### **1 Summary of significant accounting policies (continued)**

#### **Financial instruments**

Basic financial assets, including trade debtors and other receivables, amounts owed by group undertakings, cash and bank balances are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest. Such assets are subsequently carried at amortised cost using the effective interest method.

At the end of each reporting period financial asset measured at amortised cost are assessed for objective evidence for impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the assets original effective interest rate. The impairment loss is recognised in the profit and loss account.

Basic financial liabilities, including trade creditors and other payables and amounts owed to fellow group undertakings are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transactions is measured at the present value of the future payments discounted at a market rate of interest.

#### **Revenue recognition**

Turnover represents the amounts (excluding value added tax and trade discounts) derived from the provision of goods to customers during the year, recognised on delivery to customers when the significant risk and rewards of ownership have been transferred. Goods are sold on a sale or return basis and income is adjusted by a provision for goods to be returned.

#### **Taxation**

The tax payable is based on the taxable profit for the year. Taxable profit differs from the profit as reported in the profit and loss account because it excludes items of income and expense that are taxable or deductible in other years and it also excludes items which are never taxable or deductible.

Deferred tax is provided in full on timing differences that result in an obligation at the balance sheet date to pay more tax, or a right to pay less tax, at a future date at rates expected to apply when they crystallise based on enacted or substantially enacted taxes and law. Timing differences arise from the inclusion of items of income and expenditure in tax computations different from those in which they are included in financial statements. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

#### **Operating leases**

Leases that do not transfer all of the risks and rewards of ownership are classified as operating leases. Payments under operating lease rentals are charged to the profit and loss account on a straight-line basis over the period of the lease.

#### **Reserves**

Retained earnings represents cumulative net profits from the profit and loss account and comprehensive income. Movements on the reserve are set out in the statement of changes in equity. Amounts in excess of cost on revaluation of property are credited to a revaluation reserve.
