# STRATEGIC REPORT for the year ended 31 December 2014

#### **BUSINESS REVIEW AND FUTURE DEVELOPMENTS**

The directors are pleased with the results for the year and expect the financial position of the company to be maintained during the coming year.

#### PRINCIPAL RISKS AND UNCERTAINTIES

The company is a member of the Panther Securities PLC group. The principal activity of the individual companies within the group is property investment and dealing. The financial risk management procedures set out below are employed by all companies within the Panther Securities PLC group. The group's operations expose it to a variety of financial risks the main two being the effects of changes in credit risk of tenants and interest rate movement exposure on borrowings. The group has in place a risk management programme that seeks to limit the adverse effects of these risks on the financial performance of the group by monitoring levels of debt finance and the related finance costs. The group also uses derivative financial instruments to protect against adverse interest rate movements, no hedge accounting is applied.

Given the size of the group, the directors have not delegated the responsibility of monitoring financial risk management to a sub-committee of the board. The policies set by the board of directors are implemented by the group's finance department.

#### Price risk

The group is exposed to price risk due to normal inflationary increases in the purchase price of the goods and services purchased in the UK. The group also has a price exposure on listed equities that are held as investments. The group has a policy of holding only a small proportion of its assets as listed investments.

#### Credit risk

The group has implemented policies that require appropriate credit checks on potential tenants before lettings are agreed. In most cases a deposit is requested unless the tenant can provide a strong personal or other guarantee. The amount of exposure to any individual counterparty is subject to a limit, which is reassessed annually by the board. Exposure is also reduced significantly as the group has a large spread of tenants who operate in different industries.

#### Liquidity risk

The group actively ensures liquidity by maintaining a long-term finance facility and also holds significant cash deposits which are both utilised so as to ensure the group has sufficient available funds for operations and planned expansions.

#### Interest rate risk

The group has both interest bearing assets and interest bearing liabilities. Interest bearing assets are cash balances which earn interest at fixed rate. The group has a policy of only borrowing debt to finance the purchase of cash generating assets. The directors will revisit the appropriateness of this policy should the group operations change in size or nature.

# NOTES TO THE FINANCIAL STATEMENTS for the year ended 31 December 2014

#### 1. ACCOUNTING POLICIES

#### 1.1 BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The financial statements have been prepared under the historical cost convention as modified by the revaluation of investment properties on a going concern basis and in accordance with applicable accounting standards.

#### 1.2 CASH FLOW

The company, being a subsidiary undertaking where 90% or more of the voting rights are controlled within the group whose consolidated financial statements are publicly available, is exempt from the requirement to draw up a cash flow statement in accordance with FRS 1.

#### 1.3 TURNOVER

Turnover represents the value of rents receivable for tenancy occupation in the year to 31 December. Any amounts received in advance or arrears are deferred or accrued as necessary.

#### 1.4 INVESTMENT PROPERTIES

Investment properties are accounted for in accordance with SSAP 19 as follows:

- i) investment properties are revalued annually by the directors and by independent professional valuers at intervals of not more than three years. The surplus or deficit on revaluation is transferred to the revaluation reserve unless a deficit, or its reversal, on an individual investment property is expected to be permanent, in which case it is recognised in the profit and loss account for the year; and
- ii) no depreciation is provided in respect of leasehold investment properties with over 20 years to run.

Although the Companies Act would normally require the systematic annual depreciation of fixed assets, the directors believe that the policy of not providing depreciation is necessary to give a true and fair view, since the current value of investment properties, and the changes to that current value, are of prime importance rather than a calculation of systematic annual depreciation. Depreciation is only one of many factors reflected in the valuation, and the amount which might otherwise have been included cannot be separately identified or quantified.

#### 1.5 OPERATING LEASES

Rentals under operating leases are charged to the Profit and loss account on a straight line basis over the lease term.

Benefits received and receivable as an incentive to sign an operating lease are recognised on a straight line basis over the period until the date the rent is expected to be adjusted to the prevailing market rate.

## 1.6 STOCKS

Stocks are valued at the lower of cost and net realisable value after making due allowance for obsolete and slow-moving stocks.

# NOTES TO THE FINANCIAL STATEMENTS for the year ended 31 December 2014

## 1. ACCOUNTING POLICIES (continued)

#### 1.7 DEFERRED TAXATION

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation.

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax assets and liabilities are calculated at the tax rates expected to be effective at the time the timing differences are expected to reverse.

Deferred tax assets and liabilities are not discounted.

## 2. TURNOVER

All turnover arose within the United Kingdom.
