#### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 DECEMBER 2004

#### 1. Accounting policies

#### Accounting convention and basis of preparation of financial statements

These financial statements have been prepared in accordance with applicable accounting standards and under the historical cost convention. The principal accounting policies of the company have remained unchanged from the previous year and are set out below.

The company has taken advantage of the exemption under FRS1 in not presenting a cash flow as a consolidated cash flow is presented in the Royal Agricultural Society of England's group financial statements.

#### Turnover

Turnover is the total amount receivable by the company for goods supplied and services provided, excluding VAT and trade discounts.

#### Tangible assets

Expenditure on individual tangible assets in excess of £1,000 is capitalised and depreciated over the expected service life of the asset. The cost of fixed assets comprises the purchase cost together with incidental costs of acquisition.

Depreciation is provided in equal instalments on all tangible fixed assets at rates estimated to write down the cost of each asset to its residual value over its anticipated life. Impairment reviews are undertaken when there is some indication that the recoverable amount of a functional fixed asset is below its net book value.

The rates of depreciation used are:

Machinery, equipment and furniture 10% - 25% Computers 33%

#### Stocks

Stocks are valued at the lower of cost and net realisable value.

#### Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events result in an obligation to pay more, or a right to pay less, tax in the future. It is recognised on an undiscounted basis using the tax rates estimated to arise when the timing difference is expected to reverse.

#### Lease and hire purchase commitments

Fixed assets acquired under finance leases and hire purchase agreements are recorded in the balance sheet as fixed tangible assets at their equivalent capital value and are depreciated over the shorter of the period of their estimated useful lives or the leasing period. Obligations under such agreements are included in creditors net of the interest charged allocated to future periods. The interest element of the rental payments is charged against revenue.

Rentals payable under operating leases are charged against income.

#### 2. Turnover and loss on ordinary activities before taxation

The turnover and profit before taxation are attributable to the principal activities of the company which are the promotion of activities carried on by the Royal Agricultural Society of England and the carrying on of commercial activities allied to the Society, including the letting of the exhibition and conference facilities at Stoneleigh Park.
