1 Accounting policies Basis of Accounting

These financial accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standards for Smaller Entities (effective April 2008)

Tangible Fixed Assets

Tangible fixed assets are stated at cost less depreciation

Depreciation is provided at rates calculated to write off the cost of fixed assets less their estimated residual value over their expected useful lives on the following bases

No depreciation has been provided on the freehold land and buildings acquired during the year

Short Leasehold Property	Over the period of the lease
Plant & Machinery	15% on written down value
Fixtures & Fittings	15% on written down value
Motor vehicle	25% on written down value

Deferred Taxation

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the director considers that it is more likely than not that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non-discounted basis at the average tax rates that would apply when the timing differences are expected to reverse, based on tax rates and laws that have been enacted by the balance sheet date
