assumptions used for the internal value in use calculations are as follows:

	2014	2013
	£m	£m
Five year growth rate	2.4%	2.5%
Post five year growth rate	2.4%	2.7%
Pre-tax discount rate	11.7%	15.2%

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

11 Goodwill (continued)

Sensitivities

Goodwill of £36.7m (2013: £36.7m) allocated to the UK segment includes £18.6m of goodwill arising on the hive up of Atkins ABG Limited. This goodwill has been allocated to the defence group of CGUs and is considered significant in comparison with the Company's total carrying amount of goodwill. The recoverable amount of this group of CGUs has been determined using an internal value in use calculation. The key assumptions used for this calculation are as follows:

	2014	2013
	£m	£m
Five-year growth rate	2.4%	2.5%
Post five-year growth rate	2.4%	2.7%
Average pre-tax discount rate	11.7%	15.2%

As at 31 March 2014 and 2013, based on these internal valuations, the recoverable value of goodwill required no impairment.

12 Other intangible assets

	Corporate information systems £m	Software licences £m	Total £m
Cost at 1 April 2012	2.6	9.4	12.0
Additions	-	4.6	4.6
Disposals	(2.6)	(0.2)	(2.8)
Cost at 31 March 2013	-	13.8	13.8
Additions	-	2.9	2.9
Disposals	-	(1.9)	(1.9)
Cost at 31 March 2014	-	14.8	14.8
Accumulated amortisation at 1 April 2012	2.6	3.8	6.4
Amortisation charge for the year	-	2.3	2.3
Disposals	(2.6)	(0.1)	(2.7)
Accumulated amortisation at 31 March 2013	-	6.0	6.0
Amortisation charge for the year	-	3.4	3.4
Disposals	-	(1.8)	(1.8)
Accumulated amortisation at 31 March 2014	-	7.6	7.6
Net book value at 31 March 2014	-	7.2	7.2
Net book value at 31 March 2013	-	7.8	7.8

The amortisation charge for the year of £3.4m (2013: £2.3m) is included within administrative expenses in the income statement.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

13 Property, plant and equipment

	Freehold land and buildings £m	Leasehold land and buildings £m	Plant, machinery & vehicles £m	Total £m
Cost at 1 April 2012	11.8	18.6	30.0	60.4

Accumulated depreciation at 1 April 2012	7.6	13.4	16.8	37.8
Depreciation charge for the year	0.1	1.2	5.6	6.9
Disposals	-	(1.7)	(4.6)	(6.3)
Transferred to disposal group classified as held for sale (note 10)	-	(0.1)	(9.9)	(10.0)
Accumulated depreciation at 31 March 2013	7.7	12.8	7.9	28.4
Depreciation charge for the year	0.1	1.0	4.8	5.9
Disposals	-	(0.4)	(3.9)	(4.3)
Accumulated depreciation at 31 March 2014	7.8	13.4	8.8	30.0
Net book value at 31 March 2014	4.0	4.1	11.8	19.9
Net book value at 31 March 2013	4.1	4.5	9.7	18.3

The depreciation charge for the year of £5.9m (2013: £6.9m) is included within administrative expenses in the income statement.

The market value of freehold land and buildings is estimated at £10.4m (2013: £9.4m).

Included in plant, machinery and vehicles transferred to the disposal group classified as held for sale are equipment and vehicles used by the Company's highways services business that are held under finance leases as follows:

	2014 £m	2013 £m
Cost	-	12.7
Accumulated depreciation	-	(8.0)
Net book value	-	4.7

**NOTES TO THE FINANCIAL STATEMENTS

WS Atkins Employment Services Limited	England	100% ordinary	Dormant
WS Atkins Powertrack Limited	England	100% ordinary	Dormant
WS Atkins Property Services Limited	England	100% ordinary	Dormant

All of the subsidiaries listed above operate in the country of incorporation or registration.

The percentage of the share capital held by the Company is equivalent to the percentage voting rights held.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

14 Investments (continued)

The following represents the principal joint venture in which the Company participated during the year:

Joint Venture	Nature of business	Proportion of shares / interest held
VBA Joint Venture Limited	The delivery of a programme of work relating to water and environmental management for the Environment Agency (EA) under the WEM Framework Agreement and potentially also to other parties such as local authorities that have access to the framework.	15%

Proportion of shares held is in respect of ordinary share capital.

