Introduction and summary update

Introduction and summary update

Background

- This report covers the progress made in the Administrations and CVAs of those Companies listed in Appendix 1 for the six months since January 2018. The officeholders previous report to 8 January 2018 and earlier reports can be found at www.txuinfo.co.uk

Outstanding matters and recent developments

- Realisations by Holding Companies are now largely derived from distributions made by TXUEG, principally to TEG. The last distribution declared and paid by the BTL Companies including TXUEG was in August 2013 when TEG received £75.6 million.
- We are advised that a final distribution will be made by the BTL Companies including TXUEG following the resolution of the remaining issues in the BTL CVAs. Those issues comprise:
  - Finalising the treatment of potential contingent asbestos claims in TXU UK a "below the line" company which is a subsidiary of TXUEG and controlled by the BTL administrators;
  - Adjudicating claims received by TXU UK from certain former Eastern Electricity employees who are members of the Electricity Supply Pension Scheme; and
  - Agreeing the position regarding £16.7 million currently ring-fenced at TXUEG relating to distributions received from TXU UK and Direct Sales.
- The history of the TXU UK officeholders estimate of future potential uninsured asbestos liabilities and the claims experience to date are outlined in our previous reports to creditors. These claims relate to industrial injuries suffered by former employees of Eastern Electricity. We understand that the TXU UK officeholder's most recent estimate of uninsured potential future claims has reduced to between £5 million and £15.7 million. The reduction results from the relatively low number of claims received since the previous actuarial review in May 2016. The Insurance Industry working group estimate future asbestos claims could potentially continue to be received until 2050.
- In the fifteen years the TXU UK officeholders have been in office TXU UK has been called upon to pay a total of £408,000 in respect of the uninsured element of the 16 agreed and paid claims.
- The dual track approach, outlined in our previous report, for dealing with TXU UK and the potential contingent asbestos claims is currently on hold pending the outcome of the issue set out below.
- In January 2018 the TXU UK officeholders received notice of potential claims from a group of former Eastern Electricity employees who are members of the Electricity Supply Pension Scheme following the formal insolvency of their current employer. The TXU UK officeholders have subsequently received claims from in excess of 250 individuals.
- The TXU UK officeholders are considering the validity of the claims and the impact this will have on the BTL companies.
- The funds held in the BTL estates total £71.5 million and of this £29.8 million is potentially subject to the potential contingent asbestos claims and the pension claims in TXU UK. We have continued to press the BTL officeholders to distribute the free funds of £42 million whilst a suitable solution is found for dealing with the other outstanding issues. The only parties which have an interest in the free funds are the ATL companies and the ATL creditors.

Introduction and summary update (cont.)

Realisations and distributions to creditors

- The Holding Companies have to date received £470 million from TXUEG.
- TEG will be due further funds from the final TXUEG liquidation distribution subject to the resolution of the issues mentioned above, the agreement of the BTL officeholders' costs and tax clearance. The total funds held by the BTL Companies amount to approximately £71.5 million. It is unclear at present when the final TXUEG distribution will take place.
- The total amount distributed by the Supervisors of the Holding Companies to external (non-group) creditors is £883.4 million. In the CVA proposal the estimated total distribution to external (non-group) creditors was £569 million and further distributions of significant value are still to be made.
- Details of the distributions paid to date and future estimated distributions assuming TEG receives the surplus funds from TXUEG, are shown on page 10 of this report.

Creditors and Distributions

- Claims received and agreed or rejected pursuant to the CVA, their values as at 19 November 2002 and 7 January 2005 and the amounts distributed in respect of such claims are set out in the table below. The differences in the values of claims as at 19 November 2002 and 7 January 2005 relate to movements in foreign currency exchange rates and capitalised interest. Some claims are set at 19 November 2002 values because of their particular nature.

We make the following observations in relation to the table above:

- There remains considerable uncertainty regarding the level of future realisations from the BTL companies due to the impact of the contingent asbestos claims and pension claims in TXU UK on the funds available for distribution to TEG. We have therefore calculated the future distributions on a best and worst case scenario.
- The above estimated outcome is illustrative only and should not be relied upon as guidance as to the actual outcomes for creditors. The EGO BV bonds have received a total of 100p in the £ as a result of their claims at EGO BV, TXUEL and EH3. Similarly the Barcap Claim has received a total of 100p in the £ on its claim as a result of its claims at EH3 and TXUEL.
- It is likely that there will be at least two further payments to creditors; when funds are received by the Holding Companies from the Operating Companies and when the issues which remain to be dealt with within the TXUEL Group have been resolved.
- The final distribution will be contingent upon receipt of tax clearance from HM Revenue & Customs.
- Due to the complex matrix of intercompany indebtedness distributions are made with the assistance of the model which reflects the terms regarding distributions set out in the CVAs. The gross intercompany distributions calculated by the model are considerably inflated due to its iterative nature. The figures shown represent the output from the model for external third party creditors.
