Incorporated and registered in England and Wales Registered No 992726

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2009

Principal activity

The principal activity of Prudential Pensions Limited (the Company) in the course of 2009 was the writing of long-term insurance business in the United Kingdom This activity will continue in 2010

Business review

The Company accepts reassurance from The Prudential Assurance Company Limited in respect of corporate pension schemes. In addition the Company sells direct investment only business to group pension schemes. All of the Company's products are unit-linked products. The profits from the Company's business accrue solely to shareholders.

The Company does not report against Key Performance Indicators in its Business Review This is because the Company is part of the wider Prudential plc Group and the Group's business is managed on a divisional basis by UK Insurance Operations Key Performance Indicators exist for the management of the division, of which this Company's business forms a part The divisional Key Performance Indicators can be found in the Annual Report of Prudential plc

Market review and strategy

The operations of the Company are managed as part of the UK Insurance Operations (UKIO) of the Prudential plc Group UKIO's long-term products consist of life insurance, pension products and pension annuities In 2009, it continued its strategy of selectively competing in areas of the retirement savings and income markets where it can generate attractive returns. The Company remains focused on maximising value from the opportunity afforded by the fast growing need for retirement solutions.

Risks & uncertainties

The Company is a wholly owned subsidiary of the Group, Prudential plc and as such forms a part of the overall risk management process of the Group. A significant part of the Group's business involves the managed acceptance of risk. The Group has a Risk Governance Framework requiring all businesses and functions within the Group i.e. including the Company, to establish processes for identifying, evaluating and managing key risks. The system of internal control is an essential and integral part of the risk management process. As part of the annual preparation of its business plan, all of the Group's businesses and functions are required to carry out a review of risks including an assessment of the impact and likelihood of key risks and effectiveness of the controls in place to manage them. The assessment is reviewed regularly throughout the year and all businesses and functions within the Group are required to confirm annually that they have undertaken risk management. Actual performance is regularly monitored against the business plans. Detailed procedures are laid down in financial and actuarial procedure manuals. The insurance operations of the Group, such as the Company, also prepare a financial condition report.

Further detail about the key risks and uncertainties affecting the Company is provided in the sections financial risk management, market risk, credit risk and liquidity risk in note 6 and in the financial statements of the immediate parent company, The Prudential Assurance Company Limited, and the ultimate parent company, Prudential plc

Performance and measurement

The results of the Company for the year as set out on pages 9 and 10 show a profit on ordinary activities before tax of £3,147,000 (2008 Profit £12,146,000)

The shareholders' funds of the Company total £23,286,000 (2008 £20,835,000)

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2009 (continued)

Corporate responsibility

The Company is a wholly owned subsidiary within the Prudential Group and corporate responsibility (CR) is a philosophy that is firmly embedded in Prudential's operations around the world as an integral part of how the organisation does business. The organisation strives to minimise the social, ethical and environmental impact of its activities and to maximise the opportunities. The importance of engaging with stakeholders and responding to their concerns is recognised. To do this the organisation maintains a regular dialogue and conducts periodic research on the issues that matter most to them.

In 2009, financial institutions came under continued scrutiny as a result of the market turmoil. Insurance companies are, however, fundamentally different from banks because they invest in assets for the long-term. During the financial turmoil the organisation played a significant role to help stabilise the market by providing liquidity during difficult times to the benefit of the whole economy.

Insurance companies have a unique role in society by helping people manage uncertainty and plan for a more secure future. In this way, the organisation's commercial value is linked to the social value of what is offered to its customers.

The approach to CR is underpinned by the organisation's founding values of integrity, security and prudence Throughout its 160-year history the organisation has been committed to helping its customers safeguard their financial security and protect their families. This, together with the contribution to the well-being of the communities in which the organisation operates, is as strong today as it has always been

The Group, of which the Company is a part, has developed a Group Governance Framework which is underpinned by a Group Governance Manual and associated processes. In late 2008, the CR framework was enhanced to further drive sustainability performance, provide greater focus to programmes and activities, and to enable a more consistent approach to reporting. The CR activities are framed around five core themes:

- 1 Insightful and transparent products meeting customer needs
- 2 Best people for the best performing business
- 3 Protecting the environment
- 4 Supporting local communities
- 5 Accountability and governance

While the Group sets the overall strategy for CR, the framework gives the Company the flexibility to implement programmes that best meets its markets. This recognises that the people on the ground are closest to their customers, and their communities, and know best how to meet their needs and expectations.

