Notes to the Abbreviated Accounts for the Year Ended 31 May 2013

1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

Going concern

It is the intention of the directors to continue to provide further financial support for the company should this be necessary

On this assumption the directors consider it appropriate to prepare the financial statements on the going concern basis. The financial statements do not include any adjustments that would result from the withdrawal of this financial support. Should the going concern basis not be appropriate, adjustment would have to be made to reduce the value of assets to their realisable amount, to provide for any further liabilities that might arise and to reclassify fixed assets as current assets.

Turnover

Turnover represents amounts chargeable, net of value added tax, in respect of the sale of goods and services to customers.

Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows:

Asset class	Depreciation method and rate
Leashold property revaluation	Over 14 years
Improvements to leasehold property	Over duration of 70 year lease
Plant and machinery	15% straight line basis
Fixtures and fittings	10% straight line basis
Office equipment	25% straight line basis
Motor vehicles	25% straight line basis
Advertising boards	10% straight line basis

Stock

Stock is valued at the lower of cost and net realisable value, after due regard for obsolete and slow moving stocks. Net realisable value is based on selling price less anticipated costs to completion and selling costs.

Hire purchase and leasing

Rentals payable under operating leases are charged in the profit and loss account on a straight line basis over the lease term.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Where shares are issued, any component that creates a financial liability of the company is presented as a liability in the balance sheet. The corresponding dividends relating to the liability component are charged as interest expense in the profit and loss account.