At 31 March 2014 the Company held the following investments in associates:

Associate	Country of incorporation or registration	Class and percentage holding	Nature of business
Atkins Planning & Management Consultants Limited	England	50% ordinary held jointly with WS Atkins plc	Dormant
Kins Developments Limited	England	49.9% ordinary held jointly with WS Atkins plc	Dormant
WS Atkins (No. 3 Trustees) Limited	England	50% ordinary held jointly with WS Atkins plc	Dormant

15 Deferred income tax assets

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same fiscal authority and there is a legally enforceable right to settle tax assets and liabilities on a net basis. The offset amounts are as follows:

	2014 £m	Restated 2013 £m
Deferred tax assets:		
- Deferred tax asset to be recovered after more than 12 months	76.6	78.6
- Deferred tax asset to be recovered within 12 months	1.1	0.1
Total deferred tax asset	77.7	78.7

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

a) Deferred tax assets

	2014 £m	Restated 2013 £m
Deferred tax asset on post-employment benefit liabilities	64.5	64.0
Accelerated depreciation	7.8	10.3
Share-based payments	4.5	3.7
Other temporary differences	0.9	0.7
Total deferred tax asset	77.7	78.7

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

15 Deferred income tax assets (continued)

b) Analysis of movements during the year

	2014	Restated 2013
	£m	£m
Deferred tax asset at 1 April of prior year	78.7	73.5
Deferred tax charged to the income statement (note 7)	(8.3)	(3.3)
Deferred tax credited to equity	7.3	8.5
Deferred tax asset at 31 March	77.7	78.7

The Finance Act 2013 enacted a reduction to the main rate of UK corporation tax to 21% from 1 April 2014 and 20% from 1 April 2015. As the Finance Act 2013 had been enacted as at the balance sheet date, the impact of these reductions have been reflected in the movements in deferred tax as at 31 March 2014. No further reductions to the UK corporation tax rate are proposed.

16 Trade and other receivables

	2014	2013
	£m	£m
Current assets:		
Trade receivables	161.7	158.9
Less: Provision for impairment of receivables	(2.7)	(1.9)
Trade receivables - net	159.0	157.0
Amounts recoverable on contracts	32.8	50.6
Other receivables	6.3	10.4
Prepayments and accrued income	6.0	6.0
Amounts due from fellow group undertakings	387.9	411.3
Amounts due from joint ventures	3.7	3.3
	595.7	638.6

The directors consider that the carrying amount of trade and other receivables approximates their fair value.

At 31 March 2014, £92.6m (2013: £101.6m) of trade receivables were within normal payment terms and considered to be fully performing. At 31 March 2014, £41.8m (2013: £41.4m) of trade receivables were past due and aged up to six months from invoice date but not impaired as they relate to a number of independent customers for whom there is no recent history of default.

Trade receivables aged beyond six months of invoice date totalled £27.3m (2013: £15.9m) and carried a provision for impairment of £2.7m (2013: £1.9m).

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

16 Trade and other receivables (continued)

Movements in the Company's provision for impairment of trade receivables were as follows:

	2014	2013
	£m	£m
Provision for impairment at beginning of year	(1.9)	(1.8)
Increase in provisions	(1.9)	(3.5)
Release of provisions	1.0	2.7
Net receivables written off as uncollectible	0.1	0.7
Provision for impairment at end of year	(2.7)	(1.9)

Amounts due from joint ventures are shown net of impairment of £nil (2013: £nil). The other classes within trade and other receivables do not contain impaired assets.

17 Inventories

	2014	2013
	£m	£m
Raw materials and consumables	-	0.2

The directors consider that the carrying amount of inventories approximates to their fair value. There were no amounts of inventories written off during the year (2013: £nil). In the prior year, inventories of £0.8m relating to the Company's highways services business were reclassified from inventories at 31 March 2013 and classified as an asset held for sale.

18 Cash and cash equivalents

	2014	2013
	£m	£m
Cash at bank and in hand	39.2	43.8
Short term bank deposits	50.3	31.9
	89.5	75.7

Included within cash at bank and in hand is £2.2m (2013: £0.1m) held by the Company's EBT.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

19 Borrowings

	2014	2013	2013	2013
	Total	Finance	Liabilities	
	£m	leases	held for sale	Total
		£m	(note 10)	£m
Current				
Finance leases	-	1.4	(1.4)	-
Non-current				
Finance leases	-	3.8	(3.8)	-

The maturity profile of the carrying amount of the non-current borrowings was as follows:

	2014	2013	2013	2013
	Total	Finance	Liabilities	
	£m	leases	held for sale	Total
		£m	(note 10)	£m
Repayable:				
Later than one year and no later than two years	-	1.3	(1.3)	-
Later than two years and no later than five years	-	2.1	(2.1)	-
Later than five years	-	0.4	(0.4)	-
	-	3.8	(3.8)	-

The carrying amount of all the Company's borrowings are denominated in pounds sterling.