The Prudential plc Board discusses the Group's CR performance at least once a year and also reviews and approves the Group CR Report and strategy on an annual basis Below the Board, the Responsibility Committee comprises senior representatives from relevant Group functions and each of our core businesses, such as the Company This committee is responsible for monitoring the Group's CR activities and for raising issues that need to be addressed

Post balance sheet events

There have been no significant events affecting the Company since the balance sheet date

Accounts

The state of affairs of the Company at 31 December 2009 is shown in the balance sheet on page 12. The profit and loss account appears on pages 9 to 10.

Share Capital

There were no changes in the Company's share capital during 2009

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2009 (continued)

Dividend

No dividend is proposed for the year (2008 Nil)

Payment policy

The Company does not have any trade creditors and therefore codes or standards on payment practice and disclosure of trade creditor days are not applicable

Directors

The present directors of the Company are shown on page 3

Messrs M Thompson and I A Haasz resigned as directors of the Company on 30 November 2009 and 15 January 2010 respectively

Mr J Betteridge was appointed as a director of the Company on 16 December 2009

There were no other changes during the year

Financial risk management

The Company's objectives and policy in relation to the management of financial risk resulting from its financial assets and liabilities is to minimise any risk. The Company's exposure to financial risk through its financial assets and liabilities is not considered material to the assessment of the Company's assets, liabilities, financial position, and the profit and loss of the Company. The Company's exposure to financial risk is limited due to the matching of policyholder liabilities to attaching asset value movements for unit linked business.

Disclosure of information to auditor

The directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware, and each director has taken all the steps that he ought to have taken as a director to make himself aware of any relevant audit information and to establish that the Company's auditor is aware of that information. This confirmation is given and should be interpreted in accordance with the provisions of Section 418 of the Companies Act 2006.

Auditor

In accordance with Section 487(2) of the Companies Act 2006, KPMG Audit Plc will be deemed to be reappointed auditor of the Company for the current financial year

Directors' and Officers' Protection

Prudential plc has arranged appropriate insurance cover in respect of legal action against directors and senior managers of companies within the Prudential Group. In addition, the Articles of Association of the Company permit the directors, officers and employees of the Company to be indemnified in respect of habilities incurred as a result of their office.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE ANNUAL REPORT AND THE FINANCIAL STATEMENTS

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations

Company law requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice).

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to

- select suitable accounting policies and then apply them consistently,
- make judgements and estimates that are reasonable and prudent,
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements, and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF PRUDENTIAL PENSIONS LIMITED

We have audited the financial statements of Prudential Pensions Limited for the year ended 31 December 2009 set out on pages 9 to 30 The financial reporting framework that has been applied in their preparation is applicable law and UK Accounting Standards (UK Generally Accepted Accounting Practice)

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report, or for the opinions we have formed

Respective responsibilities of directors and auditors

As explained more fully in the Directors' Responsibilities Statement set out on page 7, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's (APB's) Ethical Standards for Auditors.

Scope of the audit of the financial statements

A description of the scope of an audit of financial statements is provided on the APB's web-site at www frc org uk/apb/scope/UKP

Opinion on financial statements

In our opinion the financial statements

- give a true and fair view of the state of the company's affairs as at 31 December 2009 and of its profit for the year then ended,
- have been properly prepared in accordance with UK Generally Accepted Accounting Practice, and
- have been prepared in accordance with the requirements of the Companies Act 2006

Opinion on other matters prescribed by the Companies Act 2006

In our opinion the information given in the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following

Under the Companies Act 2006 we are required to report to you if, in our opinion

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us, or
- the financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of directors' remuneration specified by law are not made, or
- we have not received all the information and explanations we require for our audit

