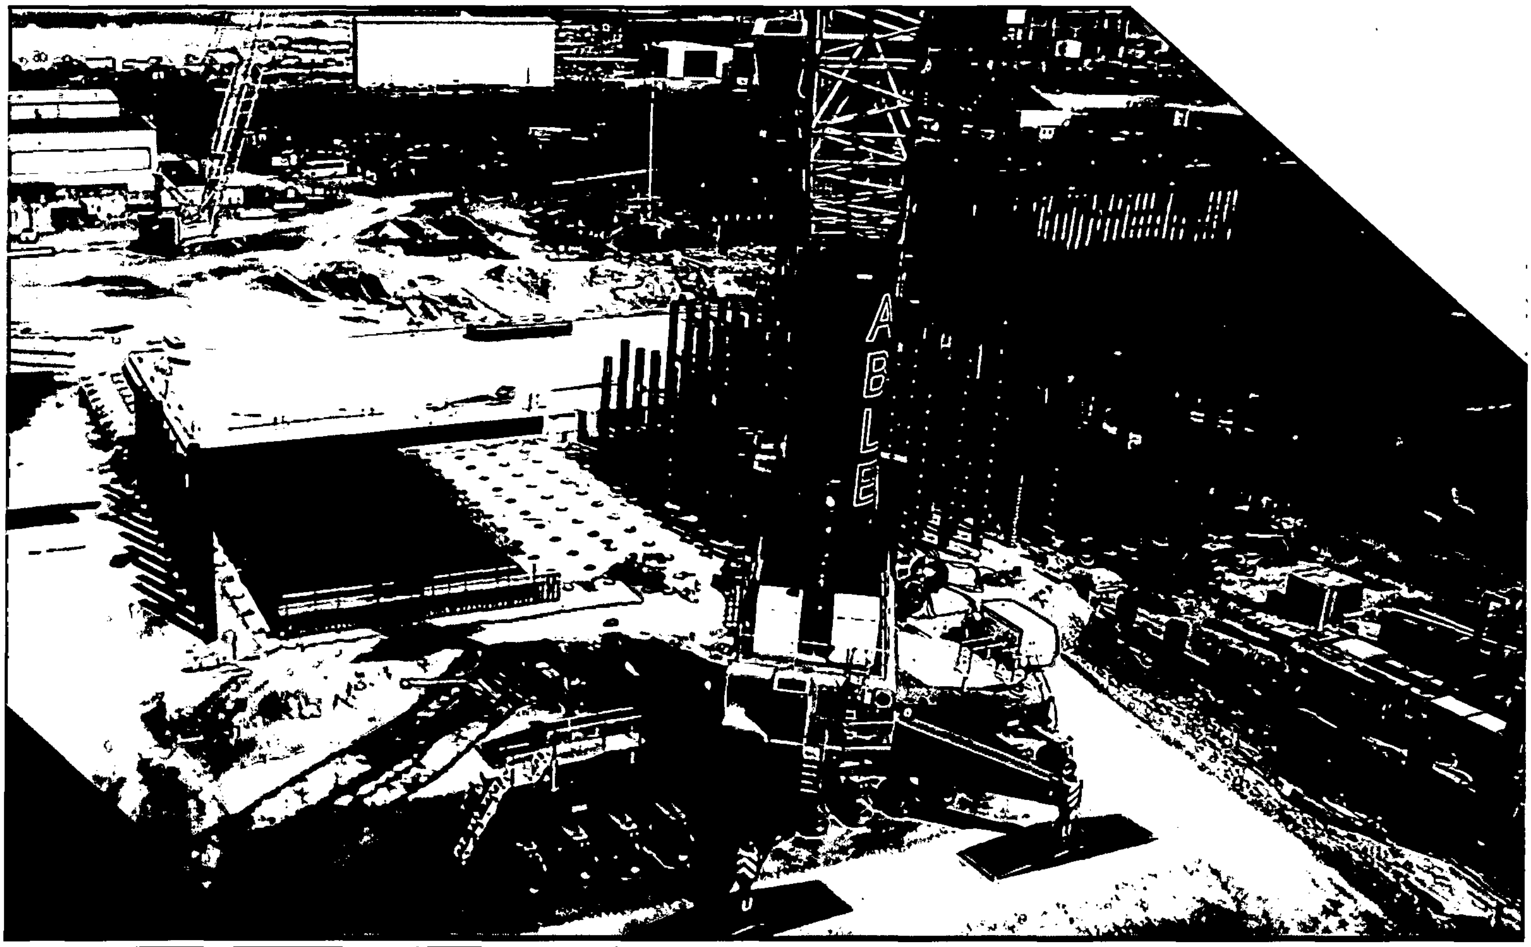
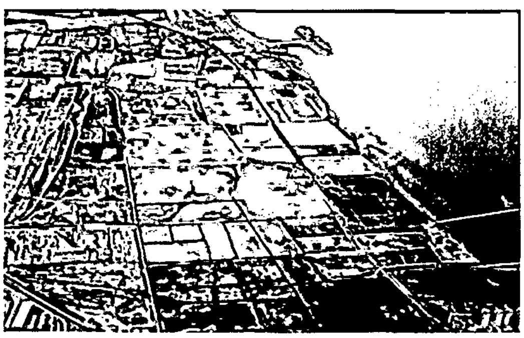
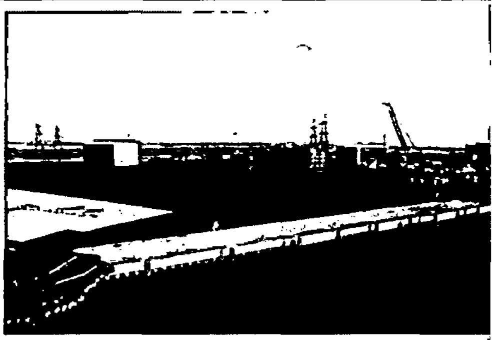
Able Group

