The Directors are responsible for preparing the Directors' report and the financial statements in accordance with applicable law and regulations

Notes to the financial statements for the year ended 31 December 2012

1 Accounting policies

Basis of accounting

The financial statements are prepared on the going concern basis, under the historical cost convention, and in accordance with the Companies Act 2006 and applicable accounting standards in the United Kingdom

The Company is included in the consolidated financial statements of British American Tobacco p l c which is incorporated in the United Kingdom and registered in England and Wales. Consequently, the Company has taken advantage of the exemption from preparing consolidated financial statements under the terms of section 400 of the Companies Act 2006

The principal accounting policies have been applied consistently throughout the year and a summary is set out below

Cash flow statement

The Company is a wholly owned subsidiary of British American Tobacco p l c. The cash flows of the Company are included in the consolidated cash flow statement of British American Tobacco p l c which is publicly available. Consequently the Company has taken advantage of the exemption from preparing a cash flow statement under the terms of FRS1 (revised 1996) 'Cash flow statements'

Foreign currencies

Transactions arising in currencies other than sterling are translated at the rate of exchange ruling on the date of the transaction. Monetary assets and liabilities expressed in currencies other than sterling are translated at rates of exchange ruling at the end of the financial year. All exchange differences are taken to the profit and loss account in the year.

Accounting for income

Income is included in the profit and loss account when all contractual or other applicable conditions for recognition have been met. Provisions are made for bad and doubtful debts where there is an expectation that all or a portion of the amount due will not be recovered.

Taxation

Taxation provided is that chargeable on the profits of the year, together with deferred taxation.

The current income taxation charge is calculated on the basis of taxation laws enacted or substantially enacted at the balance sheet date.

Deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, where transactions or events that result in an obligation to pay more taxation in the future or a right to pay less taxation in the future have occurred at the balance sheet date.

A net deferred taxation asset is recognised as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits against which to recover carried forward taxation losses and from which the future reversal of underlying timing differences can be deducted.

Notes to the financial statements for the year ended 31 December 2012

1 Accounting policies (continued)

Deferred taxation is measured at the average taxation rates that are expected to apply in the periods in which the timing differences are expected to reverse based on taxation rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred taxation is measured on an undiscounted basis.

Fixed asset investments

Fixed asset investments are stated at cost less provisions for any impairment in value. Any impairment is recognised in the profit and loss account in the period in which it arises.

Dividends

Dividends payable that are unapproved at the year end are not recognised as a liability. Similarly, dividend income is recognised at the same time as the paying company recognises the liability to pay a dividend.

2 Other operating charges

Auditors' fees of £2,500 were borne by a fellow Group undertaking (2011: £2,500).

There were no employees (2011: none) and no staff costs during the year (2011: £nil).