D J Belsham Director

ACCOUNTING POLICIES

Change in accounting policies

The Company has implemented the following changes in preparing its results for the year ended 31 December 2009 These standards closely reflect the requirements of International Financial Reporting Standards (IFRS) and form part of the continuing convergence of IFRS in the UK

Amendments to FRS 29 - Improving Disclosures About Financial Instruments

In May 2009 the Accounting Standards Board (ASB) approved the 'Amendments to FRS 29 - Improving Disclosures About Financial Instruments', effective from 1 January 2009, which requires enhanced disclosures about fair value measurements and liquidity risk. The amendments include the introduction of a three-level hierarchy for fair value measurement disclosures and additional disclosures about the relative reliability of fair value measurements. This has been included in Note 6

Amendments to FRS 8 - Related Party Transactions

The amendments to FRS 8 'Related Party Transactions' became effective for the Company in 2009. The Company is required under the amendment to disclose any transactions with subsidiaries which are not wholly-owned. The Company did not have any disclosable transactions under this amendment

Additionally, in 2009, the Company also adopted the following new accounting pronouncements for which their adoption has no material impact on the financial statements of the Company

- Amendment on FRS 26 financial instruments eligible hedged items
- Amendments to UITF Abstract 42 and FRS 26 Embedded Derivatives Amendments to FRS 20 'Share-based Payment Vesting Conditions and Cancellations'
- Improvements to Financial Reporting Standards

(b) Basis of presentation

The financial statements are prepared in accordance with Part 15 of the Companies Act 2006 and Schedule 3 of The Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 The financial statements comply with applicable accounting standards and the ABI SORP, and have been prepared under the historical cost accounting rules, modified to include the revaluation of investments

The Company has taken advantage of the exemption under FRS1 (Revised) from preparing a cash flow statement. The Company has not presented a capital position statement with supporting disclosures under FRS 27 on the basis that the Company is more than 90 per cent owned within a group and the Company is included in the publicly available Prudential group financial statements which provide information on a group basis complying with this requirement

Going concern

The directors have a reasonable expectation that the Company will be able to continue in operational existence for the foreseeable future and thus continue to adopt the going concern basis of accounting in preparing the financial statements This conclusion has been based upon the following the Company is a subsidiary within the Prudential Group and it, its parent company and the ultimate parent company are continuing to trade and there are no plans for liquidation, the Company has a healthy solvency margin, well in excess of the regulatory capital resource requirement (Note 7 on page 26), generates positive cashflows and has very low debt-financing In addition consideration has also been given to the Company's performance, the market in which it operates, its strategy and risks and uncertainties, as set out in the Business Review on pages 4 and 5, the management of financial risk as set out in Note 6, including its exposure to liquidity risk and credit risk

Long term business (c)

Under FRS 26, the measurement basis of assets and liabilities of long term business contracts is dependent upon the classification of the contracts as either insurance contracts, if the level of insurance risk is significant, or investment contracts if the risk is insignificant. A further distinction is made between investment contracts with and without discretionary participation features Discretionary participation features represent the contractual right to receive additional benefits as a supplement to guaranteed benefits. The Company has no investment contracts with discretionary participating features. The Company's contracts are mainly unit-linked contracts which are investment contracts without discretionary participating features. Insurance contracts and investment contracts with discretionary participation features are accounted for under previously applied UK GAAP, as set out in the ABI SORP

ACCOUNTING POLICIES (continued)

(c) Long term business - continued

Investment contracts without discretionary participation features are accounted for as financial liabilities under FRS 26 and, where relevant the provisions of the ABI SORP in respect of the attaching investment management features of the contracts FRS 26 applies a different accounting treatment to these contracts than the previously applied UK GAAP primarily in respect of deferred acquisition costs, deferred income reserves, and provisions for future expenses commonly called "sterling reserves" (see below)

A further feature is that investment contracts without discretionary participation features are closer in nature to a deposit style arrangement between the investors and the Company Premiums and withdrawals for these contracts are recorded within the balance sheet as a movement on the investors' liability and the long-term business technical account reflects the fee income, expenses, and taxation on the contract. The provisions for investment contracts without discretionary participation features are included in Technical Provisions for Linked Liabilities in the balance sheet

Technical account treatment

For unit linked business, premiums are accounted for when the liabilities arising from the premiums are created Premiums exclude any taxes or duties based on premiums. Pensions annuity contracts that vest during the year are included in claims incurred and premium income at the annuity purchase price.

