NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31 DECEMBER 2009

1 Accounting policies

1.1 Accounting convention

The financial statements are prepared under the historical cost convention

The financial statements are prepared on a going concern basis which the directors believe to be appropriate

The company is dependent for its working capital on funds provided to it by Totally Plc, the company's ultimate and immediate holding undertaking. Totally Plc has indicated that for at least 12 months from the date of approval of these financial statements, it will continue to make available such funds as are needed by the company and in particular will not seek repayment of the amounts currently made available. This should enable the company to continue in operational existence for the foreseeable future by meeting its liabilities as they fall due for payment. However, the ability of Totally Plc to provide this support is in turn dependent upon Totally Plc and its group continuing to operate as a going concern for the forseeable future.

Inherently, there can be no certainty in relation to these matters. However, the directors of Totally Communications Limited have no reason to believe either that Totally Plc will not be able to continue providing the necessary support to the company or that it will not do so and therefore believe that the going concern basis of preparation continues to be appropriate. The financial statements do not include any adjustments that would result from a withdrawal of this support.

The company has taken advantage of the exemption in Financial Reporting Standard No 1 (Revised 1996) from the requirement to produce a cash flow statement on the grounds that it is a subsidiary undertaking where 90 percent or more of the voting rights are controlled within the group

1 2 Compliance with accounting standards

The financial statements are prepared in accordance with applicable United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice), which have been applied consistently (except as otherwise stated)

13 Turnover

Turnover is recognised to the extent that it is probable that the economic benefits will flow to the company and can be reliably measured. Turnover represents the amounts, excluding value added tax, derived from marketing and technical services. Turnover is recognised in the profit and loss account on the accruals basis.

Turnover from technical services is recognised as contract activity progresses to the extent that revenue can be reliably measured. Hosting and maintenance income within technical services is spread on a straight line basis over the period to which the hosting and maintenance period relates.

1 4 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost less estimated residual value of each asset over its expected useful life, as follows

Computer equipment

Over 2 to 3 years

Fixtures, fittings & equipment

Over 2 to 3 years

15 Leasing

Rentals payable under operating leases are charged against income on a straight line basis over the lease term

16 Deferred taxation

Deferred taxation is provided in full in respect of taxation deferred by timing differences between the treatment of certain items for taxation and accounting purposes that have originated but not reversed at the balance sheet date. Provision is made at the rates expected to apply when the timing differences reverse and has not been discounted.

A net deferred tax asset is regarded as recoverable and therefore only recognised when, on the basis of all available evidence, it can be regarded as more likely than not there will be suitable taxable profits from which the future reversal of the underlying timing diffences can be deducted

1.7 Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. All differences are taken to profit and loss account.