Financial Statements and Accounts
Able UK Limited and Elba Group







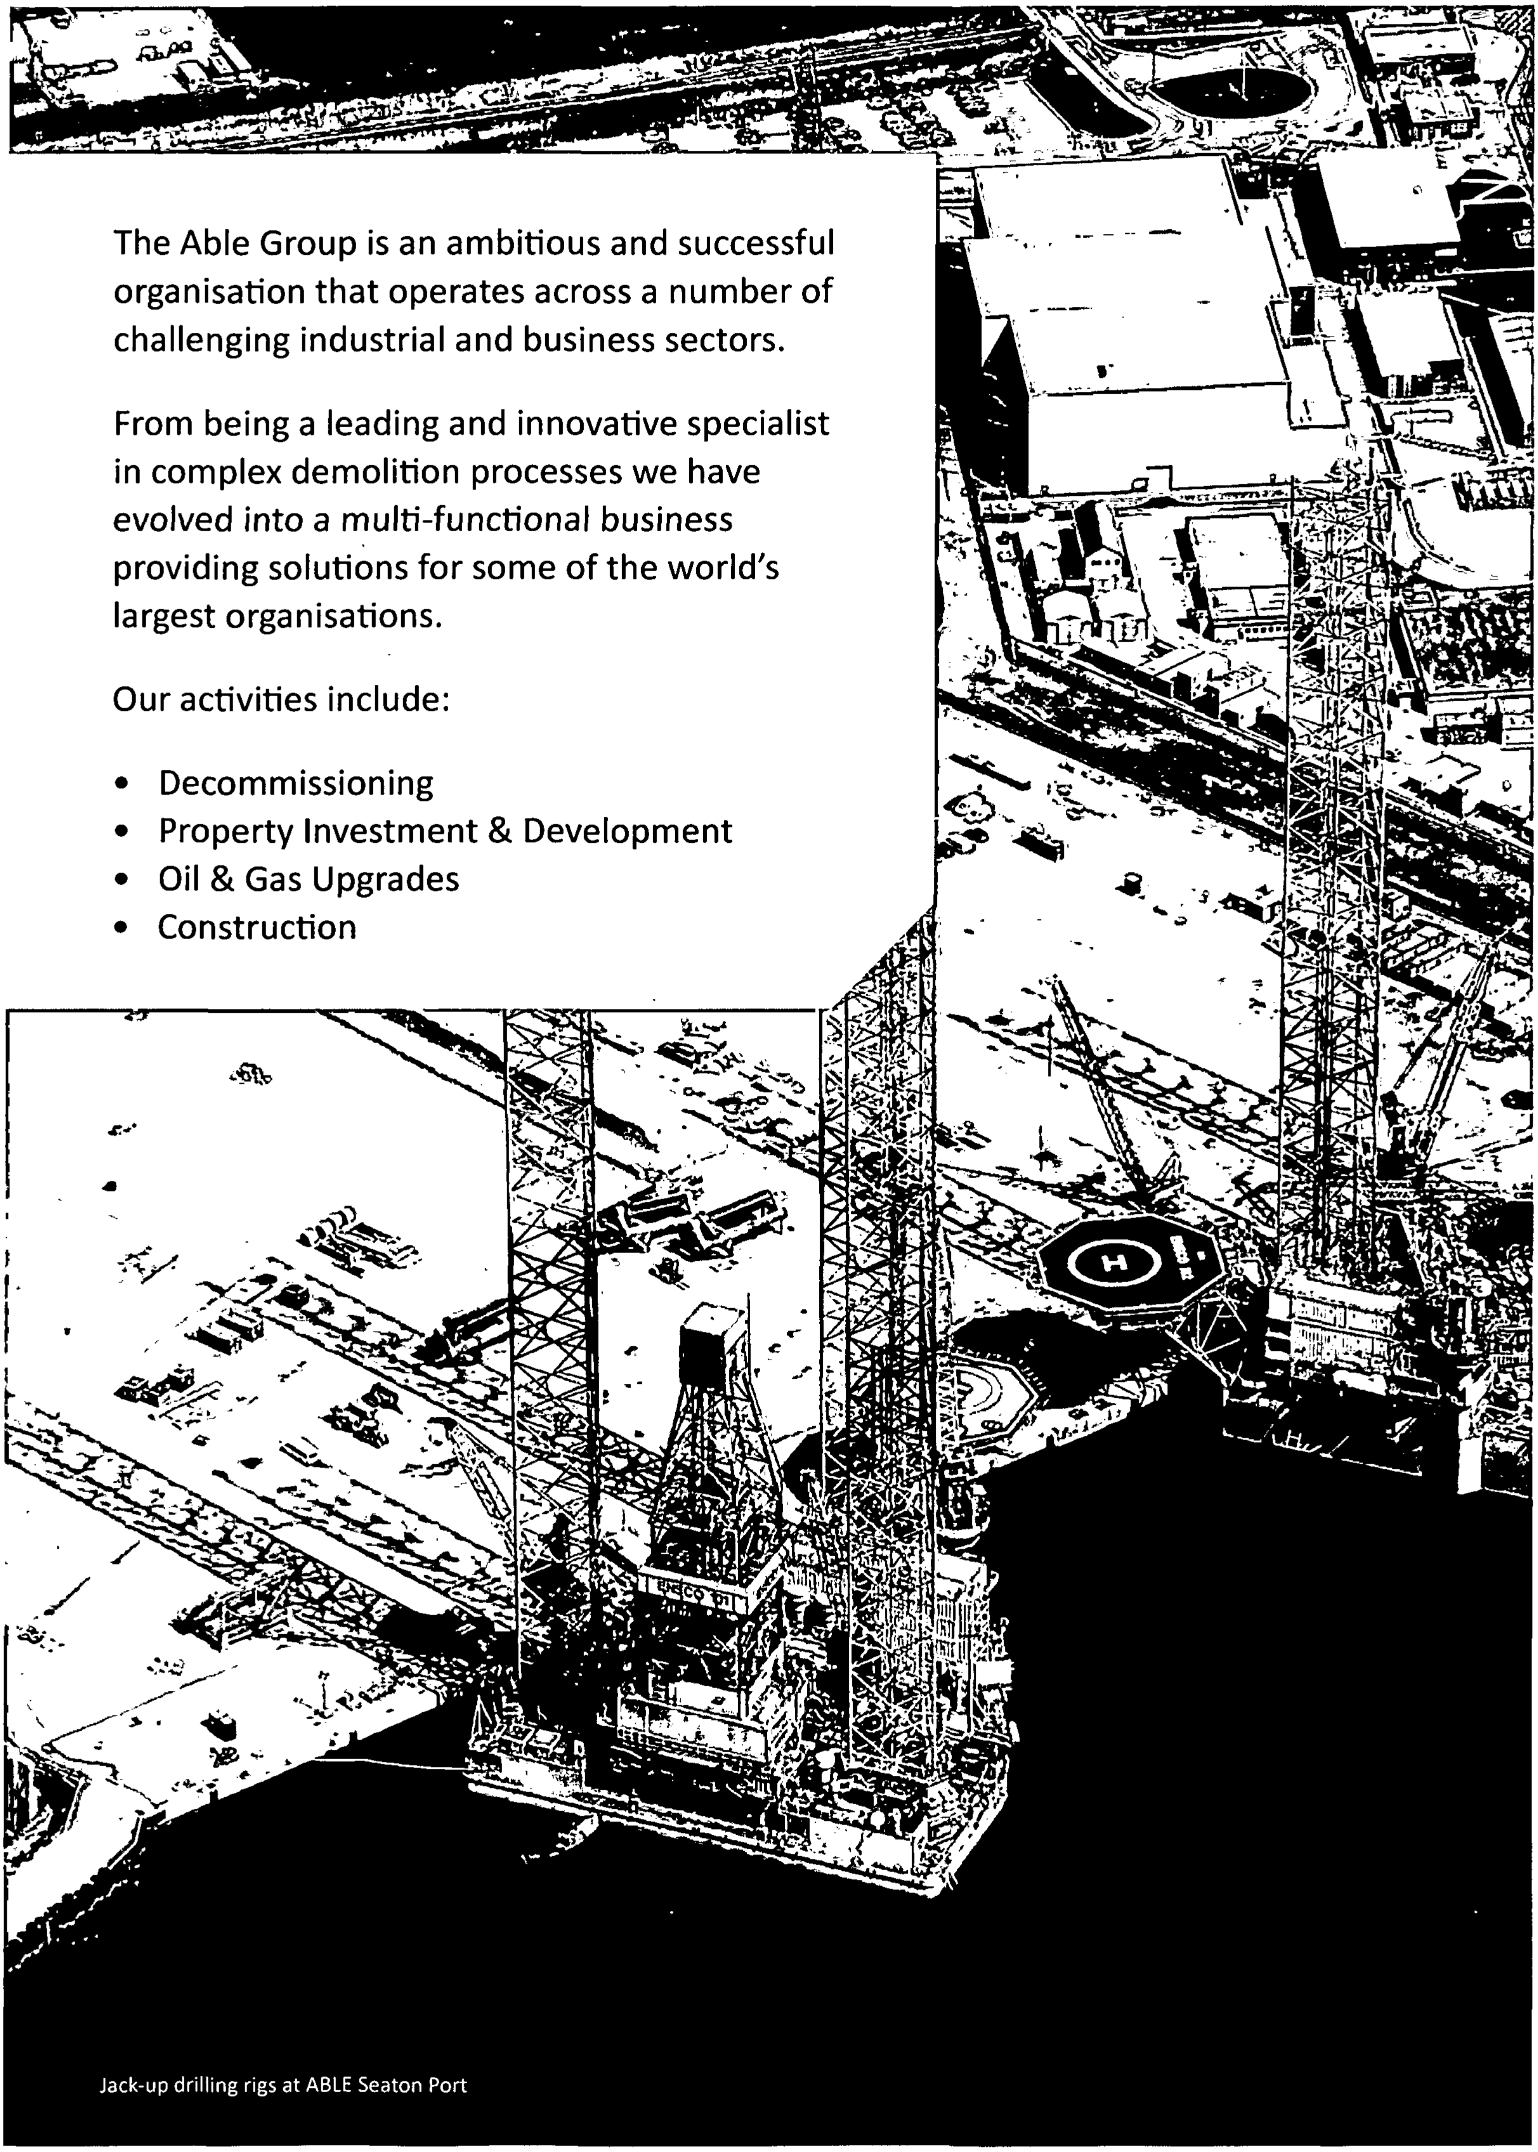
31 December 2014

The Able Group is an ambitious and successful organisation that operates across a number of challenging industrial and business sectors.

From being a leading and innovative specialist in complex demolition processes we have evolved into a multi-functional business providing solutions for some of the world's largest organisations.

Our activities include:

- Decommissioning
- Property Investment & Development
- Oil & Gas Upgrades
- Construction



Jack-up drilling rigs at ABLE Seaton Port

Strategic report

Principal activities
The principal activities of the group during the year may be summarised as follows:
- Construction
- Decommissioning
- Oil & gas upgrades
- Property and development

Market environment and performance
ABLE operates across a diverse range of activities with each activity having differing characteristics.
In terms of property and development, the most significant market sectors are the energy sector (particularly renewable for offshore wind) and the UK vehicle storage and distribution sector.

The UK already has the world's largest offshore wind market and this is set to grow considerably over the next decade. From 2018 the Round 3 projects will start to convert existing planning consents into the operational phase. The rate of progress is influenced by the levels of Government support, however the major developers are (for a number of the larger wind farms) are at an advanced stage in committing to development. Beyond 2020 it is anticipated that policy will further clarify the longer-term position and create a greater level of transparency for the market.