Claims paid include maturities, annuities, surrenders, and death. Maturity claims are accounted for on the policy maturity date. Annuity claims are accounted for when the annuity becomes due for payment. Surrenders are accounted for when paid and death claims when notified

Under FRS26, the accounting treatment for investment contracts without discretionary participation features reflects the deposit nature of the arrangement with premiums and claims reflected as deposits and withdrawals taken directly to the balance sheet as a movement on the investors liability with the long-term technical account reflecting fee income, expense, and taxation on these contracts

Sterling reserves are not permitted to be recognised under FRS26 for investment contracts

(d) Investments

Investment income and realised and unrealised gains in respect of long-term business are included in the long-term business technical account. Other investment income and realised gains and, except in respect of shareholder investments in subsidiaries, unrealised gains are included in the non-technical account.

Realised gains are determined as the difference between net proceeds on disposal and the purchase price. Movements in unrealised gains comprise the change in the value of investments held at the balance sheet date and the reversal of unrealised investment gains and losses recognised in earlier accounting periods in respect of investment disposals.

Under FRS26, upon initial recognition financial investments are recognised at fair value. Subsequently, the Company is permitted, subject to specific criteria, to designate its investments as either financial investments at fair value through profit and loss, financial investments held on an available-for-sale basis, financial investments held to maturity, or loans and receivables. The Company holds financial investments on the following bases.

(i) Financial investments at fair value through profit and loss – this comprises assets designated by management as fair value through profit and loss on inception and derivatives which deemed to be held for trading. These investments are valued at fair value with all changes thereon being recognised in the profit and loss account.

The Company uses bid prices to value its quoted financial investments. Actively traded investments without quoted prices are valued using external broker bid prices. If there is no active established market for an investment, the Company applies an appropriate valuation technique such as discounted cash flow technique.

ACCOUNTING POLICIES (continued)

(d) Investments - continued

(ii) Loans and receivables – this comprises investments that have fixed or determinable payments and are not designated as fair value through profit and loss or available-for-sale. These investments include loans secured by mortgages, deposits and loans to policyholders and other unsecured loans and receivables. These investments are carried at amortised cost using the effective interest method and subject to impairment reviews. The Company measures the amount of the impairment loss by comparing the amortised cost with the present value of its estimated future cash flows discounted at the original effective interest rate.

Properties are valued annually by professional external valuers at market value as defined in the Appraisal and Valuation Manual issued by the Royal Institute of Chartered Surveyors in particular Practice statement 3.2. In accordance with SSAP 19, no depreciation is provided on investment properties as the directors consider that to depreciate them would not give a true and fair view

(e) Long term business provision

The long term business provision is determined by the Company's directors based on advice from the Company's actuarial function holder, who determined the provision using recognised actuarial methods, with due regard to the actuarial principles laid down in Directive 2002/83/EC. It is calculated initially on a statutory solvency basis to comply with the reporting requirements under the Financial Services and Markets Act 2000. The valuation is then modified to remove certain resilience, contingency and other reserves required by the Prudential Sourcebook issued by the Financial Services Authority.

(f) Reinsurance

In the normal course of business the Company seeks to reduce loss exposure by reinsuring certain levels of risk in various areas of exposure with other insurance companies or reinsurers. An asset or liability is recognised in the balance sheet representing premiums due to or payments due from reinsurers and the share of benefits and claims recoverable from reinsurers. The measurement of reinsurance assets is consistent with the measurement of the underlying direct insurance contracts

(g) Allocation of surpluses

Surpluses arising from linked long term business, as a result of the annual investigation of the long term business, are carried forward to the profit and loss account

(h) Tax

Tax is charged on all taxable profits arising in the accounting period. Except where otherwise required by accounting standards, full provision for deferred tax without discounting is made for all timing differences which have arisen but not reversed at the balance sheet date, in compliance with Financial Reporting Standard 19 (FRS 19)

(i) Cash flow statement

The Company has taken advantage of the exemption under FRS 1 (Revised) from preparing a cash flow statement

(j) Foreign currencies

Foreign currency assets and habilities are translated at year end exchange rates. Foreign currency revenue transactions are translated at rates ruling at the transaction dates, except for accrued revenue items that are translated at year end exchange rates.