The total present value of minimum lease payments under finance leases fall due as follows:

	2014	2013	2013	2013
	Total	Finance	Liabilities	
	£m	leases	held for sale	Total
		£m	(note 10)	£m
No later than one year	-	1.7	(1.7)	-
Later than one year but no later than five years	-	3.6	(3.6)	-
Later than five years	-	0.4	(0.4)	-
	-	5.7	(5.7)	-
Future finance charges on finance leases	-	(0.5)	0.5	-
Present value of finance lease payables	-	5.2	(5.2)	-

The directors consider that the carrying amount of current borrowings approximates their fair value.

Borrowing facilities

The Company's borrowing facilities are part of a wider Group facility. The Group has the following undrawn committed borrowing facilities available at 31 March expiring as follows:

	2014	2013
	£m	£m
Later than one year and no later than two years	-	113.3
Later than two years and no later than five years	141.5	-

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

19 Borrowings (continued)

All of the Group's undrawn committed borrowing facilities are subject to floating rates of interest.

On 10 October 2013 the Group entered into a new five year revolving credit facility (RCF). This facility matures in October 2018. The new arrangement provides the Group with an enlarged committed credit facility of £200m, and replaced the Group's previous £150m RCF and £30m bilateral facility. This larger facility provides the Group with increased and longer term financial capacity to support its strategy. The total letters of credit in issue under the committed facility at 31 March 2014 was £3.3m (31 March 2013: £6.9m).

The new facility includes four of the Group's existing lenders, Banc of America Securities Limited, Barclays Bank plc, HSBC Bank plc and National Westminster Bank plc, together with three new banks, The National Bank of Abu Dhabi, Abbey National Treasury Services plc and United Overseas Bank Limited.

The Group's borrowing facilities include a number of undertakings and financial covenants. Compliance with these covenants is monitored. As at 31 March 2014, and since, there have been no breaches (2013: none).

In the prior year, the Group raised \$75m through the successful execution of its debut issue in the US private placement market. The proceeds were used to repay drawn funds under the Group's existing banking facilities. The private placement is due for repayment on 31 May 2019 and carries a nominal interest rate of 4.38%.

20 Trade and other payables

	2014	2013
	£m	£m
Trade payables	45.7	48.6
Fees invoiced in advance	70.8	70.0
Social security and other taxation	33.1	37.3
Accruals and deferred income	56.9	72.2
Other payables	23.7	18.8
Amounts due to fellow group undertakings	139.9	178.3
	370.1	425.2

The directors consider that the carrying values of the Company's trade and other payables approximate their fair value.

21 Derivative financial instruments

The table below shows the fair value of forward currency contracts at the year end, based on their market value:

	2014		2013	
	Assets	Liabilities	Assets	Liabilities
	£m	£m	£m	£m
Current	0.4	(2.7)	0.5	(1.4)
Later than one year and no later than two years	-	(0.7)	0.3	(1.3)
Later than two years and no later than five years	-	(1.0)	-	-
Non-current	-	(1.7)	0.3	(1.3)
Total	0.4	(4.4)	0.8	(2.7)

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

21 Derivative financial instruments (continued)

The notional principal amounts of the outstanding foreign exchange contracts at 31 March 2014 and 2013 are as follows:

	2014		2013	
	Sell	Buy	Sell	Buy
	£m	£m	£m	£m
Forward contracts to purchase GBP, sell USD	1.0	(1.0)	12.7	(13.1)
Forward contracts to purchase GBP, sell EUR	7.0	(7.1)	5.6	(5.4)
Forward contracts to purchase GBP, sell Other	1.9	(1.9)	4.6	(4.7)
Forward contracts to purchase INR, sell GBP	33.0	(31.4)	28.8	(29.0)
Forward contracts to purchase INR, sell USD	13.5	(14.5)	-	-

The hedged highly probable forecast transactions denominated in foreign currency are expected to occur at various dates during the next 12 months. Gains and losses recognised in the hedging reserve in equity on forward foreign exchange contracts as at 31 March 2014 are recognised in the income statement in the period or periods during which the hedged forecast transaction affects the income statement. This is within 12 months of the end of the reporting year.

Derivatives are classified as a current asset or liability. The full fair value of a hedging derivative is classified as a non-current asset or liability if the remaining maturity of the hedged item is more than 12 months and, as a current asset or liability, if the maturity of the hedged item is less than 12 months.

The amounts disclosed in the table below are the contractual undiscounted cash flows of forward currency contracts at the year end.