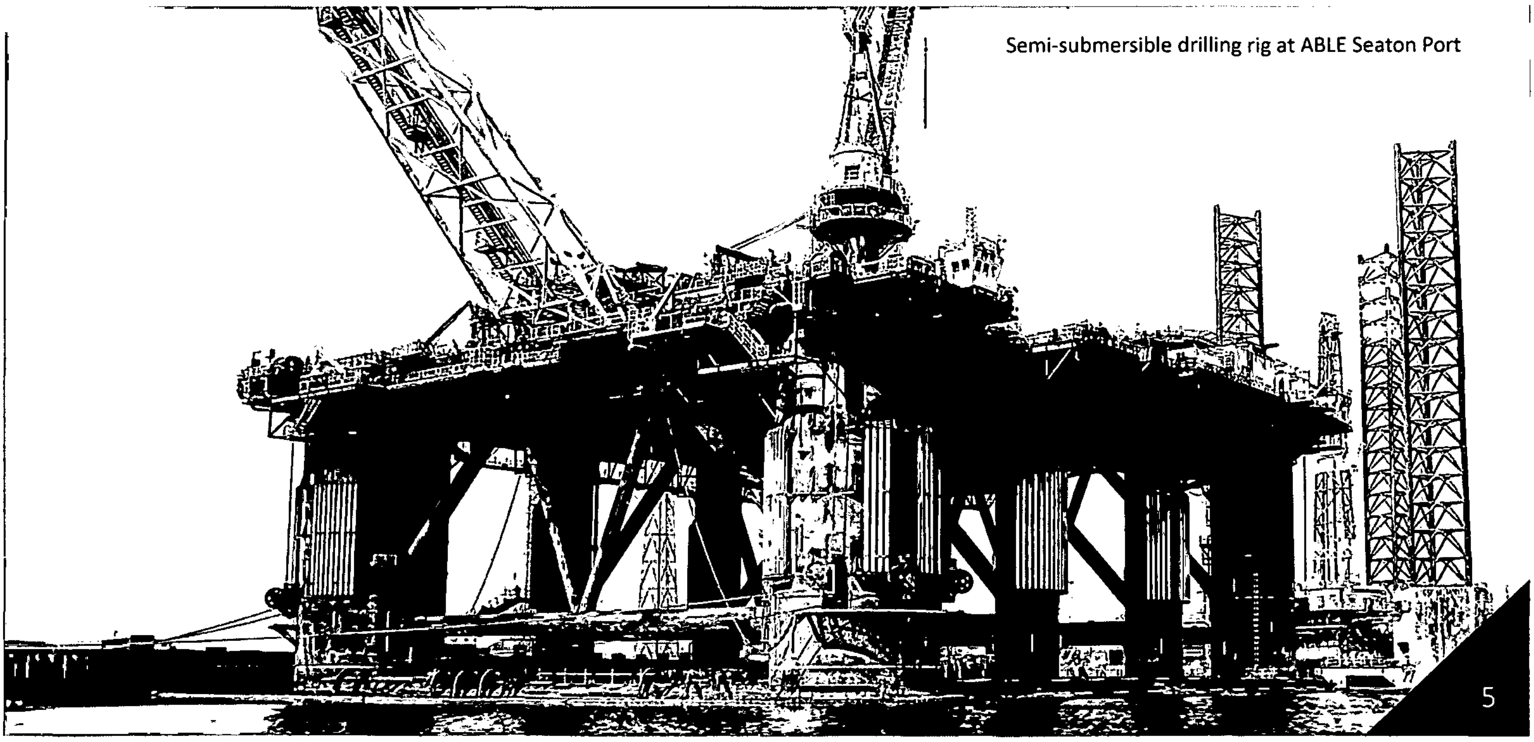
The vehicle storage sector continues to grow and the group expects further expansion in this area.

The widely anticipated upturn in the UK economy is likely to be reflected in an increased level of enquiries with the prospects of renewed interest and activity across ABLE's conventional assets.

The decommissioning sector is also strongly influenced by Government policy and the restructuring of UK energy supply. In particular, the phasing out of conventional coal fired power stations presents an on-going opportunity for ABLE and a number of contracts are being actively pursued. Similarly, on-going investment at ABLE Seaton Port will further enhance the prospect of securing new oil and gas platform decommissioning projects beyond the recently confirmed long term Shell Brent contract.

ABLE's construction arm will be undertaking a range of new projects, principally for itself or the group, with a concentration on the fully consented developments at ABLE Humber Port and new quay construction activity at ABLE Seaton Port.

The global fall in oil prices has impacted on some of the elements linked to the oil and gas rig upgrading sector. Whilst a significant amount of maintenance work is still required, there is (at least temporarily) a growing requirement for lay-by berths to accommodate rigs which are currently not operationally required.



Semi-submersible drilling rig at ABLE Seaton Port

Strategic report *(continued)*

Strategy
ABLE's strategy is aimed at retaining and improving ABLE's strong position across a range of activities. ABLE will continue to focus on growth and this will be underpinned by sustained and selective investment.

ABLE will continue to seek to expand its quality client base and develop long-term relationships with guaranteed revenues from a broad mix of customers and business sectors. This review will outline some of those opportunities.

The Group will continue to apply a selective approach to further land acquisitions.

Financial performance
The accounts of Able UK Limited have, for the first time been prepared on a consolidated basis and under IFRS. An explanation of the impact of these changes is included in note 27.

Key performance indicators
Group turnover doubled to £33.3m in 2014, *(2013:£16.6m)*. This was in line with expectations as set out in the previous year's report.

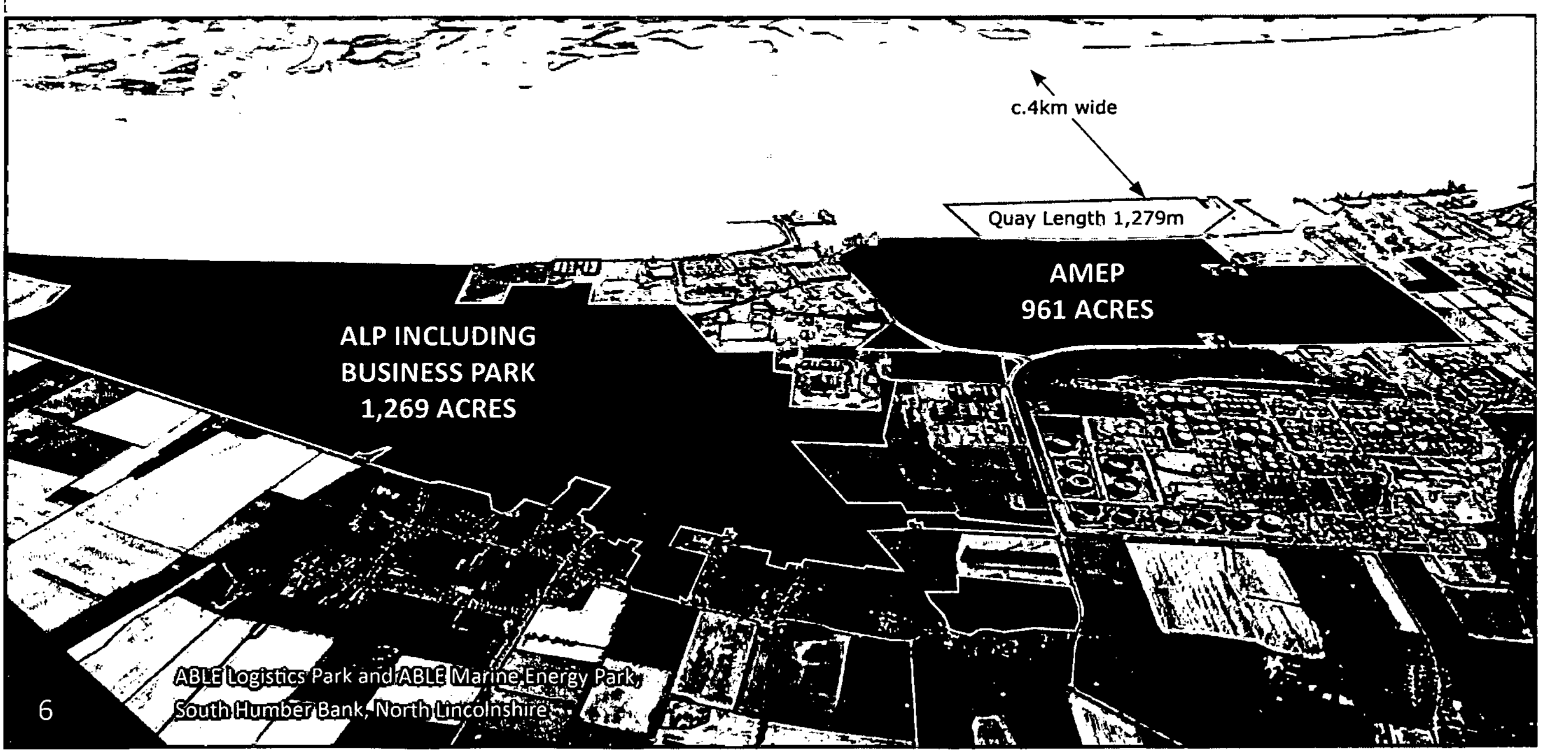
Gross profit margin was 35% compared to 42.6% in 2013. This is because rental income was a smaller proportion of group turnover in 2014 due to larger construction contracts coming on stream in 2014.

Net working capital improved to £41.6m from £25.0m, underpinned by £26.1m in cash balances.

All group capital expenditure was funded from the group's resources without the need for any external funding.

Ownership
Able UK Limited is owned by P M Stephenson & his family.

The Elba Group of companies are owned by the Land Development Trust.



ABLE Logistics Park and ABLE Marine Energy Park, South Humber Bank, North Lincolnshire

Strategic report *(continued)*

Construction

ABLE is engaged in a number of major construction projects including infrastructure development, land remediation and development, heavy civils and extensive marine construction works.

This 'in-house' capacity, whereby ABLE is effectively its own client, provides a level of service and expertise that sets it apart from many other 'similar' investors/developers and ensures that the group can provide a fast track design and construct service for clients in the shortest timescale.

