Notes to the Abbreviated Accounts
for the Year Ended 30 September 2014

1. **ACCOUNTING POLICIES**

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents the net amounts invoiced to customers during the period less work in progress and net of value added tax.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter.

Optical equipment	- 14-25% on cost
Fixtures and fittings	- 14-25% on cost
Computer equipment	- 33% on cost

Stocks

Stock is valued at the lower of cost and net realisable value. Cost is determined on an average cost basis. Net realisable value is based on estimated selling price allowing for all further costs of completion and disposal.

Deferred tax

Deferred tax is provided in full on timing differences which result in an obligation at the balance sheet date to pay more tax or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current tax rates and law. Timing differences arise from the inclusion of items of income and expenditure in tax computations in periods different from those in which they are included in the financial statements. Deferred tax assets and liabilities are not discounted.

Dividends

Equity dividends are recognised when they become legally payable. Interim dividends are recognised when paid. Final equity dividends are recognised when approved by the shareholders.

Hire purchase and leasing commitments

Assets obtained under hire purchase contracts or finance leases are capitalised in the balance sheet. Those held under hire purchase contracts are depreciated over their estimated useful lives. Those held under finance leases are depreciated over their estimated useful lives or the lease term, whichever is the shorter.

The interest element of these obligations is charged to the profit and loss account over the relevant period. The capital element of the future payments is treated as a liability.

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.

Reverse premiums and similar incentives received to enter into operating lease agreements are released to the profit and loss account on a straight line basis over the life of the lease.

Pension costs

The company operates a defined contribution pension scheme. Contributions to the scheme are charged to the profit and loss account in the period in which they become payable.

Going concern

The financial statements are prepared on a going concern basis on the grounds that continued support will be received from the directors for the foreseeable future.
