# Statement of accounting policies for the year ended 30 September 2009

#### Basis of preparation

These financial statements have been prepared under the historical cost convention, on a going concern basis, have been consistently applied, in accordance with the Companies Act 2006 and in accordance with applicable United Kingdom accounting standards. A summary of the more important accounting policies is set out below.

#### Turnover

Turnover, which is exclusive of value added tax, comprises revenue earned on instalment credit agreements. Deferred revenue comprises the amount of gross revenue which is carried forward in customers' accounts receivable and is released on a 'rule of 78' basis over the term of the agreement. The interest rates are not high and the length of lease sufficiently short that the 'rule of 78' is a reasonable approximation.

#### Customers' accounts receivable

Customers' accounts receivable consist of amounts outstanding under instalment credit agreements including repayments not yet due at the year end, less appropriate provision for bad and doubtful debts based upon the individual assessment of accounts

#### **Taxation**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date

A net deferred tax asset is recognised as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits against which to recover carried forward tax losses and from which the future reversal of underlying timing differences can be deducted

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on an undiscounted basis
