1. **ACCOUNTING POLICIES**

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents net invoiced sales of goods, excluding value added tax.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Plant and machinery etc	- 25% on reducing balance, at varying rates on cost and at variable rates on reducing balance
-------------------------	-----------------------------------------------------------------------------------------------

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Hire purchase and leasing commitments

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.

Equipment leased to customers

Assets leased to customers under agreements which transfer substantially all the risks and rewards associated with ownership other than legal title are classified as finance leases. The net investment in finance leases represents total minimum lease payments less gross earnings allocated to future periods. Income from finance leases, including benefits from declining tax rates, is credited to profit and loss account using actuarial after tax method to give constant periodic rate of return on the net cash investment. Assets leased to customers under agreements which do not transfer all the risks and rewards associated with ownership are classified as operating leases. The assets are capitalised in the balance sheet, depreciated over their useful estimated lives and the income from leasing is credited direct to profit and loss account.
