NOTES TO THE FINANCIAL STATEMENTS

YEAR ENDED 31st OCTOBER 2010

1 ACCOUNTING POLICIES

Basis of accounting

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with applicable UK accounting standards

Cash flow statement

The directors have taken advantage of the exemption in Financial Reporting Standard No 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is small

Turnover

Turnover represents amounts receivable for goods and services provided during the year net of Value Added Tax

Depreciation

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows

Freehold Property
Fixtures, Fittings and Equipment
Motor Vehicles
Cups and trophies

over 50 years straight line
over 6-7 years straight line
over 4 years straight line
over 20 years straight line

Freehold land is not depreciated

An amount equal to the excess of the annual depreciation charge on revalued assets over the notional historical cost depreciation charge on those assets is transferred annually from the revaluation reserve to the profit and loss reserve

Stocks

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items

Leasing and hire purchase commitments

Assets held under finance leases, which are leases where substantially all the risks and rewards of ownership of the asset have passed to the company, and hire purchase contracts, are capitalised in the balance sheet and are depreciated over their useful lives. The capital elements of future obligations under the leases and hire purchase contracts are included as liabilities in the balance sheet.

The interest elements of the rental obligations are charged in the profit and loss account over the periods of the leases and hire purchase contracts and represent a constant proportion of the balance of capital repayments outstanding

Rentals payable under operating leases are charged in the profit and loss account on a straight line basis over the lease term

NOTES TO THE FINANCIAL STATEMENTS

YEAR ENDED 31st OCTOBER 2010

1. ACCOUNTING POLICIES (continued)

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions

Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold.

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its financial liabilities.

2 BASIS OF PREPARATION

During the year, the company completed its project for the refurbishment of the golf course. As a result of the cost of the works undertaken, the company made a loss for the year, before taxation, in the sum of £246,170.

The company is part of a group banking facility. The directors manage the deficit on net current assets with funds available under this facility, within agreed limits, and from the company's operational cashflows. This facility is due for renewal in April 2012 and the directors are confident that it will be renewed at that time.

The parent company has pledged continuing support and will not call for repayment of the amount owed by the company within 12 months from the date of approval of the accounts

Having made enquiries, the directors believe that it is appropriate to prepare the accounts on a going concern basis and have done so