NOTES ON THE FINANCIAL STATEMENTS

1. Segmental analysis

(a) Gross Premiums

Premiums comprise corporate pension business. For premiums in respect of corporate pension business investment risk is borne by policyholders and transacted within the UK. All direct single and regular premiums are group pension business. Premiums for 2009 and 2008 are nil as all business is investment contracts without discretionary participation features and are deposit accounted, as described in the accounting policies part (c)

	2009 £000	2008 £000
Regular premiums – direct, pensions	544	848
New Business		
Single premiums - direct pensions external reinsurance - intragroup reassurance accepted, pensions	699,821 33,568 647,247	1,027,028 18,928 708,786 1,754,742

New business premiums include those contracts excluded from premium income in the technical account under FRS26 and the ABI SORP (as amended in December 2006) These are investment contracts without discretionary participation features and carry no significant insurance risk

The annualised gross value of new regular premiums is £Nil (2008 £Nil) All new business premiums are in respect of investment linked contracts

(b) Assets attributable to the long term business fund

Of the total amount of assets shown on page 12, £9,308,219,000 (2008 £7,618,520,000) is attributable to the long term business fund

NOTES ON THE FINANCIAL STATEMENTS (continued)

3. Tax on profit on ordinary activities (continued)

(b) Factors affecting tax charge for period

The tax charge in the period is lower than the effective rate of corporation tax in the UK and the differences are explained below

The standard rate of tax has been determined by using the UK rate of corporation tax in force for the period for which the profits of the company will be taxed. The rate of corporation tax in the UK fell to 28% with effect from 1 April 2008. The effective rate applying for the year to 31 December 2008 is therefore 28.5% and 31 December 2009.28%

	2009 £000	2008 £000
Profit on ordinary activities before tax	3,147	12,146
Profit on ordinary activities multiplied by effective rate of corporation tax in the UK of 28% (2008 28 5%)	881	3,462
Effects of Permanent differences	15	(32)
Deferred tax recognised in period	(3,562)	(1,255)
Adjustments to current tax in respect of previous periods	63	(642)
Current tax charge for the period	(2,603)	1,533
(c) Balance sheet		
	2009 £000	2008 £000
Provision for Deferred Tax Policy reserves	7,994	4,695
Undiscounted provision for deferred tax liability	7,994	4,695
Deferred tax liability at start of the period	4,695	3,440
Deferred tax charged in technical/non-technical account for the period	3,299	1,255
Deferred tax liability at the end of period	7,994	4,695

4. Auditors' remuneration

The remuneration of the auditors in respect of the audit of the Company's accounts amounted to £60,000 (2008 total audit fee £50,007) The remuneration of the auditors in respect of other services pursuant to legislation, including the audit of the regulatory return amounted to £7,500 (2008 £8,000)

NOTES ON THE FINANCIAL STATEMENTS (continued)

5. Directors' emoluments and staff costs

During the year the directors of the Company received the following emoluments in respect of work on behalf of the Company

	2009 £000	2008 £000
Aggregate emoluments and benefits	11	11

Retirement benefits are accruing for the directors under the Group's defined benefit scheme. The Company has no employees (2008 Nil). Included within net operating expenses are amounts paid in return for management services provided to the Company by other group companies.

