Notes to the abbreviated accounts

For the year ending 30 April 2011

1 Accounting policies

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008). Income is recognised as follows: - on property sales when there is an unconditional contract for sale and substantially all the risks and rewards have been transferred to the purchaser; -rents received prior to the period to which they relate are accounted for as deferred income and released to the period to which the rents relate. All fixed assets are initially recorded at cost. Investment properties are revalued annually at their open market value in accordance with FRSSE (effective April 2008). The surplus or deficit on revaluation is transferred to a revaluation reserve except where the deficit reduces the property below its historical cost, in which case it is taken to the profit and loss account. No depreciation is provided on investment properties which is a departure from the requirements of the Companies Act 2006. In the opinion of the directors these properties are held primarily for their investment potential and so their current value is of more significance than any measure of consumption and to depreciate them would not give a true and fair view. The provisions of the FRSSE (effective April 2008) in respect of investment properties have therefore been adopted in order to give a true and fair view. If this departure from the Act had not been made, the loss for the year would have been reduced by depreciation. However, the amount of depreciation cannot reasonably be quantified and the amount which might otherwise have been shown cannot be separately identified or quantified.

Turnover

Turnover represents amounts invoiced, net of value added tax, derived from the company's principal activity. Rental income is recognised over the term of the lease on a straight-line basis. The aggregate cost of incentives is deducted from the rental income and allocated to the profit and loss account over the lease term or to the next review date, whichever is shorter. Sales income and asset management fees are recognised when the financial risks and rewards are transferred.

Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives.
