Principal accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention in accordance with applicable UK accounting standards. The principal accounting policies for the company are set out below. The accounting policies remain unchanged from previous years and the director considers them to be the most appropriate.

The financial statements present information about the undertaking as an individual and not about its group. The company is exempt under Section 408 of the Companies Act 2006 from the requirement to prepare group accounts, as it is a wholly owned subsidiary of Advanced Business Equipment Holdings Limited, a company incorporated in England, which prepares group accounts that include the company.

Cash flow statement

Under Financial Reporting Standard No 1 (Revised 1996) 'Cash flow statements' the company is exempt from the requirement to prepare a cash flow statement on the grounds that a parent undertaking includes the company in its own published consolidated financial statements.

Investments

Investments held as fixed assets are shown at cost less provision for impairment.

Financial instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities.

Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities. Financial liabilities are presented as such in the balance sheet. Finance costs and gains or losses relating to financial liabilities are included in the profit and loss account. Finance costs are calculated so as to produce a constant rate of return on the outstanding liability.

Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited direct to equity.