	2014			2013		
	Inflow	Outflow	Net	Inflow	Outflow	Net
	£m	£m	£m	£m	£m	£m
Current	26.7	(29.1)	(2.4)	31.2	(32.1)	(0.9)
Later than one year and no later than two years	11.5	(12.1)	(0.6)	18.9	(19.9)	(1.0)
Later than two years and no later than five years	14.2	(15.1)	(0.9)	0.2	(0.2)	-
Non-current	25.7	(27.2)	(1.5)	19.1	(20.1)	(1.0)
Total	52.4	(56.3)	(3.9)	50.3	(52.2)	(1.9)

The Company used derivative instruments to hedge foreign currency receipts and payments on current contracts, as described in note 2. All of the Company's financial instruments are classified as Level 2 under amendments to IFRS 7, *Financial instruments: disclosures*. A Level 2 financial instrument is not traded in an active market and their fair value is determined by using valuation techniques. The fair value of forward foreign exchange contracts is determined using quoted forward exchange rates at the reporting date and yield curves derived from quoted interest rates matching the maturities of the foreign exchange contracts.

The Company has reviewed all contracts for embedded derivatives and does not have any such instruments that are closely related to the host contract.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

22 Provisions for other liabilities and charges

	2014	2013
	Vacant property	Vacant property
	£m	£m
Current	0.6	1.1
Later than one year and no later than two years	0.9	1.2
Later than two years and no later than five years	1.6	1.8
Later than five years	0.5	0.9
Non-current	3.0	3.9
Total	3.6	5.0

	Vacant property
	£m
Balance at 1 April 2013	5.0
Provisions charged to the income statement	1.5
Provisions released to the income statement	(1.5)
Provisions utilised	(1.5)
Unwinding of discount	0.1
Balance at 31 March 2014	3.6

The vacant property provision is discounted and is expected to be utilised over the next 12 years (2013: 13 years). No provision has been released or utilised for any purpose other than that for which it was established.

23 Post-employment benefit liabilities

	2014	Restated 2013
	£m	£m
Net retirement benefit liabilities	320.4	278.3

As detailed in note 1, during the year the Company adopted and retrospectively applied IAS 19 (revised 2011). IAS 19 (revised 2011) and the impact of the related consequential amendments on the accounting for the Company's defined benefit scheme has been to replace the interest cost and expected return on plan assets with a net interest charge on the net defined benefit liability. In addition, the standard requires that unvested past service cost and administration costs be recognised immediately in the income statement, which has also had a small impact on the Company's defined benefit liability. The effect of this resulted in the net defined benefit obligation at 1 April 2012 being restated as £248.8m (previously £251.6m); and 31 March 2013 as £278.3m (previously £281.5m). Comparative information has been restated for the effect of the retrospective application of the amendment to IAS 19 as disclosed in note 33.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)****23 Post-employment benefit liabilities (continued)****a) Net retirement benefit liabilities**

The Company, through trustees, operates a number of defined benefit and defined contribution pension schemes.

Defined contribution schemes are those where the Company's obligation is limited to the amount that it contributes to the scheme and the scheme members bear the investment and actuarial risks.

Defined benefit schemes are schemes other than defined contribution schemes where the Company's obligation is to provide specified benefits on retirement.

The two main defined benefit schemes are the Atkins Pension Plan (the Plan) and the Railways Pension Scheme, both of which are funded final salary schemes. The assets of both schemes are held in separate trustee-administered funds. Other pension schemes include a range of defined contribution schemes or equivalent.

The schemes operate under trust law and are managed and administered by trustees on behalf of the members in accordance with the terms of the trust deed and rules and relevant legislation. Defined benefit contributions are determined in consultation with the trustees, after taking actuarial advice. The trustees are responsible for establishing the investment strategy and ensuring that there are sufficient assets to meet the cost of current and future benefits.

The Plan is closed to the future accrual of benefit; all defined benefit members of the Plan were transferred to a defined contribution section for future service where it was clear they did not benefit from a statutory or contractual right to a final salary pension.

In 2012, the Company undertook an enhanced transfer value (ETV) exercise for deferred members of the Plan. The exercise gave rise to a settlement gain under IAS 19 in respect of those members who transferred out their benefits. The Plan recognised a net settlement gain of £0.1m in respect of the ETV exercise for the year ended 31 March 2013. This is to allow for the difference between the expected impact of the exercise already included in the 31 March 2012 disclosures and the actual impact of the exercise. The settlement gain of £0.1m is based on the transfer out of the Plan of a further £1.3m of assets and corresponding liabilities of £1.4m in respect of those members.