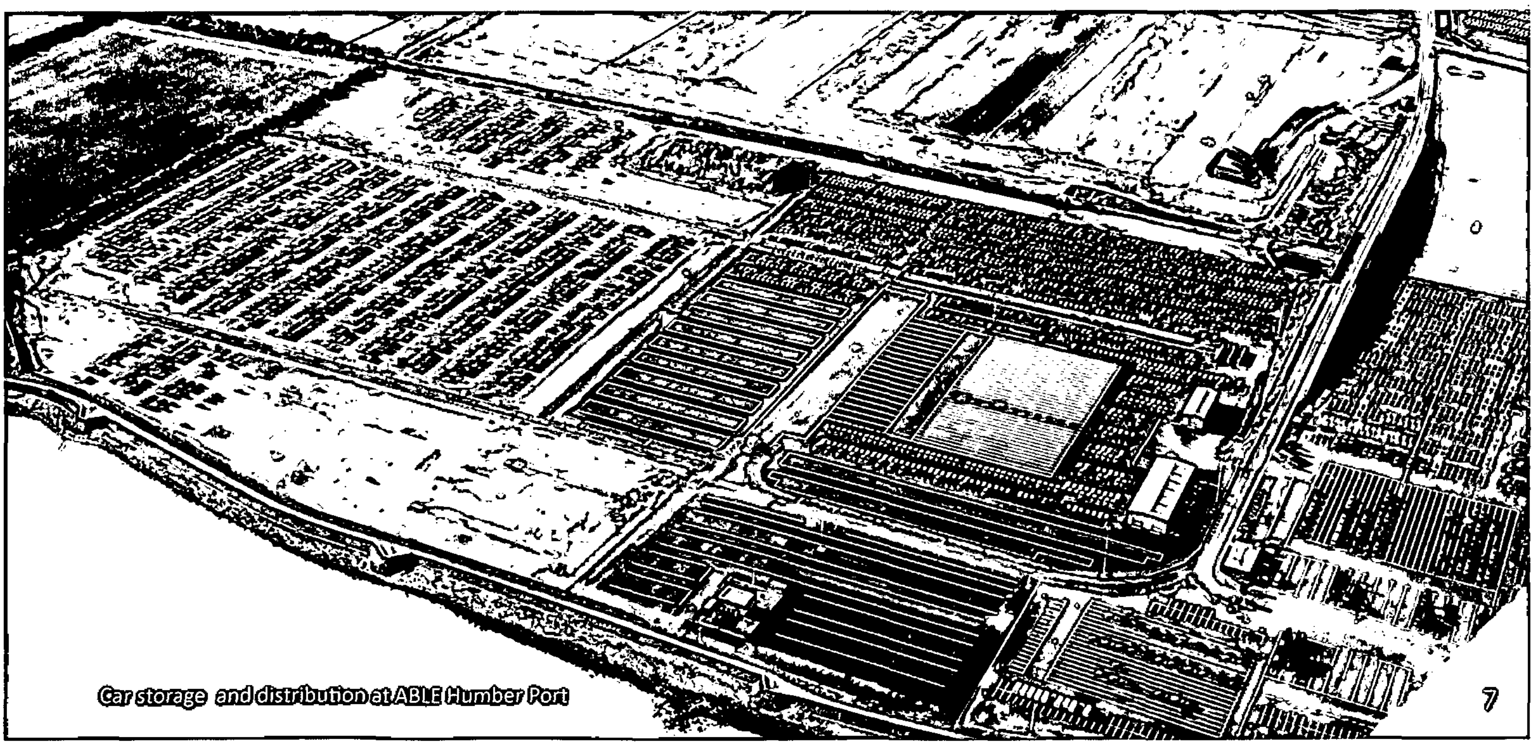
ABLE has been involved as the principal contractor on numerous contaminated land reclamation contracts including some of the largest undertaken in the UK and have included the reclamation of a ship facility (Faslane), a Tar works (Thomas Ness) on the river Tyne and the remediation of an oil storage facility for the MOD. In-house works have included the remediation and preparation of land for residential development. ABLE has undertaken its own remediation and development on the Group's sites.

At ASP ABLE has constructed new deep-water, heavy load bearing (40t/m2) Quays 10 and 11, 306m long; a fabrication hall, shot blasting shop, engineering building, stores and office & welfare facility for 150 persons.

2015 will see at ASP the completion of two new quays: Quay 6 as a precursor for the Shell Brent Decommissioning Project and Quay 1, a new multi-purpose quay.

At ABLE Humber Port, ABLE is currently developing a further 150 acres of land.

ABLE will continue the development works at AMEP which, by the end of 2015, will have seen the laying of over 1m tonnes of stone with scheduled works to construct new access roads and provide the appropriate infrastructure for utilities.



Car storage and distribution at ABLE Humber Port

Strategic report *(continued)*

Decommissioning

ABLE has a wide range of specialist skills for decommissioning, demolition, dismantling, reclamation and remediation projects employing conventional and specialist methods.

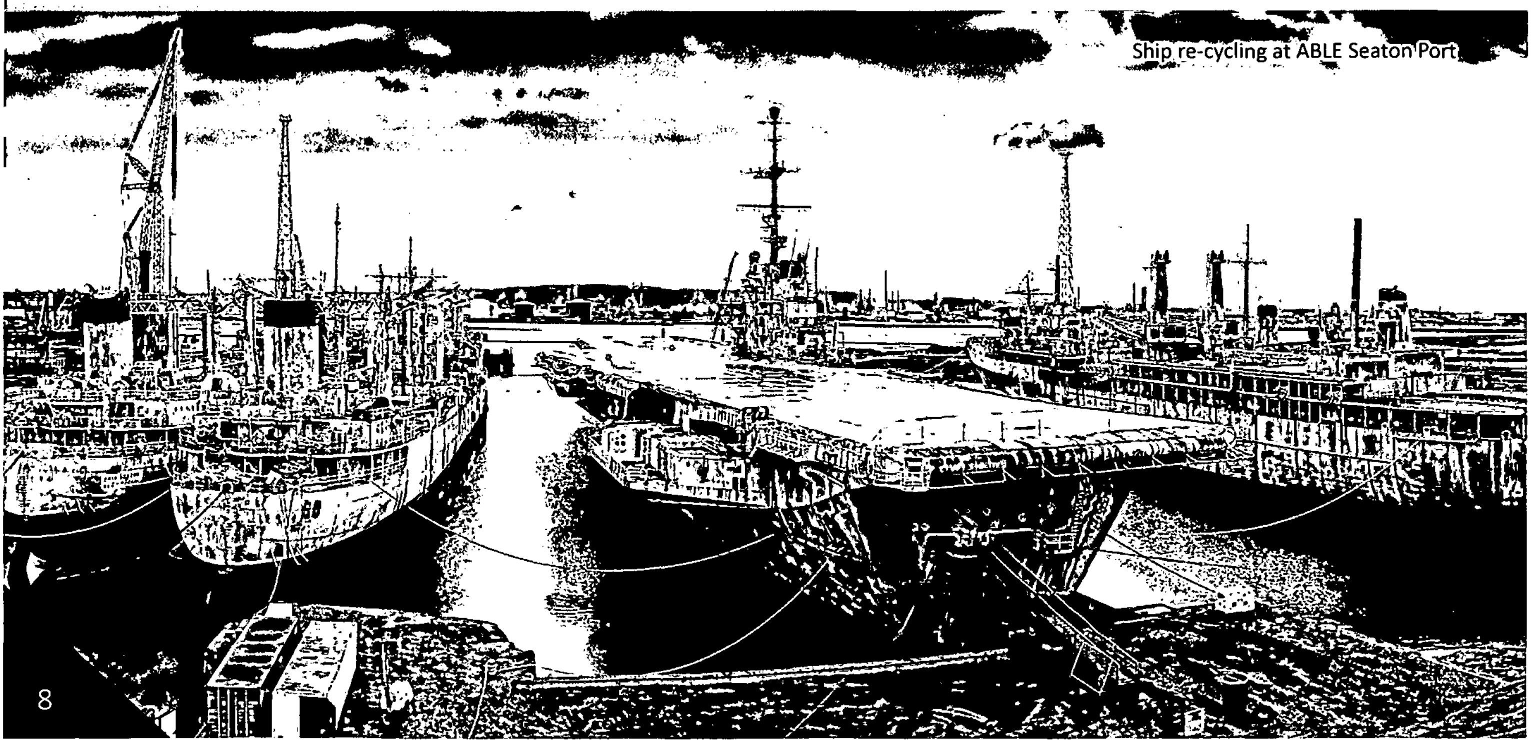
With over 45 years' experience, ABLE has applied this knowledge and expertise across the complete spectrum of decommissioning activities including power stations, nuclear facilities, offshore and marine structures and ships, gas works, marine demolition, petrochemical plants, oil and gas installations, cooling towers, chimneys, tank farm storage facilities and bridges.

ABLE has generally concentrated on the larger and more complex decommissioning challenges and this experience and track record have secured its position as a UK market leader. As a consequence, the client base is invariably 'blue chip' with customers requiring the highest standards in terms of health safety and environmental performance in addition to addressing the complexity of the operational aspects and the commercial pre-requisites.

Since the mid 1980s, ABLE has been engaged in the decommissioning of redundant oil and gas platforms. From the Phillips Albusk Jell (1985) through to the BP North West Hutton (2010) ABLE has again established a position as a UK market leader. The BP North West Hutton has, thus far, been the largest structure of its type to be removed from the North Sea. The platform (20,000t) and jacket (10,000t) were successfully recycled (over 98%) and the contract was delivered in time and budget without any time-lost accidents.

In 2010 ABLE also completed the recycling of a number of vessels with customers including both the US and French Governments. These high profile contracts (the largest undertaken within the UK) included the former French Flag Aircraft Carrier, Le Clemenceau.

In January 2014 ABLE was awarded a contract for decommissioning platforms from the Shell Brent field, initially comprising three platforms and one jacket. This contract will, for the first time, see the deployment of the new 'game-changing' vessel – Allseas Pioneering Spirit – which, in a single offshore lift, can raise an entire platform or jacket. In order to accommodate the exacting requirements to receive these large structures, ABLE are constructing a new specialist heavy-duty quay at ABLE Seaton Port. The award of this prestigious contract reaffirms ABLE's pre-eminent position in the market.



Ship re-cycling at ABLE Seaton Port

Strategic report *(continued)*

Oil & gas upgrades
ABLE Seaton Port (ASP) is a well-established and successful base for the upgrading and maintenance works for oil and gas drilling rigs operating in the North Sea.