(ii) Determination of fair value

The fair values of the financial assets and liabilities as shown in the table above have been determined on the following bases

The fair values of the financial instruments for which fair valuation is required under UK GAAP are determined by the use of current market bid prices for quoted investments, or by using quotations from independent third-parties, such as brokers and pricing services or by using appropriate valuation techniques. Investments valued using valuation techniques include financial investments which by their nature do not have an externally quoted price based on regular trades and financial investments for which markets are no longer active as a result of market conditions e.g. market illiquidity. The valuation techniques used include comparison to recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option adjusted spread models and, if applicable, enterprise valuation. These techniques may include a number of assumptions relating to variables such as credit risk and interest rates. Changes in assumptions relating to these variables could positively or negatively impact the reported fair value of these instruments. When determining the inputs into the valuation techniques used priority is given to publicly available prices from independent sources, when available but overall, the source of pricing is chosen with the objective of arriving at a fair value measurement which reflects the price at which an orderly transaction would take place between market participants on the measurement date

The fair value estimates are made at a specific point in time, based upon available market information and judgements about the financial instruments, including estimates of the timing and amount of expected future cash flows and the credit standing of counterparties. Such estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument, nor do they consider the tax impact of the realisation of unrealised gains or losses from selling the financial instrument being fair valued. In some cases, the fair value estimates cannot be substantiated by comparison to independent markets, nor can the disclosed value be realised in immediate settlement of the financial instrument.

NOTES ON THE FINANCIAL STATEMENTS (continued)

6 Investments (continued)

(ii) Determination of fair value - continued

The loans and receivables have been shown net of provisions for impairment. The fair value of loans has been estimated from discounted cash flows expected to be received. The rate of discount used was the market rate of interest.

The estimated fair value of derivative financial instruments reflects the estimated amount the Group would receive or pay in an arm's length transaction. This amount is determined using quoted prices if exchange listed, quotations from independent third-parties or valued internally using standard market practices.

The fair value of borrowings is based on quoted market prices, where available

The fair value of other financial liabilities is determined using discounted cash flows of the amounts expected to be paid

Level 1, 2 and 3 fair value measurement hierarchy of financial instruments

In May 2009 FRS 29 'Financial Instruments Disclosures' was amended by the ASB to require certain additional disclosures to be included in the financial statements. This includes, as is presented below, a table of financial instruments carried at fair value analysed by level of the FRS29 defined fair value hierarchy. This hierarchy is based on the inputs to the fair value measurement and reflects the lowest level input that is significant to that measurement FRS29 does not require comparatives to be provided in the year of adoption.

The classification criteria and its application to the Company can be summarised as follows

Level 1 - quoted prices (unadjusted) in active markets for identical assets and habilities

Level I principally includes exchange listed equities, mutual funds with quoted prices, exchange traded derivatives such as futures and options, and national government bonds unless there is evidence that trading in a given instrument is so infrequent that the market could not possibly be considered active. It also includes other financial instruments where there is clear evidence that the year end valuation is based on a traded price in an active market.

Level 2 - inputs other than quoted prices included within level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 2 principally includes corporate bonds and other non-national government debt securities which are valued using observable inputs, together with over-the-counter derivatives such as forward exchange contracts and non-quoted investment fund valued with observable inputs. It also includes investment contract liabilities that are valued using observable inputs.

In addition level 2 can include debt securities that are valued internally using standard market practices. None of the level 2 debt securities are valued internally in the current year. The company's usual policy for valuing such securities is to use matrix pricing, which is based on assessing the credit quality of the underlying borrower to derive a suitable discount rate relative to government securities. Under matrix pricing, the debt securities are priced taking the credit spreads on comparable quoted public debt securities and applying these to the equivalent debt instruments factoring a specified liquidity premium. The significance of the parameters used in this valuation technique are readily observable in the market and, therefore, are not subject to interpretation.

Level 3: Significant inputs for the asset or liability that are not based on observable market data (unobservable inputs)

Level 3 principally includes investments in private equity funds, investments in property funds which are exposed to bespoke properties or risks, investments which are internally valued or subject to a significant number of unobservable assumptions and certain derivatives which are bespoke or long dated. It also includes debt securities which are rarely traded or traded only in privately negotiated transactions and hence where it is difficult to assert that these have been based on observable market data. The inherent nature of the vast majority of these assets means that, in normal market conditions, there is unlikely to be significant change in the specific underlying assets classified as level 3.

