1 Accounting policies

These abbreviated accounts have been prepared in accordance with the special provisions of Part VII of the Companies Act 2006 relating to small companies and the Financial Reporting Standard for Smaller Entities (effective April 2008) and have been prepared under the historical cost convention

The following principal accounting policies have been applied

Associates

An entity is treated as an associated undertaking where the group has a participating interest and exercises significant influence over its operating and financial policy decisions

Turnover

Turnover represents the supply of management consultancy services. Revenue is recognised when the relevant service has been performed. Any revenue which has not been invoiced is included as accrued income.

Depreciation

Depreciation is provided to write off the cost, less estimated residual values, of all tangible fixed assets evenly over their expected useful lives. It is calculated at the following rates:

Other fixed assets - 10%-20% on cost

Valuation of investments

Investments held as fixed assets are stated at cost less any provision for impairment. Investments held as current assets are stated at the lower of cost and net realisable value.

Foreign currency

Foreign currency transactions are translated into sterling at the rates ruling when they occurred. Foreign currency monetary assets and liabilities are translated at the rates ruling at the balance sheet date. Any differences are taken to the profit and loss account.

Taxation

The charge for taxation is based on the result for the year and takes into account deferred tax. Current tax is measured at the amount expected to be paid using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the balance sheet date, except that the recognition of deferred tax assets is limited to the extent that the company anticipates making sufficient taxable profits in the future to absorb the reversal of the underlying timing differences.

Deferred tax balances are not discounted.

These financial statements therefore present information about the company as an individual undertaking and not about its group.
