### 1 Accounting policies

### Basis of preparation

The accounts have been prepared under the historical cost convention and in accordance with applicable United Kingdom Accounting Standards.

#### Turnover

Turnover represents the value, net of value added tax and discounts, of goods provided to customers and work carried out in respect of services provided to customers.

### Depreciation

Depreciation is provided on all tangible fixed assets, other than freehold land, at rates calculated to write off the cost, less estimated residual value, of each asset evenly over its expected useful life, as follows:

Plant and machinery

25% on reducing balance

#### Stocks

Stock is valued at the lower of cost and net realisable value.

#### Deferred taxation

Full provision is made for deferred taxation resulting from timing differences between the recognition of gains and losses in the accounts and their recognition for tax purposes.

Deferred tax is calculated at the tax rates which are expected to apply in the periods when the timing differences will reverse, and discounted to reflect the time value of money using rates based on the post-tax yields to maturity that could be obtained at the balance sheet date on government bonds with similar maturity dates.

# Foreign currencies

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date. All differences are taken to the profit and loss account.