The Railways Pension Scheme invests in a range of pooled investment funds intended to generate a combination of capital growth and income and as determined by the trustee, taking account of the characteristics of the obligations and the trustee's attitude to risk. The majority of the Railways Pension Scheme's assets that are intended to generate additional returns, over the rate at which the obligations are expected to grow, are invested in a single pooled "growth" fund. This fund is invested in a wide range of asset classes and the fund manager RPMI has the discretion to vary the asset allocation to reflect its views on the relative attractiveness of different asset classes at any time. The remaining assets in the Railways Pension Scheme are principally fixed and index-linked bonds.

The Railways Pension Scheme recognised a curtailment gain in the year ended 31 March 2013 in respect of the two new benefit bases that came into effect for certain members from 1 January 2013. The curtailment gain arose for members moving from the existing uncapped salary category or retail price index (RPI) capped salary category to the new consumer price index (CPI) capped category. The reduction in the past service liability for this curtailment was £4.3m and this was recognised as a curtailment gain in the year ended 31 March 2013.

The defined benefit sections of all pension schemes are closed to new entrants, who are offered membership of the defined contribution section.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

23 Post-employment benefit liabilities (continued)

The main assumptions used for the IAS 19 valuation of the retirement benefit liabilities for the Plan and the Railways Pension Scheme are listed in the table below:

	2014	2013
Price inflation		
RPI	3.50%	3.40%
CPI	2.50%	2.40%
Rate of increase of pensions in payment		
Limited Price Indexation (RPI-based)	3.20%	3.10%
Limited Price Indexation (CPI-based)	2.50%	2.40%
Limited Price Indexation to 2.5%	2.50%	2.50%
Fixed	5.00%	5.00%
Rate of increase in salaries		
Atkins Pension Plan	5.00%	4.90%
Railways Pension Scheme (uncapped)	5.75%	5.65%
Railways Pension Scheme (RPI capped)	3.50%	3.40%
Railways Pension Scheme (CPI capped)	2.50%	2.40%
Rate of increase for deferred pensioners		
Atkins Pension Plan	3.50%	3.40%
Railways Pension Scheme	2.50%	2.40%
Discount rate	4.50%	4.60%
Longevity at age 65 for current pensioners		
Men	24.1 years	24.0 years
Women	26.3 years	25.9 years
Longevity at age 65 for future pensioners (current age 45)		
Men	26.3 years	26.2 years
Women	28.6 years	28.2 years

The actuarial tables used to calculate the retirement benefit liabilities for the Plan were the Self-Administered Pension Schemes (SAPS) tables, with medium cohort improvements from 2002 to 2009 and a scaling factor of 0.85/0.90 for males/females respectively. Future improvements are based on CMI improvements with a 1.5% per annum improvement trend, based on year of use application. The Railways Pension Scheme results have been adjusted on an approximate basis to be based on the same mortality tables.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

23 Post-employment benefit liabilities (continued)

The Company completed its last triennial valuation as at 31 March 2013 and is therefore due to complete its next triennial valuation as at 31 March 2016. The Company considers that the contribution rates set at the recent valuation date are sufficient to eliminate the deficit over the agreed period.

The nature of the funding regime in the UK creates uncertainty around the size and timing of cash that the Company will be required to pay to the pension schemes.

The Company has agreed that it will proceed with a new repayment plan that ends in March 2025, with one-off payments of £32m for each of the two years ending 31 March 2015, which escalate thereafter at 2.5% per annum.

The Company expects employer contributions to be paid during the financial year to 31 March 2015 to be around £34.9m, of which £32m is in relation to the funding of the actuarial deficit, and employee contributions paid to be around £1.5m. Expected benefit payments made directly by the Company to pensioners in the financial year to 31 March 2015 are £nil.

The approximate effect on the liabilities from changes in the main assumptions used to value the liabilities are as follows:

	Change in assumption	Effect on plan liabilities	
		Atkins Pension Plan	Railways Pension Scheme
Discount rate	increase/decrease 0.5%	decrease/increase 10.0%	decrease/increase 8.0%
Inflation	increase/decrease 0.5%	increase/decrease 5.0%	increase/decrease 8.0%
Real rate of increase in salaries	increase/decrease 0.5%	increase/decrease 2.0%	increase/decrease 1.0%
Longevity	increase 1 year	increase 3.0%	increase 2.0%

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting year) has been applied as when calculating the pension liability recognised within the Balance Sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year.

