**NOTES TO THE ABBREVIATED ACCOUNTS
FOR THE YEAR ENDED 31 DECEMBER 2011**

1 ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008). The directors expect that the company will be able to operate within its finance facilities for the foreseeable future and are not aware of any reasons why these facilities might be withdrawn. As a result they have adopted the going concern basis of accounting.

Cashflow statement

The company has taken advantage of the small company exemption from preparing a cashflow statement under the terms of FRS1.

Turnover

Turnover is recognised at the fair value of the consideration received or receivable for the sale of services of plant and machinery hire and is recognised on delivery of the product at the customer's location. Turnover from plant and machinery hire is recognised in the profit and loss account on a straight-line basis over the period of the hire. Turnover is net of Value Added Tax.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life:

Freehold buildings	- 2% on cost
Plant and machinery	- between 10% and 100% on cost

Freehold land is not depreciated.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

Hire purchase and leasing commitments

Assets obtained under hire purchase agreements are capitalised in the balance sheet and depreciated over their estimated useful lives. The capital element of the future payments is treated as a liability and the interest element of the obligations is charged to the profit and loss account over the relevant period. Those held under finance leases are depreciated over their estimated useful lives or the lease term, whichever is shorter.

Rentals paid under operating leases are charged to the profit and loss account as incurred.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to the profit and loss account in the period to which they relate.

Investments

The investment in subsidiaries is stated at cost less provision for any permanent diminution in value where appropriate.
