Notes to the Abbreviated Accounts

for the year ended 31 August 2016

1 Accounting policies

Basis of preparation

The accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2015).

Turnover

Turnover represents the value, net of value added tax and discounts, of goods provided to customers and work carried out in respect of services provided to customers.

Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives.

Plant and machinery 15% on reducing balance Motor vehicles 25% on reducing balance

Computer equipment 20% on cost Property improvements 10% on cost

Stocks

Stock is valued at the lower of cost and net realisable value. Cost is determined on a first in first out basis. Net realisable value represents estimated selling price less costs to complete and sell. Provision is made for slow moving, obsolete or damaged stock where the net realisable value is less than cost.

Deferred taxation

Full provision is made for deferred taxation resulting from timing differences between the recognition of gains and losses in the accounts and their recognition for tax purposes. Deferred taxation is calculated on an un-discounted basis at the tax rates which are expected to apply in the periods when the timing differences will reverse.

Leasing and hire purchase commitments

Assets held under finance leases and hire purchase contracts, which are those where substantially all the risks and rewards of ownership of the asset have passed to the company, are capitalised in the balance sheet and depreciated over their useful lives. The corresponding lease or hire purchase obligation is treated in the balance sheet as a liability.

The interest element of the rental obligations is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments $o\ u\ t\ s\ t\ a\ n\ d\ i\ n\ g\ .$

Rentals paid under operating leases are charged to income on a straight line basis over the lease term.

Provisions

Provisions are set up only where it is probable that a present obligation exists as a result of an

event prior to the balance sheet date and that a payment will be required in settlement that can be estimated reliably. Where material, provisions are calculated on a discounted basis.