In the last 5 years over 20 rigs have been upgraded at ASP.

Much of this work is undertaken by ABLE which also provides significant business for the North East supply chain. In contrast to competing ports ABLE operates an effective 'open door' policy in respect of the contractors that rig operators wish to use. The works are many and varied from the full replacement of accommodation units and technical improvements through to critical and routine maintenance.

Property and development
The Group specialises in developing land for lease and has a blue chip client base across a range of business activities that represent a strong and varied covenant strength.

Able Humber Port (AHP), River Humber

The Group's Humber based land holdings extend to over 1,537 Ha (3,800 acres) essentially on the South Bank of the Humber and comprise land being developed for a variety of business and industrial uses and as environmental mitigation and compensation land. The main development is AHP, and features two large developments: AMEP and ALP. AHP also provides vehicle importation, storage and distribution occupying nearly 121 Ha (300 acres).

AMEP is a bespoke facility serving the needs of the burgeoning offshore renewable energy sector(s). The project, representing circa £450m investment, includes the construction of 1,525m of quays designed for a water depth of c.24m.

AMEP has gained considerable traction from both the emerging market and from the UK Government. It is the UK's largest Enterprise Zone and the project has received support (£14.9m), the majority of which has been received post year end, from the DCLG's Enterprise Zone Capital Grant Fund. From a local perspective, AMEP represents a central plank of the Humber LEP's strategy and has the potential to create over 4,000 jobs.

ALP at 497 Ha (1,229 acres) is a development with detailed planning permission for 1,700,000m2 of new buildings, external storage space and a supporting business park.

ABLE Marine Energy Park Design

Strategic report *(continued)*

The Group also owns other sites across the north of England which include:

ABLE Seaton Port (ASP), River Tees

A multi-user port at the mouth of the River Tees and ABLE's principal marine operational base. ASP has seen considerable investment over the last seven years evidenced by the construction of two new heavy load-bearing (40t/m2) deep-water quays (designed to -15mCD), new buildings and a cofferdam at the entrance to the large 10 Ha (25 acre) dry dock.

Billingham Reach industrial estate (BRIE), River Tees

A thriving industrial estate - 21 Ha (52 acres) with 300m of quays. Tenants are essentially involved in the provision of industrial services. The site has planning permission for a 40MW waste wood fuelled biomass power station and the site also includes ABLE House, ABLE's headquarters which also includes a number of other tenants.

ABLE Thorpe Marsh (ATM), Doncaster

The 45 ha (111 acres) site has secured a Section 36 planning permission for a 1,500MW gas fuelled power station.

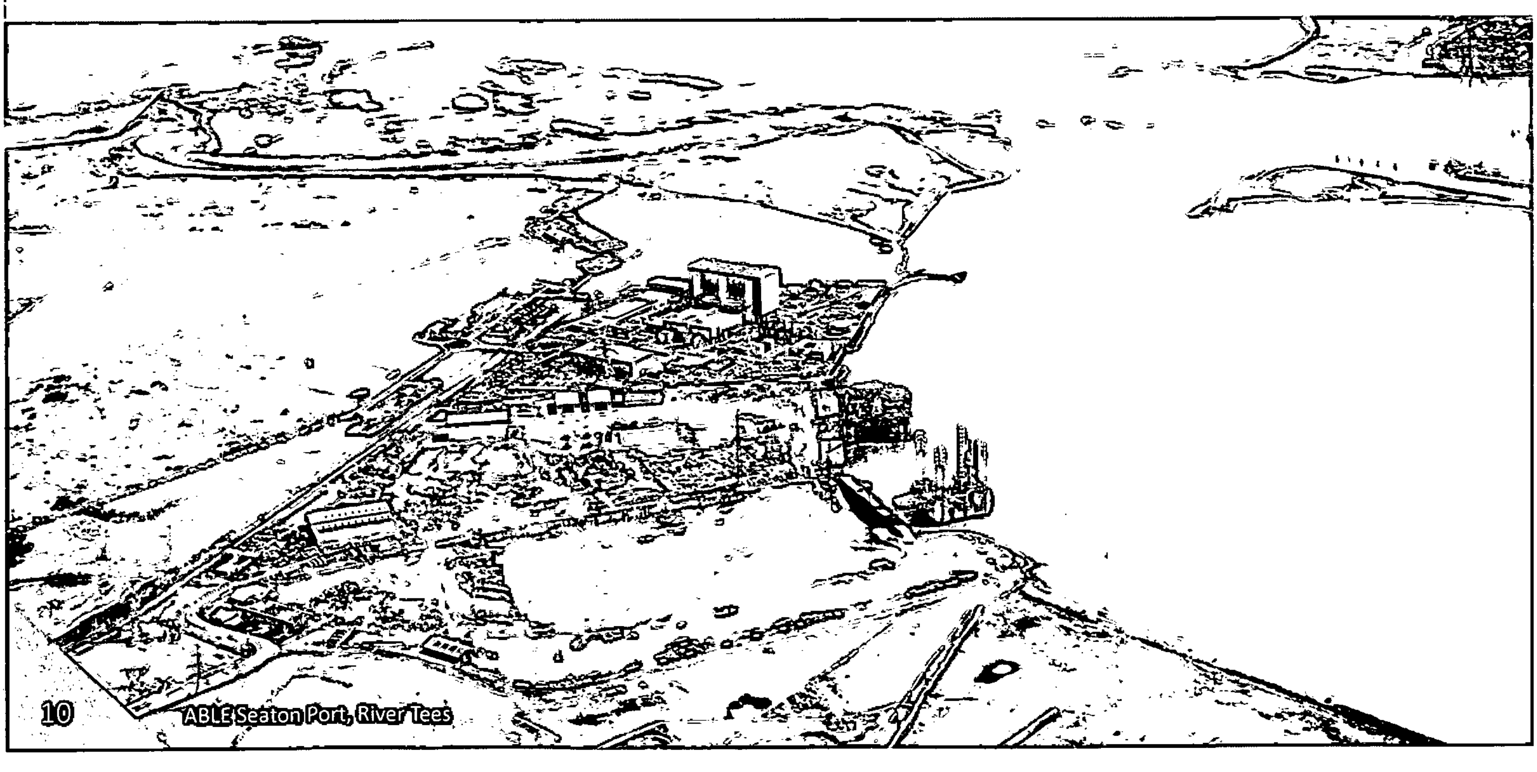
ABLE Clarence Port (ACP), River Tees

The 19 Ha (47 acre) site is located on the North bank of the River Tees. The site has planning permission for a 40MW waste wood fuelled biomass power station.

ABLE Middlesbrough Port (AMP), River Tees

The 16 Ha (40 acre) site, the former Davy/SLP fabrication yard. AMP has 6 quays, including a 220m 'FPSO' quay at -7mCD and a number of large fabrication halls with extensive internal craneage. The site is within one mile of Middlesbrough town centre and part of the site could be incorporated within the Middlehaven regeneration project being promoted by Middlesbrough Council.

Seaton Meadows Landfill, Hartlepool
One of the north of England's largest waste disposal sites with a remaining capacity of c. 600,000m3.



ABLE Seaton Port, River Tees

Strategic report *(continued)*

The Group also has a number of other industrial, office, residential and agricultural land holdings. In 2014 the Group also acquired a 71-acre industrial site at Immingham and c. 100 acres of potential housing land.

