Notes to the Abbreviated Accounts
for the Year Ended 30 April 2015

1. ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008). The principal accounting policies, as set out below, have been applied consistently throughout the year.

Turnover

Turnover represents sales of goods and services net of VAT and trade discounts. Turnover is recognised when the risks and rewards of ownership of goods have been transferred to the customer or where the value of services provided under contracts to the extent that there is a right to consideration and is recorded at the value of the consideration due. The risks and rewards of ownership of goods are deemed to have been transferred when the goods are shipped to, or are picked up by, the customer. Where a service contract has only been partially completed at the balance sheet date turnover represents the value of the service provided to date based on a proportion of the total expected consideration at completion. Where payments are received from customers in advance of services provided, the amounts are recorded as deferred income and included as part of creditors due within one year.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Fixtures and fittings	- 15% on reducing balance
Motor vehicles	- 25% on reducing balance

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or right to pay less or to receive more, tax, with the following exceptions:

A deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all evidence, it can be regarded as likely that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on a undiscounted basis, at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
