### 1 Accounting policies

#### 1.1 Accounting convention

The financial statements are prepared under the historical cost convention.

The financial statements are prepared on the basis of going concern, which assumes that the company will be in operational existence for the foreseeable future. This depends upon the continued support of the shareholders who have undertaken to provide such support to enable the company to meet its debts as and when they fall due. The financial statements do not include any adjustments that would result if such support was withdrawn.

#### 1.2 Turnover

Turnover represents income wholly derived from company's principal activity.

#### 1.3 Tangible fixed assets and depreciation

Investment properties are included in the balance sheet at their open market value. Depreciation is provided only on those investment properties which are leasehold and where the unexpired lease term is less than 20 years.

Although this accounting policy is in accordance with the applicable accounting standard, SSAP 19, Accounting for investment properties, it is a departure from the general requirement of the Companies Act 1985 for all tangible assets to be depreciated. In the opinion of the director compliance with the standard is necessary for the financial statements to give a true and fair view. Depreciation or amortisation is only one of many factors reflected in the annual valuation and the amount of this which might otherwise have been charged cannot be separately identified or quantified.

#### 1.4 Investments

Fixed asset investments are stated at cost less provision for diminution in value.

#### 1.5 Deferred taxation

The accounting policy in respect of deferred tax has been changed to reflect the requirements of FRS19 - Deferred tax. Deferred tax is provided in full in respect of taxation deferred by timing differences between the treatment of certain items for taxation and accounting purposes. The deferred tax balance has not been discounted.

#### 1.6 Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. All differences are taken to profit and loss account.
