ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008) ("FRSSE")

Turnover

The turnover shown in the profit and loss account represents rents receivable for the year

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life

Fixtures and fittings

- reducing balance - 25%

Computer equipment

- reducing balance - 20%

Investment property

Investment properties are shown at their open market value. The surplus or deficit arising from the annual revaluation is transferred to the investment revaluation reserve unless a deficit, or its reversal, on an individual investment property is expected to be permanent, in which case it is recognised in the profit and loss account for the year.

This is in accordance with the FRSSE which, unlike the Companies Act 2006 ("the Act), does not require depreciation of investment properties. Investment properties are held for their investment potential and not for use by the company and so their current value is of prime importance. The departure from the provisions of the Act is required in order to give a true and fair view.

Deferred tax

Deferred tax is provided in full on timing differences which result in an obligation to pay more (or less) tax at a future date, at the average tax rates that are expected to apply when the timing differences reverse, based on current tax rates and laws

Deferred tax is not provided on timing differences arising from the revaluation of fixed assets where there is no commitment to sell the asset

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
