### STRATEGIC REPORT FOR THE YEAR ENDED 30 JUNE 2014

---

We aim to present a balanced review of the company's performance and development during the year that is consistent with the size and nature of our business and that also covers the principal risks and uncertainties faced by the company.

#### BUSINESS REVIEW

The Directors are pleased that despite the continued backdrop of a very challenging market caused by uncertain economic conditions of recent year's together with the challenges of extreme weather conditions we have achieved a pleasing performance, showing continued profitable trading whilst having maintained our position within our sector.

We are confident that we are operating the correct programme of policies and continue to maintain and win new contracts in all areas of operations. The external commercial environment, although continuing to be difficult, is not expected to change significantly in the near future, we do remain cautiously optimistic and we take comfort from our new Group's financial strength.

The directors are confident that the company will continue trading to a similar level during 2014/15 and will remain profitable for the foreseeable future.

#### PRINCIPAL RISKS AND UNCERTAINTIES

The management of the business and the execution of the company's strategy are subject to a number of risks.

The key business risks affecting the company are considered to relate to maintaining the supermarket customer base, matching product supply to demand throughout the year, and increasing regulatory burden.

#### Financial risk management objectives and policies

The company uses various financial instruments including loans/overdrafts, cash and management of working capital in order to finance its operations. The Directors review and agree policies to manage the key risks envisaged in respect of each instrument, these policies remain unchanged from previous years.

**Liquidity Risk** - The company manages its liquidity risk by maintaining adequate reserves and bank facilities with its bankers Svenska Handelsbanken, monitoring cash flows and by matching maturity profiles of financial assets and liabilities within the bounds of its contractual obligations.

**Credit Risk** - The company's main financial assets are trade receivables and cash and bank balances. Those assets represent the company's main exposure to credit risk, which is a risk that a counterparty will fail to discharge its obligations, resulting in financial loss to the company. The company's principal ultimate customers are the major high street supermarkets, with this in mind the Directors believe that credit risk is both limited and mitigated.

**Foreign Currency Risk** - The majority of the company's trading activity is still conducted from within the UK. However the company undertakes hedging/forward currency contracts where appropriate to minimise the exchange rate exposure risk.

**Interest Rate Risk** - The company funded its operations for the year ended 30 June 2014 through a combination of retained profits and internally generated cash, asset-backed finance arrangements and banking facilities. Interest rate swap instruments would be utilised to mitigate this risk where appropriate.

Assets acquired by finance lease are depreciated over the shorter of the lease term and their useful lives. Assets acquired by hire purchase are depreciated over their useful lives. Finance leases are those where substantially all of the benefits and risks of ownership are assumed by the company. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the Profit and loss account so as to produce a constant periodic rate of charge on the net obligation outstanding in each period.

**1.6 Stocks**

Stocks are valued at the lower of cost and net realisable value after making due allowance for obsolete and slow-moving stocks. Cost includes all direct costs and an appropriate proportion of fixed and variable overheads.
