**Notes to the Abbreviated Accounts**  
**for the year ended 31 March 2014**

**1 Accounting policies**

***Basis of preparation***

The accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

***Turnover***

Turnover represents the total value, net of value added tax, of services provided during the year and derives from the provision of services falling within the company's ordinary activities. Rents are recognised on a receivable basis. Rents receivable for the subsequent year are deferred and shown within current liabilities under trade creditors.

***Investment properties***

Investment properties are revalued annually at their open market value in accordance with the FRSS (effective April 2008). The surplus or deficit on revaluation is transferred to a revaluation reserve except where the open market value of property on a property is lower than its cost, in which case if the deficit is expected to be permanent, it is taken to the profit and loss account. No depreciation is provided on investment properties which is a departure from the requirements of the Companies Act 2006. In the opinion of the directors the properties are held primarily for their investment potential and so their current value is of more significance than any measure of consumption and to depreciate them would not give a true and fair view. The provision of the FRSS (effective April 2008) in respect of investment properties have therefore been adopted in order to give a true and fair view. If this departure from the Act had not been made, the profit for the year would have been reduced by depreciation. However, the amount of depreciation cannot be reasonably quantified and the amount which might otherwise have been shown cannot be separately identified or quantified.
