Directors' report

Directors' report

The directors present their report and the financial statements of the company for the year ended 31 December 2012

Results and dividends

The profit and loss account is set out on page 6 and shows the profit after tax for the year of £466,000 profit (2011 £212,000 profit) The directors do not recommend the payment of a dividend (2011 £Nil)

Business review and principal activities

The company continues to operate DMC (Destination Management Company) services within the luxury leisure travel industry across 24 European and neighbouring countries

Sales in 2012 were 5% below the 2011 level primarily due to a large booking being made in 2011 which distorts year on year comparisons As with all travel sector companies, gross margins have been under pressure as a result of high competition for travelling clients The company has negotiated well with its suppliers to improve margins in 2012 by 0.8%

The 2012 operating profit of £438,000 is a small improvement on the operating profit of £436,000 made in 2011

The 2012 results include the non-recurring impairment of the outstanding balance of £70,000 (2011 £10,000) due from a subsidiary, Abercrombie & Kent Croatia doo Abercrombie & Kent Croatia doo ceased trading at the end of 2011

The first quarter of 2013 has been encouraging with bookings of £2,660,547 This gives the directors confidence of a continuing good performance for the company in the coming year

The company continues to enjoy the full support of its parent

There have been no significant events since the balance sheet date

The directors would like to take this opportunity to thank everyone in the company for their continued support and contribution during 2012

The business is controlled by monitoring key performance indicators such as conversion rates and weekly bookings These are commercially sensitive and consequently have not been reproduced here

Principal risks and uncertainties

Competitive pressure within the travel industry in Europe and the strength of the euro are continuing risks for the company, which could result in it losing sales volumes to key competitors and other destinations around the world The company manages these risks by providing high quality innovative travel products and added value services, ensuring fast response times not only in supplying detailed travel itineraries but in handling all customer queries and by maintaining strong relationships with both customers and suppliers

The company buys and sells in various foreign currencies and is therefore exposed to the movements against sterling and the euro The company matches buy and sell currencies where possible to eliminate this risk and where this can not be done the company's treasury function looks to take out forward exchange contracts to manage the risk

The company has no external borrowings or long term deposits so is not exposed to fluctuations in bank base rate movements

Directors' report *(continued)*

Notes

(forming part of the financial statements)

1 Accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements, except as noted below

Basis of preparation

The financial statements have been prepared in accordance with applicable accounting standards and under the historical cost accounting rules

The financial statements have been prepared on the going concern basis, notwithstanding net current liabilities of £2,326,000 and net liabilities of £1,245,000 (included within these amounts is net £1,653,000 owed to group undertakings), which the directors believe to be appropriate for the following reasons. The company is dependent for its working capital on funds currently provided to it by A&K Sarl – formally Abercrombie & Kent Group of Companies SA ("the Group"), the company's intermediate parent. The directors have prepared projected cash flow information for the period ending twelve months from the date of their approval of these financial statements. On the basis of this cash flow information, the directors consider that the company will operate without the need for any additional funding, assuming the current funding provided by the Group is not called upon. The Group has indicated that for at least 12 months from the date of approval of these financial statements, it will continue to make available such funds as are needed by the company and in particular will not seek repayment of the amounts currently made available.

As with any company placing reliance on other group entities for financial support, the directors acknowledge that there can be no certainty that this support will continue, although, at the date of approval of these financial statements, they have no reason to believe that the Group will not both be able to support, and will support, the company for the foreseeable future.

The Company is exempt by virtue of s400 of the Companies Act 2006 from the requirement to prepare group financial statements. These financial statements present information about the Company as an individual undertaking and not about its group.

Under FRS 1 (revised) the Company is exempt from the requirement to prepare a cash flow statement on the grounds that a parent undertaking includes the Company in its own published consolidated financial statements.

The company is a wholly owned subsidiary of A&K Sarl. The company has taken advantage of the exemption contained in FRS 8 and has therefore not disclosed transactions or balances with entities which form part of the group. The company is ultimately controlled by Fortress Investment Group LLC through its ownership of 67% of the share capital of A&K Sarl. The consolidated financial statements of Fortress Investment Group LLC, within which this company is included, can be obtained from the address given in note 19.

Fixed assets and depreciation

Depreciation is provided to write off the cost, less the estimated residual value of tangible fixed assets by equal instalments over their estimated useful economic lives as follows:

Leasehold improvements	-	6 67% - 16 67% straight line
Fixture and fittings	-	12 5% - 20% straight line
Equipment	-	20% - 33 3% straight line

Leases

Assets held under hire purchase agreements are capitalised and the outstanding hire purchase obligations are shown in creditors.

Operating lease rentals are charged to the profit and loss account on a straight line basis over the period of the lease.

Notes (continued)

1 Accounting policies (continued)

Research and development

Research and development expenditure is written off in the year in which it is incurred

Post-retirement benefits

The company operates a defined contribution pension scheme. The assets of the scheme are held separately from those of the company in an independently administered fund. The amount charged to the profit and loss account represents the contributions payable to the scheme in respect of the accounting year.

Investments

Investments are included at cost less amounts written off. Profits or losses arising from disposal of fixed asset investments are treated as part of the result from ordinary activities.

Foreign currencies

Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Exchange differences are taken into account in arriving at the operating result.

Taxation

The charge for taxation is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting policies.

Deferred taxation is recognised, without discounting, in respect of all timing differences between the treatment of certain items for taxation and accounting purposes which have arisen but not reversed by the balance sheet date, except as otherwise required by FRS 19.

Recognition of income and expenditure

Income and expenditure is recognised by reference to the first day a holiday commences, excluding Value Added Tax and trade discounts, with any items relating to the following year's holiday season being carried forward and taken to the profit and loss account of the relevant period.

Factors affecting the tax charge for the current year

The current tax charge for the year is lower (2011 lower) than the standard rate of corporation tax in the UK 24.5% (2011 26.5%). The differences are explained below

	2012 £000	2011 £000
<i>Current tax reconciliation</i>		
Profit on ordinary activities before tax	645	402
Current tax at 24.5% (2011 26.5%)	158	107
<i>Effects of</i>		
Reduction in tax rate of tax losses brought forward	(1)	19
Disallowable expenses	22	9
Reduction in tax losses brought forward	-	55
(Increase) of tax losses	(146)	(190)
Total current tax charge (see above)	33	-

A reduction in the UK corporation tax rate from 26% to 25% (effective from 1 April 2012) was substantively enacted on 5 July 2011, and further reductions to 24% (effective from 1 April 2012) and 23% effective from 1 April 2013) were substantively enacted on 26 March 2012 and 3 July 2012 respectively. This will reduce the company's future current tax charge accordingly. The deferred tax asset at 31 December 13 has been calculated based on 23% substantively enacted at the balance sheet date.

The March 2013 Budget announced that the rate will further reduce to 20% by 2015 in addition to the planned reduction to 21% previously announced in the December 2012 Autumn Statement. It has not yet been possible to quantify the full anticipated effect of the announced further 3% rate reduction, although this will further reduce the company's future current tax charge and reduce the company's deferred tax asset accordingly.

Having taken independent professional advice the directors are of the opinion that VAT registration in other European Union states is not required.