NOTES ON THE FINANCIAL STATEMENTS (continued)

Unit-linked							
Debt securities	3,339	(202)	-	-	-	(3,137)	-

Transfers between level 1 and level 2

There have been no significant transfers between level 1 and level 2 during the year

B. Market Risk

The financial assets and liabilities attaching to the Company's life assurance business are, to varying degrees, subject to market risk that may have a material effect on the profit or loss and equity

Market risk is the risk that the fair value or future cash flows of a financial instrument or, in the case of liabilities of insurance contracts, their carrying value will fluctuate because of changes in market prices

Market risk comprises four types of risk, namely

- · Interest rate risk due to changes in market interest rates,
- Liquidity risk inability to meet payment of obligations in a timely manner at a reasonable cost or the risk of
 unexpected increases in the cost of funding the portfolio at appropriate maturities or rates
- · Currency risk due to changes in foreign exchange rates, and
- Other price risk due to fluctuations in market prices (other than those arising from interest rate risk or currency risk)

Due to the matching of policyholders liabilities to attaching asset value movements the unit-linked business is not directly affected by market risk. The principal factor affecting the results is investment performance through fund management fees.

NOTES ON THE FINANCIAL STATEMENTS (continued)

6. Investments (continued)

(i) Interest rate risk

2009

The following table shows an analysis of the classes of financial assets with direct exposure to interest rate risk. Each applicable class of the Company's assets or habilities are analysed between those exposed to fair value interest rate risk, cash-flow interest rate risk and those with no direct interest rate risk exposure. Interest rate risk is minimal for the shareholder assets as the deposits are all less than one month, whereas for the unit-linked assets the risk is borne by the policyholders.

NOTES ON THE FINANCIAL STATEMENTS (continued)

6. Investments (continued)

C Credit Risk

(1) Currency risk and geographical concentration

All the financial assets are denominated in pounds sterling and none are exposed to credit risk outside the United Kingdom

(ii) Concentration of credit risk

The following table summarises by rating the securities held by the Company as at 31 December 2009 and 2008

	2009 £000	2008 £000
AAA	11,824	2,050
AA	-	2,000
A+	_	6,000
A	8,000	22,000
A-	28,500	7,000
	48,324	39,050
Unit-linked	8,203,783	6,913,070
Total assets bearing credit risk	8,252,107	6,952,120

There is minimal credit risk for the Company on the Unit linked contracts as the risks are borne by the policyholders

Securities lending and reverse repurchase agreements

At 31 December 2009, the Company had entered into reverse repurchase transactions under which it purchased securities and had taken on the obligation to resell the securities for the purchase price, £51m (2008 £nil), together with accrued interest

D. Risk management

The Company's business involves the acceptance and management of risk. The Company has in place a risk management process, which is undertaken in accordance with the Group Risk Framework adopted by the Prudential Group in 1999.

A number of risk factors affect the Company's operating results and financial condition. The financial risk factors affecting the Company include the effects of market risk, credit risk and liquidity risk on the financial instruments of the Company.

The Company's investment guidelines allow the use of derivatives to facilitate efficient portfolio management or to reduce investment risk

It is the Company's policy that cash or corresponding assets cover amounts at risk through derivative transactions. Derivative financial instruments used to facilitate efficient portfolio management and for investment purposes are carried at fair value with changes in fair value included in the profit and loss account. The Company does not apply hedge accounting to its derivatives.

For unit linked insurance and investment contracts, the liability to policyholders is determined by the value of the assets in the unit-linked portfolios. There is therefore minimal net equity price, currency, interest rate or credit risk exposure to the Company for these contracts as the risks are borne by the policyholders.

(1) Market risk

Market risk is the risk that future changes in market prices may make a financial instrument less valuable. Due to the matching of policyholder liabilities to attaching asset value movements the UK unit-linked business is not directly affected by market or credit risk. The amount of risk borne by the Company's shareholders depends on the extent to which its customers share the investment risk through the structure of the Company's products.

