DIRECTORS' REPORT for the year ended 31 March 2013

The directors present their report and the financial statements for the year ended 31 March 2013

Directors' responsibilities statement

The directors are responsible for preparing the directors' report and the financial statements in accordance with applicable law and regulations

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period in preparing these financial statements, the directors are required to

- select suitable accounting policies and then apply them consistently,
- make judgments and accounting estimates that are reasonable and prudent,
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Principal activities

The company is involved in consultancy work in the field of micro-electronics and the manufacture and supply of electronic component units, sub-systems and software to industry

Business review

The business has seen strong growth in turnover and profit in the year despite the economic climate. The results reflect the benefits of a diverse geographical market and a strong product portfolio which continues to grow in new markets.

Major product releases in the year were successful being well received by the market and show strong sales growth. This is expected to accelerate as a series of further major releases are coming through in the current year. These will add additional functionality and widen the appeal in new markets.

A review of the geographical markets during the year has shown areas where the business was poorly represented. A focused attempt to target under represented markets with high growth potential has been positive and the business expects significant growth from these markets in the current year.

After years of strong growth the business has outgrown its premises and has committed to move into new premises roughly twice the size of the current building. This will provide space for new employees in the all areas of the business but will also provide operations with the required space to expand, capacity to support our customers.

DIRECTORS' REPORT for the year ended 31 March 2013

Principal risks and uncertainties

The company sells its products into capital projects which can be affected by the general economic climate Given the uncertainty in some markets this is a continuing risk to the business. The company manages this risk but having a spread of customers across the world to limit the effect of a downturn in a particular market.

Environment

The company recognises the importance of its environmental responsibilities and designs and implements policies to reduce any damage that might be caused by the company's activities. Initiatives include safe disposal of computer equipment, recycling and reduced energy consumption.