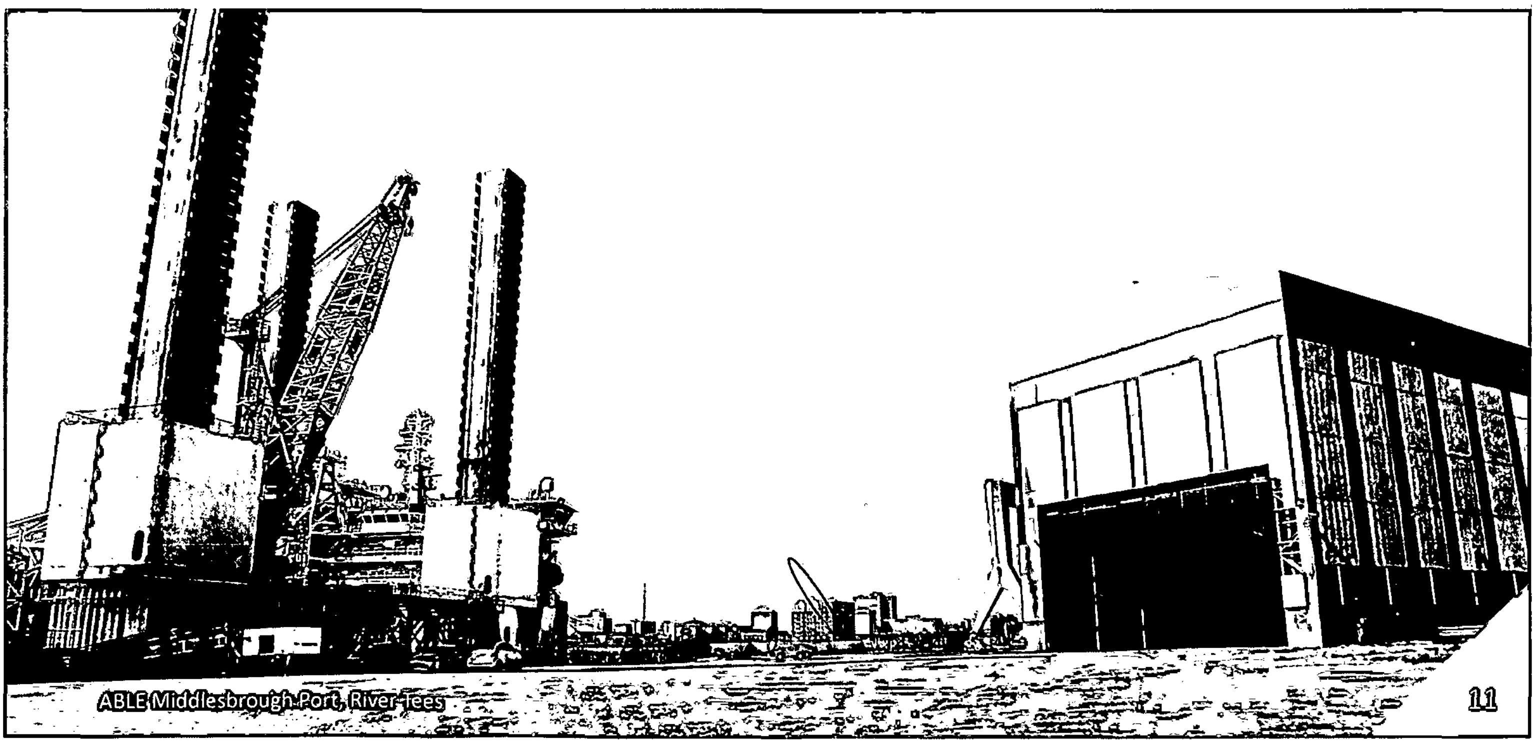
Future Developments

Construction of new quays on AMEP (1,525m) will commence in 2016 with the first quay being available Q4 2017.

The ALP development with commence in 2016 with the construction of a new roundabout and the main link road along with the first phase of site developments.

2016 is expected to see the construction of a new 122m dry dock gates to provide one of the world's largest dry docks.

AMP will be actively marketed as a new port logistics hub and it is anticipated that 2 new Tenants will be secured at BRIE in 2016.



ABLE Middlesbrough Port, River Tees

Strategic report *(continued)*

Other

ABLE owns and operates an extensive portfolio of capital equipment including a Liebherr LHM 600 SHL mobile harbour crane, to date the largest of its type in Europe and a fleet of self-propelled modular transporters (SPMT).

The equipment is used across ABLE and hired externally, it is an important element of ABLE's philosophy to provide all services required on their multi-user facilities. A concept pioneered by ABLE, that seeks to provide its own specialised equipment to a range of occupiers with a view to increasing utilisation and minimising both capital spend and the costs of plant mobilisation for clients. In 2015 ABLE will launched a new logistics division.

In addition to ABLE's construction capacity, it also has a significant design and engineering department that underpins ABLE's activities and includes both planning, environmental and engineering specialists.

ABLE has a number of accreditations which include:-

- BS EN ISO 9001: 2008 Quality Management System
- ISO 14001: 2004 Environmental Management System
- OHSAS 18001: 2007 Occupational Health & Safety Management System
- ISO 30000: 2009 Ship Recycling Management System

In 2014 the fully refurbished former Living Quarters of the BP North West Hutton was awarded the Green Apple Award for the Built Environment and Architectural Heritage.

ABLE has a track record of community engagement and annually publishes its statement on Corporate Responsibility. Under ABLE's chairmanship and sponsorship the year has seen the new Humber University Technical College at Scunthorpe secure £11m of funding and is set to open its doors to its first 14-18 year old cohort in September 2015. The year has also seen ABLE contributing towards a new Sports facility at North Lindsay College, Scunthorpe for use by the college and the general public, a new cycleway in North Lincolnshire, a new urban park in Middleborough, Improvements to Whitehead Municipal Park in Billingham and to a variety of other environmental projects.

Humber University Technical College
Scunthorpe Town Centre

Strategic report *(continued)*

Principal risks and uncertainties
The principal risk and uncertainties for the group are in land value, movement in steel scrap value and risks associated with construction and decommissioning activities.

With regards to land value the majority of the land is located either adjacent to deep-water and is therefore very suitable for port related activities or in industrial locations and is therefore suitable for heavy industry sectors, such as power generation, that continue to exhibit consistent growth. The majority of the land also has either detailed planning permissions or is allocated, within various Local Plans, for industrial use and is located in areas that both welcome and support economic development.

The various locations of the land lend themselves ideally for specialised industrial use, even through the recent recession, and certainly over the last decade land values have increased and appear to be set to continue in that vein for the foreseeable future.

The movement in scrap values is less predictable and subject to price volatility. However the group can demonstrate a very successful track record in this regard. Two factors are a major influence. Firstly the group's overall financial strength enables it to hold material whilst the price of steel (and with it scrap steel) remains depressed and to sell when the market is strong. Secondly, in the vast majority of cases, material is stored at facilities owned by the group so again pressures to sell are considerably reduced. It is also worth noting the group's Treasury department demonstrates a strong track record in generating profit in trading from items ranging from commodities through to shares and currency.

As far as risks associated with both the construction and decommissioning works are concerned the group enjoys a strong and leading role within the sectors. This reputation has been built on solid experience, delivery on the ground and through the careful assessment of overall project risk. Indeed, detailed analysis during the tender process characterises much of the group's efforts and this is undertaken by very experienced staff and can engage up to 70% of their time preparing appropriate plans. This approach has served the group well and avoids unexpected scenarios and increases both comfort and confidence in contract execution.

Directors' report

The directors present their report with the financial statements of the company for the year ended 31 December 2014.

Directors
The directors who served the company during the year and since the year end were as follows:
P M Stephenson
R Stephenson

Dividends
No dividends were paid during the year ended 31 December 2014 (2013: £nil). The directors do not recommend payment of a dividend.

Political contribution
The company has made no political donations, nor incurred any political expenditure during the year (2013: £nil).

Disclosure in the strategic report
Information regarding future developments has been included in the strategic report.

Statement as to disclosure of information to auditors
The directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware; and each director has taken all the steps that he or she ought to have taken as a director to make himself or herself aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

Auditor
Following the end of the current year, Cobham Murphy resigned as auditor and KPMG LLP were appointed.
Pursuant to section 487 of the Companies Act 2006 the auditor, KPMG LLP, will be deemed to be reappointed and KPMG LLP will therefore continue in office.

Statement of directors' responsibilities in respect of the annual report and the financial statements

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare group and parent company financial statements for each financial year.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the group and parent company and of their profit or loss for that period. In preparing each of the group and parent company financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRSs as adopted by the EU; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the group and the parent company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the parent company's transactions and disclose with reasonable accuracy at any time the financial position of the parent company and enable them to ensure that its financial statements comply with the Companies Act 2006. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the group and to prevent and detect fraud and other irregularities.

Independent auditor's report to the members of Able UK Limited

We have audited the financial statements of Able UK Limited for the year ended 31 December 2014 set out on pages 18 to 51. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the EU and, as regards the parent company financial statements, as applied in accordance with the provisions of the Companies Act 2006.

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of directors and auditor

As explained more fully in the Directors' Responsibilities Statement set out on page 15, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit, and express an opinion on, the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

A description of the scope of an audit of financial statements is provided on the Financial Reporting Council's website at www.frc.org.uk/auditscopeukprivate.

Opinion on financial statements

In our opinion:

- the financial statements give a true and fair view of the state of the group's and of the parent company's affairs as at 31 December 2014 and of the group's profit for the year then ended;
- the group financial statements have been properly prepared in accordance with IFRSs as adopted by the EU;
- the parent company financial statements have been properly prepared in accordance with IFRSs as adopted by the EU and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion the information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Independent auditor's report to the members of Able UK Limited *(continued)*

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

1 Accounting policies

Able UK Limited (the "Company") is a company incorporated and domiciled in the UK.

The group financial statements consolidate those of the Company and its subsidiaries (together referred to as the "Group"). The parent company financial statements present information about the Company as a separate entity and not about its group.

Both the parent company financial statements and the group financial statements have been prepared and approved by the directors in accordance with International Financial Reporting Standards as adopted by the EU ("Adopted IFRSs"). On publishing the parent company financial statements here together with the group financial statements, the Company is taking advantage of the exemption in s408 of the Companies Act 2006 not to present its individual income statement and related notes that form a part of these approved financial statements.

The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these consolidated financial statements and in preparing an opening IFRS balance sheet at 1 January 2013 for the purposes of the transition to Adopted IFRSs.

Judgements made by the directors, in the application of these accounting policies that have significant effect on the financial statements and estimates with a significant risk of material adjustment in the next year are discussed in note 26.

1.1 Transition to Adopted IFRSs

Both the Group and the Company are preparing their financial statements in accordance with Adopted IFRS for the first time and consequently both have applied IFRS 1. An explanation of how the transition to Adopted IFRSs has affected the reported financial position, financial performance and cash flows of the Group is provided in note 27.

IFRS 1 grants certain exemptions from the full requirements of Adopted IFRSs in the transition period. The following exemptions have been taken in these financial statements:

- *Business combinations* - Business combinations that took place prior to 1 January 2013 have not been restated.

1.2 Restatement

In addition to adoption of IFRS, the financial statements of company have, for the first time, been prepared on a consolidated basis, on the basis that this more accurately reflects the relationship between the company and The Land Development Trust. In making this assessment the directors have considered that all the assets held by the Land Development Trust are available for the future benefit of the company and that the company has the ability to influence the returns from those assets until the assets vest unconditionally in identified beneficiaries (at which point the assets would be treated as disposed). The other entities included in these consolidated accounts and their relationship with Able UK Limited, is explained in note 11. The impact of the restatement is explained in note 27.