NOTES ON THE FINANCIAL STATEMENTS (continued)

6 Investments (continued)

D. Risk management (continued)

(11) Credit risk

Credit risk is the risk that a counterparty or an issuer of securities, which the Company holds in its asset portfolio, defaults or another party fails to perform according to the terms of the contract. Due to the matching of policyholder liabilities to attaching asset value movements the UK unit-linked business is not directly affected by credit risk. The Company is also exposed to credit-related losses in the event of non-performance by counterparties.

(111) Liquidity risk

Liquidity risk is the risk that the Company may be unable to meet payment of obligations in a timely manner at a reasonable cost or the risk of unexpected increases in the cost of funding the portfolio at appropriate maturities or rates Liquidity management in the Company seeks to ensure that, even under adverse conditions, the Company has access to the funds necessary to cover surrenders, withdrawals and maturing liabilities

For the unit-linked funds, there is a risk that significant policyholder outflows could exceed the short-term liquidity within the funds. The Company has the power to defer settlement to policyholders in certain circumstances by between one and six months, depending on the fund

7. Capital requirements and management

The available capital of £19 9m (2008 £20 7m) reflects the excess of regulatory basis assets over liabilities of the Company before deduction of the regulatory capital resources requirement of £11 9m (2008 £7 6m) This excess of available capital over capital resources requirement is monitored during the year. In addition, a realistic assessment of available capital and capital requirements sufficient to cover a 1 in 200 year event is undertaken. Additional capital is sought from the parent company as necessary.

	2009 £000	2008 £000

Provision for claims outstanding the company has instigated a full review of its defined benefit payment processes and has set up a reasonable and prudent provision to cover the cost of performing the review and the cost of any contingent loss, if any, arising out of the review's findings. The expected completion of the review is 2010.

Of the reinsurer's share of technical provisions for linked liabilities of £974 4m at 31 December 2009 (2008 £581 8m), the entire balance relates to companies outside of the Prudential Group and of this 99% (2008 99%) of the balance was from reinsurers with S&P's rating of A and above

The entire reinsurer's share of technical provisions for long term business of £77 2m at 31 December 2009 (2008 £80 1m) relates to reinsurance agreements with other Prudential Group companies

Of the balance on the profit and loss account at 31 December 2009 the amount required not to be treated as realised profits in determining the company's profits available for distribution is £Nil (2008 £Nil)

NOTES ON THE FINANCIAL STATEMENTS (continued)

10. Long term business provision

The long term business provision has been calculated by the company's directors with advice from the company's actuarial function holder

The long term business provision comprises a provision for annuity business and an additional provision for compensation payments

For annuity business, the provisions are the present value of the annuity payments and expenses. The calculation of the provisions requires a number of actuarial assumptions regarding future experience to be made. The assumptions are set by the Directors having regard to actuarial advice and based on analysis of relevant past and current data and information on anticipated future trends.

Valuation interest rates have been amended, where necessary, in line with changes in market yields

There have been no other significant changes in the bases or assumptions adopted for the calculation of the long term business provision during the year

The reinsurers' share of the long term business provision relates mainly to cessions to Prudential Annuities Limited, a fellow subsidiary company

The provisions have been calculated on the following bases

The province in the control of the c				
	2009	2008		
Discount Rate	5 414% for annuities	6 138% for annuities		
Fund Growth	N/A for annuities	N/A for annuities

	32,288	52,764

Included within amounts owed to group undertakings at 31 December 2009 was an amount of £18 1m (2008 £19 0m), which represents a contingent loan (including interest at 3 month LIBOR plus 1% cumulative) repayable to The Prudential Assurance Company Limited The loan and interest on the loan are repayable out of surplus emerging on its business and is contingent on surpluses arising but can be repaid by the Company at any time. The remainder is intercompany balances which are cleared regularly and not interest bearing.

The loan is repayable to the extent of a specified percentage of surplus of the Company, a repayment obligation crystallising on the last day of the Company's financial year and being discharged by application of funds on a date nominated by the Company

In accordance with the terms, the loan might be prepaid upon prior notice, and the repayment obligation discharged in whole or part

Sundry creditors are payable on demand and are not interest bearing
