1 Accounting Policies

(a) Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

The company acts as agent on behalf of the leaseholders in respect of service charge monies payable under the terms of their lease. These monies, and the income and expenditure for maintaining the common parts of the premises are held on trust for the leaseholders and are not assets, income or expenditure of the company. Accordingly the transactions and balances relating to service charges are not included in the company accounts. The company accounts show only those transactions and balances to which the company is beneficially entitled. Separate service charge accounts have been prepared for the leaseholders which show the service charge income and expenditure and the related balances.

(b) Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