1.3 Measurement convention

The financial statements are prepared on the historical cost basis except that the following assets and liabilities are stated at their fair value: financial instruments classified as available-for-sale, investment property and freehold land and buildings.

1.4 Going concern

The company's business activities, together with the factors likely to affect its future development, performance and position are set out in the Strategic Report on pages 2 to 6.

The company has considerable financial resources together with long-term contracts with a number of customers and suppliers. As a consequence, the directors believe that the company is well placed to manage its business risks successfully despite the current uncertain economic outlook.

The directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the annual financial statements.

Notes *(continued)*

1 Accounting policies *(continued)*

1.5 Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. In making this assessment the directors have considered that all the assets held by the Land Development Trust are available for the future benefit of the company and that the company has the ability to influence the returns from those assets until the assets vest unconditionally in identified beneficiaries (at which point the assets would be treated as disposed). The acquisition date is the date on which control is transferred to the acquirer. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated.

Separate parent company financial statements

In the parent company financial statements, all investments in subsidiaries, joint ventures, and associates are carried at cost less impairment.

1.6 Foreign currency

Transactions in foreign currencies are translated to the respective functional currencies of Group entities at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated to the functional currency at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the income statement.

1.7 Classification of financial instruments issued by the Group

Following the adoption of IAS 32, financial instruments issued by the Group are treated as equity only to the extent that they meet the following two conditions:

(a) they include no contractual obligations upon the company (or group as the case may be) to deliver cash or other financial assets or to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable to the company (or group); and

(b) where the instrument will or may be settled in the company's own equity instruments, it is either a non-derivative that includes no obligation to deliver a variable number of the company's own equity instruments or is a derivative that will be settled by the company's exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.
To the extent that this definition is not met, the proceeds of issue are classified as a financial liability. Where the instrument so classified takes the legal form of the company's own shares, the amounts presented in these financial statements for called up share capital and share premium account exclude amounts in relation to those shares.

1.8 Non-derivative financial instruments

Non-derivative financial instruments comprise investments in equity and debt securities, trade and other receivables, cash and cash equivalents, loans and borrowings, and trade and other payables.

Trade and other receivables

Trade and other receivables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses.

Notes *(continued)*

1 Accounting policies *(continued)*

1.8 Non-derivative financial instruments (continued)

Trade and other payables

Trade and other payables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method.

Investments in debt and equity securities

Investments in equity securities held by the Group are classified as being available-for-sale and are stated at fair value, with any resultant gain or loss being recognised directly in equity (in the fair value reserve), except for impairment losses and, in the case of monetary items such as debt securities, foreign exchange gains and losses. When these investments are derecognised, the cumulative gain or loss previously recognised directly in equity is recognised in profit or loss. Where these investments are interest-bearing, interest calculated using the effective interest method is recognised in profit or loss.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits. The Group has no external borrowing.

1.9 Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Leases in which the Group assumes substantially all the risks and rewards of ownership of the leased asset are classified as finance leases. Where land and buildings are held under leases the accounting treatment of the land is considered separately from that of the buildings. Leased assets acquired by way of finance lease are stated at an amount equal to the lower of their fair value and the present value of the minimum lease payments at inception of the lease, less accumulated depreciation and less accumulated impairment losses. Lease payments are accounted for as described below.

Depreciation is charged to the income statement on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Land is not depreciated. Depreciation is provided against buildings over the estimated useful life of each property, to the extent that the residual value is lower than the carrying value.

The estimated useful lives are as follows:

Plant and equipment	4 - 10 years
Fixtures and fittings	3 years

The group recognises an annual depreciation charge in respect of its leased landfill site. This is based upon an annual assessment of the void capacity remaining at each financial year end compared to that of the previous financial year end.

Depreciation methods, useful lives and residual values are reviewed at each balance sheet date.

Notes *(continued)*

1 Accounting policies *(continued)*

1.10 Business combinations

Subject to the transitional relief in IFRS 1, all business combinations are accounted for by applying the acquisition method. Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group.

Acquisitions on or after 1 January 2013

For acquisitions on or after 1 January 2013, the Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognised amount of any non-controlling interests in the acquiree; plus
- the fair value of the existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When the excess is negative, a bargain purchase gain is recognised immediately in profit or loss.

Costs related to the acquisition, other than those associated with the issue of debt or equity securities, are expensed as incurred.

Acquisitions prior to 1 January 2013 (date of transition to IFRSs)

IFRS 1 grants certain exemptions from the full requirements of Adopted IFRSs in the transition period. The Group and Company elected not to restate business combinations that took place prior to 1 January 2013.

1.11 Investment property

Investment properties are properties which are held either to earn rental income or for capital appreciation or for both. Investment properties are stated at fair value.

Any gain or loss arising from a change in fair value is recognised in profit or loss. Rental income from investment property is accounted for as described in the revenue accounting policy.

1.12 Construction contract debtors

Construction contract debtors represent the gross unbilled amount for contract work performed to date. They are measured at cost plus profit recognised to date (see the revenue accounting policy) less a provision for foreseeable losses and less progress billings. Variations are included in contract revenue when they are reliably measurable and it is probable that the customer will approve the variation itself and the revenue arising from the variation. Claims are included in contract revenue only when they are reliably measurable and negotiations have reached an advanced stage such that it is probable that the customer will accept the claim. Cost includes all expenditure related directly to specific projects and an allocation of fixed and variable overheads incurred in the Group's contract activities based on normal operating capacity.

Construction contract debtors are presented as part of trade and other receivables in the balance sheet. If payments received from customers exceed the income recognised, then the difference is presented as deferred income in the balance sheet.

1.13 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs in bringing them to their existing location and condition. Raw materials and consumables are measured on the first-in first-out principle. In the case of work in progress, cost includes an appropriate share of overheads based on normal operating capacity.

Notes *(continued)*

1 Accounting policies *(continued)*

1.14 Impairment excluding inventories, investment properties and deferred tax assets

Financial assets (including receivables)

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through profit or loss.

Non-financial assets

The carrying amounts of the Group's non-financial assets, other than investment property, inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill, and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year at the same time.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit"). The goodwill acquired in a business combination, for the purpose of impairment testing, is allocated to cash-generating units, or ("CGU"). Subject to an operating segment ceiling test, for the purposes of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment is tested reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to groups of CGUs that are expected to benefit from the synergies of the combination.

An impairment loss is recognised if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units, and then to reduce the carrying amounts of the other assets in the unit (group of units) on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

1.15 Employee benefits

Defined contribution plans
A defined contribution plan is a post-employment benefit plan under which the company pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement in the periods during which services are rendered by employees.

Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

Notes *(continued)*

1 Accounting policies *(continued)*

1.16 Revenue

Revenue represents amounts earned during the year for goods and services net of VAT and trade discounts. Profit is recognised on long-term contracts, if the final outcome can be assessed with reasonable certainty, by including in the profit and loss account revenue and related cost of sales as contract activity progresses. Revenue is calculated as that proportion of total contract value which costs to date bear to total expected costs for the contract.

Rental income is recognised on an accruals basis.

1.17 Expenses

Operating lease payments

Payments made under operating leases are recognised in the income statement on a straight-line basis over the term of the lease. Lease incentives received are recognised in the income statement as an integral part of the total lease expense.

Financing income and expenses

Financing expenses comprise interest payable, finance charges on shares classified as liabilities and finance leases recognised in profit or loss using the effective interest method, unwinding of the discount on provisions, and net foreign exchange losses that are recognised in the income statement (see foreign currency accounting policy). Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that takes a substantial time to be prepared for use, are capitalised as part of the cost of that asset. Financing income comprise interest receivable on funds invested, dividend income, and net foreign exchange gains.

Interest income and interest payable is recognised in profit or loss as it accrues, using the effective interest method. Dividend income is recognised in the income statement on the date the entity's right to receive payments is established. Foreign currency gains and losses are reported on a net basis.

1.18 Taxation

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of goodwill; the initial recognition of assets or liabilities that affect neither accounting nor taxable profit other than in a business combination, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. For investment property that is measured at fair value deferred tax is provided at the rate applicable to the sale of the property except for that part of the property that is depreciable and the Group's and the Company's business model is to consume substantially all of the value through use. In the latter case the tax rate applicable to income is used.

Notes *(continued)*

2 Revenue

	2014 £000	2013 £000
Rental income	11,041	7,315
Rendering of services and construction works	22,069	9,090
Farm sales	186	198

Reconciliation of effective tax rate

	2014	2013
	£000	£000
Profit for the year	**23,436**	5,614
Total tax expense	**884**	546
Profit excluding taxation	**24,320**	6,160
Tax using the UK corporation tax rate of 21.5 % (2013: 20.0%)	**5,229**	1,232
Reduction in tax rate on deferred tax balances	**(21)**	-
Non-deductible expenses	**138**	15
Tax exempt revenues	**(4,462)**	(701)
Total tax expense	**884**	546

Factors that may affect future current and total charge
A reduction in the UK corporation tax rate from 24% to 23% (effective 1 April 2013) was substantively enacted on 3 July 2012. Further reductions to 21% (effective from 1 April 2014) and 20% (effective from 1 April 2015) were substantively enacted on 2 July 2013. In the Budget on 8 July 2015, the Chancellor announced additional planned reductions to 18% by 2020. This will reduce the group's and company's future current tax charge accordingly. The deferred tax liability at 31 December 2014 has been calculated based on the rate of 20% substantively enacted at the balance sheet date.