The effect of the change in inflation on liabilities assumes a corresponding change in salary increases and inflation-related pension increases.

b) Post-employment benefit liabilities - Risks

Through its defined benefit pension plans and other post-employment benefit liabilities, the Company is exposed to a number of investment and actuarial risks, the most significant of which are detailed below:

Asset volatility

The retirement benefit plan liabilities are calculated using a discount rate set with reference to corporate bond yields. If plan assets underperform this yield, this will create a deficit. The plans hold a significant proportion of equities, which are expected to outperform corporate bonds in the long-term while exposing the Company to greater volatility and valuation risk in the short-term. The government bonds represent investments in UK Government securities only.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

23 Post-employment benefit liabilities (continued)

b) Post-employment benefit liabilities - Risks (continued)

Life expectancy

The majority of the plans' obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plans' liabilities. This is particularly significant in the plans, where inflationary increases result in higher sensitivity to changes in life expectancy. The Atkins Pension Plan has had interest and inflation rate hedging in place for some time but, due to the relative immaturity of the longevity hedging market, to date the Company has held off implementing a longevity hedging programme. As a consequence, the Plan remains fully exposed to any future improvements in mortality beyond those already assumed by the Actuary.

Changes in bond yields

A decrease in corporate bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.

Inflation risk

Some of the Company's pension obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect the plan against extreme inflation). The majority of the plans' assets are either unaffected by fixed interest bonds or loosely correlated with equities inflation, meaning that an increase in inflation will also increase the deficit.

The Company does not use derivatives or hedging, other than interest and inflation rate hedging, to manage its risk. Investments are well diversified, such that the failure of any single investment would not have a material impact on the overall level of assets. A large portion of assets in 2014 consists of equities and bonds, although the Company also invests in property, cash and investment (hedge) funds. The Company believes that equities offer the best returns over the long term with an acceptable level of risk. The majority of equities are in a globally diversified portfolio of international blue chip entities. A breakdown of the major categories of plan assets as a percentage of total plan assets for the two schemes is detailed above.

Consideration for shares allotted in the year was £nil (2013: £nil).

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)****26 Share-based payments****Long Term Incentive Plans****WS Atkins plc Long Term Growth Unit plan (LGU) August 2012 onwards**

A share plan for senior executives where units are granted at a base price which is normally based on the six-month average share price calculated at the date of grant. The vesting of units occurs in three equal tranches on the fourth, fifth and sixth anniversaries of the date of grant. Vesting is subject to a strategic underpin which is considered by the remuneration committee of WS Atkins plc. On exercise, the value of each unit is equal to the increase, if any, in the average share price of one notional WS Atkins plc share between the grant date and the exercise date. Any such increase will normally be calculated using the six-month average share price. No more than 50% of a participant's total number of units subject to a single award may be exercised in any 12-month rolling period. The increase will usually be delivered in the form of a nil cost option, except in the US, where awards are granted as market value options and are scaled back on exercise to allow only the exercise of options equivalent to the gain that would have been made under a non-US award. The units will generally be settled in equity.

As a general rule, awards granted to participants who leave employment prior to vesting will be forfeited. In the event a participant leaves as a result of a qualifying reason, they receive a pro rata entitlement.

WS Atkins plc Long Term Incentive Plan (LTIP) August 2012 onwards

A share plan for senior executives used to grant awards that are settled in equity or, in limited circumstances, in cash. Subject to WS Atkins plc's real growth in absolute earnings per share (EPS) over the performance period. The growth target requires the increase to be more than 12% per annum in the three-year performance period to allow full vesting. If the increase is less than 5% per annum, there will be no vesting. If the increase is 5% per annum, vesting will be 25%, and a sliding scale operates between 5% and 12% per annum.

As a general rule, awards granted to participants who leave employment prior to vesting will be forfeited. In the event a participant leaves as a result of a qualifying reason, they receive a pro rata entitlement.

Subject to vesting, participants are entitled to receive the benefit of dividends declared following grant, without interest.

Atkins Long Term Incentive Plan (LTIP) September 2006 to July 2012

A share plan for senior executives and key employees used to grant awards to employees that are settled in equity or, in limited circumstances, in cash. There are different performance targets for different categories of management. Grants made to executive directors and senior employees have 50% of the grant subject to WS Atkins plc's total shareholder return (TSR) performance relative to the constituents of the FTSE 250 Index (excluding investment trusts) at the start of the performance period. Full vesting of this portion of the award will take place if WS Atkins plc is ranked in the upper quartile and 30% vesting will be achieved with a median ranking, with pro rata vesting for intermediate performance. No vesting will occur for a ranking below median.

