HUNTLEIGH INTERNATIONAL HOLDINGS LIMITED

STRATEGIC REPORT

The directors present their strategic report for the year ended 31 December 2016.

PERFORMANCE REVIEW

The company's principal activity is that of an investment company.

The results for the year are set out in the profit and loss account on page 5. The directors are satisfied with the result achieved by the company and expect the level of activity to be similar in the year ahead.

PRINCIPAL RISKS AND UNCERTAINTIES

The company's operations expose it to interest rate risk. The company has in place a risk management programme that seeks to limit the adverse effects on the financial performance of the company by monitoring levels of intercompany debt and the related finance costs.

Given the size of the company, the directors have not delegated the responsibility of monitoring financial risk management to a sub-committee of the board. The policies set by the board of directors are implemented by the company's finance department.

Interest rate cash flow risk

The company has interest bearing liabilities. Interest bearing liabilities include only loans from fellow group companies, all of which earn interest at a fixed rate. The group's existing intercompany debt is at fixed rates. The directors will revisit the appropriateness of this policy should the company's operations change in size or nature.

Further information about risks and their mitigation thereof is outlined on pages 42, 43 and 74 of the Getinge Group's 2016 annual report.

Currency risks

There are no payments as a result of sales income and expenses for goods sold in foreign currencies to cause currency exposure that affects company profits in the event of exchange rate fluctuations.

Credit risks

The company's principal financial assets are other receivables and investments. Commercial credit risks are limited due to the company being a holding company.

The company has no significant concentration of credit risk with exposure spread over a large number of counterparties, customers and countries.

Price risks

The company is not subject to price risk on sale of goods to third parties. Other purchases and sales are between group companies where group policy and direction ensures that prices are fair and result in a commercial return for the services provided.

Approved by the Board of Directors and signed on behalf of the Board

HUNTLEIGH INTERNATIONAL HOLDINGS LIMITED

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Year ended 31 December 2016

1. ACCOUNTING POLICIES (CONTINUED)

Financial instruments

The company has chosen to adopt the Sections 11 and 12 of FRS 102 in respect of financial instruments.

i) Financial assets

Basic financial assets including trade and other receivables, cash and bank balances are initially recognised at transaction price, unless the arrangement constitutes a financial transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest.

Such assets are subsequently carried at amortised cost using the effective interest method.

At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in profit or loss.

If there is decrease in the impairment loss arising from an event occurring after the impairment was recognised, the impairment is reversed. The reversal is such that the current carrying amount does not exceed what the carrying amount would have been had the impairment not previously been recognised. The impairment reversal is recognised in profit or loss.

ii) Financial liabilities

Basic financial liabilities, including trade and other payables, bank loans, loans from fellow group companies are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at market rate of interest.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade payable are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest rate.

Foreign currency

Transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction or, if hedged, at the forward contract rate. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are reported at the rates of exchange prevailing at that date or, if appropriate, at the forward contract rate.

Taxation

Taxation expense for the period comprises current and deferred tax recognised in the reporting period. Tax is recognised in the profit and loss account, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case tax is also recognised in other comprehensive income or directly in equity respectively.

i) Current tax

Current tax is the amount of income tax payable in respect of the taxable profit for the year or prior years. Tax is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the period end.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

The taxation assets and liabilities of the branch may be reduced wholly or in part by the surrender of losses to or from fellow group undertakings. The tax benefits arising from group relief are recognised in the financial statements of the surrendering or recipient companies, as appropriate.

HUNTLEIGH INTERNATIONAL HOLDINGS LIMITED

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Year ended 31 December 2016

1. ACCOUNTING POLICIES (CONTINUED)

ii) *Deferred tax*

Deferred tax arises from timing differences that are differences between taxable profits and total comprehensive income as stated in the financial statements. These timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements.

Deferred tax is recognised on all timing differences at the reporting date except for certain exceptions.

Unrelieved tax losses and other deferred tax assets are only recognised when it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the period end and that are expected to apply to the reversal of the timing difference.

Deferred tax assets and liabilities are not discounted.

Critical accounting judgements and estimation uncertainty

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.