Balance at 31 December 2014	-	3,973	79	-	-	4,052
Net book value						
At 1 January 2013	70,240	914	13	-	-	71,167
At 31 December 2013 and 1 January 2014	69,169	4,084	3	-	59	73,315
At 31 December 2014	**54,212**	**5,488**	**-**	**-**	**1,807**	**61,507**

The fair value of land and buildings was determined by external, independent property valuers, having the appropriate and recognised professional qualifications and recent experience in the location and category of the property being valued. The independent valuers provide the fair value of the Group's investment property portfolio when the directors consider there to be a significant change in fair value.

Land and buildings were valued on an open market basis as at 5 April 2015 by Dodds Chartered Surveyors. Any significant capital expenditure between the balance sheet date and the date of the valuation have been adjusted for in determining the fair value as at 31 December 2014.

If freehold land and buildings had not been revalued they would have been included at their historical cost of £59,060,000 *(2013: £71,092,000)*. Accumulated depreciation under the historical cost convention would be £3,071,000 *(2013:£1,932,000)*.

	10	10
Shares classified as liabilities	-	-
Shares classified in shareholders' funds	10	10
	10	10

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company.

Fair value reserve

The fair value reserve includes the cumulative net change in the fair value of available-for-sale financial assets until the investment is derecognised or impaired.

Revaluation reserve

Where property, plant and equipment is revalued or reclassified as investment property, the cumulative increase in the fair value of the property at the date of reclassification in excess of any previous impairment losses is included in the revaluation reserve.

Capital contribution reserve

The capital contribution reserve relates principally to the land and buildings transferred to the settlement known as The Land Development Trust, which is a discretionary trust. Disposal of these assets will be recognised in the accounting period in which the assets vest unconditionally in identified beneficiaries. Such an event would therefore reduce the capital of the Group and Company.

21 Operating leases

Non-cancellable operating lease rentals are payable as follows:

	Group 2014 £000	2013 £000	Company 2014 £000	2013 £000
Less than one year	-	-	1,233	1,185
	-	-	1,233	1,185

The company leases properties from another member of the group in order to carry out its trade. These leases are renewed on an annual basis. The group has no external operating leases.

Notes *(continued)*

21 Operating leases *(continued)*

Group

During the year £nil was recognised as an expense in the income statement in respect of operating leases *(2013:£nil).*

Company

During the year £1,185,292 was recognised as an expense in the income statement in respect of operating leases *(2013:£1,139,704).*

Leases as lessor

Certain investment properties are let under operating leases. The future minimum lease payments under non-cancellable leases are as follows:

	Group 2014 £000	2013 £000	Company 2014 £000	2013 £000
Less than one year	5,262	5,381	-	-
Between one and five years	3,160	8,221	-	-
More than five years	1,692	1,893	-	-
	10,114	15,495	-	-

During the year £5,381,000 *(2013:£5,242,000)* was recognised as rental income by the Group in respect of operating leases.

22 Contingencies

Group and company

The group and company has entered into a performance guarantee with a value of £1,188,000 *(2013: £1,188,000)* for the benefit of a customer.

23 Financial risk management

The group's and company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including foreign currency risk and interest rate risk). This note address each of these matters in turn, and also gives certain fair value disclosures and details of the Group and Company's capital management objectives.

a) Credit risk

Credit risk is the risk of a financial loss to the group and company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The carrying amount of financial assets is as follows:

	Group 2014 £000	2013 £000	Company 2014 £000	2013 £000
Trade and other receivables	11,131	4,456	11,269	4,494
Other receivables - land debtor	11,962	-	-	-
Cash and cash equivalents	26,126	29,514	8,295	2,611
	49,219	33,970	19,564	7,105

No amounts are past due in the current or prior year so the risk arises principally in respect of the counterparty to the Group's and Company's cash deposits.

Notes *(continued)*

23 Financial risk management *(continued)*

b) Liquidity risk

Liquidity risk is the risk that the group or company will not be able to access the necessary funds to finance its operations.

The carrying amount of the company's financial liabilities is as follows:

	Group 2014 £000	2013 £000	Company 2014 £000	2013 £000
Trade and other payables	**6,035**	8,248	**14,288**	3,034
Other interest -bearing loans and borrowings	**-**	-	**4,124**	3,122
	6,035	8,248	**18,412**	6,156

The Group finances its operations through profits generated from operations. The Group manages its liquidity risk by monitoring existing and committed funding against forecast requirements. The Group has no external debt and the liquidity risk is not considered significant.

The interest bearing borrowings in the Company relate to items of plant and machinery leased from other members of the Group as described in note 17.

The following are contractual maturities of financial liabilities, including estimated interest payments:

Group

				As at 31 December 2014	
	Carrying amount £000	**Contractual cash flows £000**	**1 year or less £000**	**1 to 2 years £000**	**2 to 5 years £000**
Trade and other payables	**6,035**	**6,035**	**6,035**	**-**	**-**

				As at 31 December 2013	
	Carrying amount £000	Contractual cash flows £000	1 year or less £000	1 to 2 years £000	2 to 5 years £000
Trade and other payables	8,248	8,248	8,248	-	-

Notes *(continued)*

23 Financial risk management *(continued)*

Company

	Carrying amount £000	**Contractual cash flows £000**	**1 year or less £000**	**As at 31 December 2014 1 to 2 years £000**	**2 to 5 years £000**
Trade and other payables	**14,288**	**14,288**	**14,288**	**-**	**-**

	Carrying amount £000	Contractual cash flows £000	1 year or less £000	As at 31 December 2013 1 to 2 years £000	2 to 5 years £000
Trade and other payables	3,034	3,034	3,034	-	-

The timing of cash flows and estimated interest payments for the Company in respect of finance leases are described in note 17.

c) *Market risk – Foreign currency risk*

Foreign currency risk reflects the company's exposure to fluctuations in foreign exchange rates on its financial assets and liabilities.

The group's exposure to foreign currency risk is immaterial and therefore does not merit further disclosure.

d) *Market risk – Interest rate risk*

Interest rate risk reflects the company's exposure to fluctuations in interest rates. The interest rate profile of the Group's and Company's interest bearing financial instruments is as follows:

	Group 2014 £000	2013 £000	**Company 2014 £000**	2013 £000
Cash and cash equivalents	**26,126**	29,514	**8,295**	2,611

The Group and Company have no interest bearing borrowings so the only potential exposure is in respect of the interest earned on its cash deposits.

e) *Fair value of financial instruments*

No financial instruments are carried at fair value in either the current or prior years except for the portfolio of equity securities (see note 12). Fair value is derived from quoted share prices in active markets and is therefore considered Level 1 in the IFRS 13 hierarchy. The fair value of all other financial instruments is equal to their carrying value in the current and prior year.

f) *Capital management*

The group's capital comprise cash and cash equivalents, retained earnings and the capital contribution reserve, all defined as per the group balance sheet. The group's capital management objectives are to generate sufficient funds to fund the group's strategy.

The capital contribution reserve relates principally to the land and buildings transferred to the settlement known as The Land Development Trust, which is a discretionary trust. Disposal of these assets will be recognised in the accounting period in which the assets vest unconditionally in identified beneficiaries. Such an event would therefore reduce the capital of the Group.

25 Ultimate controlling party

The ultimate controlling party is P M Stephenson by virtue of his shareholding.

Notes *(continued)*

26 Accounting estimates and judgements

Critical accounting judgements

In the process of applying the Group's accounting policies, management has made the following key judgements which have the most significant effect on the amounts recognised in the financial statements (apart from those involving estimation which are dealt with below):

Tangible fixed assets and investment properties

Management has decided to adopt the fair value model as opposed to the cost model when accounting for the land and buildings held within tangible fixed assets and investment properties. This valuation basis provides a more accurate measurement of the value of the assets to the Group.

Key sources of estimation uncertainty

The key areas requiring the use of estimates which may significantly affect the financial statements are as follows:

Revenue recognition on construction contracts

The principal estimation technique used by the Group in attributing profit on contracts to a particular period is the preparation of forecasts on a contract by contract basis. These focus on revenue and costs to complete and enable an assessment to be made on the final out-turn on each contract. Variations during the course of contracts are taken into account but invariably are only finalised at completion. This can lead to previous estimates being amended which may affect the final profit to be recognised on the contract.

Fair values of tangible fixed assets and investment properties

Management engages an independent, qualified surveyor to ascertain the value of these assets. This review is based on a site by site consideration of the assets and the market conditions existing at the date of the valuation. The Board considers any changes between the market conditions at the date of valuation and the balance sheet date and if any significant deterioration in market conditions is identified, then the impairment of these assets is considered accordingly.

27 Explanation of consolidation and transition to Adopted IFRSs - Group

As stated in note 1, these are the Group's first consolidated financial statements prepared in accordance with Adopted IFRSs.

The accounting policies set out in note 1 have been applied in preparing the financial statements for the year ended 31 December 2013, the comparative information presented in these financial statements for the year ended 31 December 2013 and in the preparation of an opening IFRS balance sheet at 1 January 2013 (the Group's date of transition).

In preparing its opening IFRS balance sheet, the Group has adjusted amounts reported previously in financial statements prepared in accordance with its old basis of accounting (UK GAAP). An explanation of how the transition from UK GAAP to Adopted IFRSs has affected the Group's financial position, financial performance and cash flows is set out in the following tables and the notes that accompany the tables.

Restatement
In addition to the adoption of IFRS the company has presented consolidated financial statements for the first time as described in note 1.2. The impact of the consolidation on amounts previously reported in the financial statements is also set out in the following table.