The remaining 50% of the grant made to executive directors of WS Atkins plc and senior employees is subject to WS Atkins plc's real growth in underlying earnings per share (EPS) over the performance period. For the 2006 and subsequent grants, the growth target requires the increase to be more than 10% per annum above the UK RPI in the three-year performance period to allow full vesting. If the increase is less than 4% per annum above the UK RPI, then there will be no vesting. If the increase is 4% per annum above the UK RPI, vesting will be at 30%, and a sliding scale operates between 4% and 10% above the UK RPI.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2014 (continued)

26 Share-based payments (continued)

Long Term Incentive Plans (continued)

Awards granted to other participants are subject solely to the EPS condition. As a general rule, awards granted to participants who leave employment prior to vesting will be forfeited. In the event a participant leaves as a result of a qualifying reason, they receive a pro rata entitlement.

Subject to vesting, participants are entitled to receive the benefit of dividends declared following grant without interest.

Atkins Long Term Incentive Plan (LTIP) September 2003 to August 2006

A share plan for senior executives and key employees used to grant awards to employees that are settled in equity or, in limited circumstances, in cash. The performance condition was TSR with an EPS growth underpin measured over three financial years starting with the financial year beginning immediately after the award was granted. Full vesting of any award took place for a TSR performance where WS Atkins plc ranked in the top 20% in a group of up to 16 comparator companies, 30% vesting for median ranking and no vesting if TSR fell below the median. The EPS underpin was the UK RPI plus 2% per annum. As a general rule, awards granted to participants who left employment prior to vesting were forfeited. In the event a participant left as a result of a qualifying reason, they received a pro rata entitlement. All awards have now vested.

Deferred Share Plans

Atkins Deferred Bonus Plan (DBP)

A share plan for senior executives and key employees used to grant awards to employees that are settled in equity or, in limited circumstances, in cash. There is no performance condition but awards are restricted for at least three years from the date of grant. As a general rule, awards granted to participants who left employment prior to vesting were forfeited. In the event a participant left as a result of a qualifying reason, they received their award in full. Subject to vesting, participants are entitled to receive the benefit of dividends declared following grant without interest. All awards have now vested.

Atkins Deferred Share Plan (DSP)

A share plan for senior executives and key employees used to grant awards to employees that are settled in equity or in cash. There is no performance condition but awards are restricted for a set period from the date of grant, fixed by the remuneration committee of WS Atkins plc at grant. As a general rule, awards granted to participants who leave employment prior to vesting will be forfeited. In the event a participant leaves as a result of a qualifying reason, they will receive their award in full. Subject to vesting, participants are entitled to receive the benefit of dividends declared following grant without interest. Awards granted to executive directors of WS Atkins plc in relation to the executive bonus scheme are restricted for three years from the date of grant.

The Company's gross share-based payments charge for the year of £7.2m (2013: £6.7m) has been included in administrative expenses in the income statement.

The effect of the share-based payment transactions on the Company's result and financial position is as follows:

	2014	2013
	£m	£m
Total expense recognised for equity settled share-based payment transactions	6.7	6.5
Total expense recognised for cash settled share-based payment transactions	0.5	0.2
	7.2	6.7
Closing balance of liability for cash settled share-based payment transactions	0.8	0.4

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

26 Share-based payments (continued)

The Company administers share-based payments on behalf of employees of fellow subsidiaries and an amount of £1.6m (2013: £2.1m) was recharged in respect of this during the year.

As at 31 March 2014 WS Atkins plc had the following awards outstanding:

	LTIPs		LGU		DBP / DSP	
	Number	Weighted average exercise / transfer price	Number	Weighted average exercise / transfer price	Number	Weighted average exercise / transfer price
Awards outstanding at 1 April 2012	745,567	-	-	-	2,986,816	-
Granted	284,215	-	209,768	207.19p	1,215,077	-

On 24 June 2013 WS Atkins plc issued awards over 1,097,236 shares to employees under the DSP, 192,512 shares to employees under LTIP and 162,880 units to employees under the LGU.

On 21 November 2013 WS Atkins plc issued awards over 109,251 shares to employees under the DSP.

On 5 December 2013 WS Atkins plc issued awards over 16,181 shares to employees under the DSP.

At 31 March 2014 Atkins Limited's EBTs held a beneficial interest in 2,524,663 shares (2013: 2,831,737 shares) at a nominal value of £0.0m (2013: £0.0m) and market value of £35.1m (2013: £25.8m).

The weighted average fair value of awards granted during the year was 936.34 pence (2013: 689.36 pence).

The total fair value of awards granted during the year was £14.8m (2013: £10.3m).

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

26 Share based payments (continued)

Fair value of awards with market performance conditions

WS Atkins plc Long Term Growth Unit plan August 2012 onwards

The Black Scholes Model was used for the purposes of valuing LGU awards granted in the current year. The model calculated the fair value of awards granted, upon which the share-based payments charge is based. The assumptions used in the model are as follows:

	LGU 2014		
Exercise price (six-month average) at grant date	866.51p	866.51p	866.51p

28 Analysis of net funds

	At 31 March 2013 £m	Cash flow £m	At 31 March 2014 £m
Cash and cash equivalents	75.7	13.8	89.5
Finance leases	(5.2)	5.2	-
Net funds	70.5	19.0	89.5

29 Contingent liabilities

The Company has given indemnities in respect of overseas' office overdrafts, performance bonds, advance payment bonds, letters of credit and import duty guarantees issued on its behalf. The amount outstanding at 31 March 2014 includes £3.3m letters of credit issued as a result of the Group's acquisition of The PBSJ Corporation. The indemnities, which arose in the ordinary course of business, are not expected to result in any material financial loss. The Company has given a cross guarantee in respect of fellow subsidiaries overdraft facilities in the ordinary course of business.

As at 31 March 2014 the Company was a guarantor/obligor on the Group's £200m revolving credit facility (RCF), signed on 10 October 2013. This facility matures in October 2018 and replaced the Group's previous £150m RCF and £30m bilateral facility, of which the Company was a guarantor/obligor at 31 March 2013. As at 31 March 2014 the Company was also a guarantor/obligor on the Group's \$75m US private placement debt which is due for repayment on 31 May 2019. The Company is jointly and severally liable for any unpaid debts in connection with these facilities.

The Company is included in a Group Registration for Value Added Tax purposes and is, therefore, jointly and severally liable for all other Group undertakings' unpaid debts in this connection.

The Company has given indemnities in respect of performance and contractual-related bonds. The indemnities, which arose in the ordinary course of business, are not expected to result in any material financial loss. The Company has given a cross guarantee in respect of fellow subsidiaries' overdraft facilities in the ordinary course of business.

30 Operating lease arrangements

The Company leases various offices under operating lease arrangements. The leases have various terms, escalation clauses and renewal rights. The Company also leases vehicles, plant and equipment under operating lease arrangements.

At the end of the reporting year, the future aggregate minimum lease payments under non-cancellable operating leases are payable as follows:

	Property £m	2014 Vehicles, plant and equipment £m	Property £m	2013 Vehicles, plant and equipment £m
No later than one year	16.7	5.0	17.1	6.8
Later than one year and no later than five years	44.2	5.8	46.5	9.2
Later than five years	20.8	-	27.0	-
	81.7	10.8	90.6	16.0

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2014 (continued)**

30 Operating lease arrangements (continued)

In the prior year, vehicles, plant and equipment included future aggregate minimum lease payments under non-cancellable operating leases of £0.3m and £0.1m expiring no later than one year and later than one year but no later than five years respectively, relating to the Company's UK highways services business. This business was disclosed as an asset held for sale at 31 March 2013.

At the end of the reporting year, the future minimum leases payments under non-cancellable operating leases are receivable as follows:

	2014 Property £m	2013 Property £m
No later than one year	1.3	1.6
Later than one year and no later than five years	2.7	3.8
Later than five years	-	0.2
	4.0	5.6

31 Capital and other financial commitments

	2014 £m	2013 £m
Capital expenditure contracted for but not provided	5.5	2.8

32 Related party transactions

Details of the directors' emoluments are shown in note 5.

Transactions with the retirement benefit schemes are shown in note 23.

Details of the Company's subsidiaries and its joint ventures are shown in note 14.

Provision of goods and services to and purchases of goods and services from related parties were made at the rates charged to external customers. The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received. No provision has been made for doubtful debts in respect of amounts owed by related parties and £nil charged to income and expense (2013: £nil).

a) Sales and purchases of goods and services

	2014 £m	2013 £m

- fellow Group undertakings	139.9	178.3
	139.9	178.3

Key management comprises the directors.

33 Prior year amounts

During the year the Company adopted IAS 19 (revised 2011) which increased net finance costs in the Income Statement with a corresponding restatement of the actuarial movements in the Statement of Comprehensive Income. In addition, unvested past service cost and administration costs have been recognised immediately in the Income Statement, which has also had a small impact on the Company's defined benefit liabilities. The Income Statement, Statement of Comprehensive Income, Balance Sheet, Statement of Changes in Equity and notes for the year ended 31 March 2013 have been restated accordingly.

	As previously reported Year to 31 March 2013 £m	Effect of IAS 19 revised Year to 31 March 2013 £m	As restated Year to 31 March 2013 £m
Income Statement			
Operating profit	44.9	(0.1)	44.8
Profit before interest and tax	41.1	(0.1)	41
