Cabot Financial Debt Recovery Services Limited

Strategic report For the year ended 31 December 2014

Overview

The Directors present their Strategic Report, Directors' Report and the financial statements of Cabot Financial Debt Recovery Services Limited (the "Company") for the year ended 31 December 2014.

The principal activity of the Company is that of a holding company and the funding of other companies within the Cabot Financial Limited group ("Group").

The Directors believe that the Group is the largest acquirer and manager of defaulted consumer debt from financial services companies in the United Kingdom based on the value of debt portfolios on its balance sheet at 31 December 2014.

From inception in 1998 to 31 December 2014, the Group has invested £1.3 billion in the acquisition of 1,071 loan portfolios with an aggregate face value of £12.2 billion, comprising 4.7 million customer accounts and generating a 120-Month ERC at 31 December 2014 of £1.6 billion. Over 98% of these loan portfolios (as measured by purchase price) were acquired from financial institutions.

The core strategy of the operating model is to generate cash-flow by maximizing cash collections over the life of the debt portfolios acquired, whilst ensuring we are treating our customers fairly. Since it began pursuing this strategy, the estimated future gross cash collections from its existing loan portfolios, or 120-Month ERC, has grown from £422 million as at 31 October 2009 to £1.6 billion at 31 December 2014.

The mission of the Group is to help all customers in their financial recovery. The Group promises its customers empathy and respect, individual treatment, positive experiences and fair outcomes.

Future developments

Following the Group acquisition of Marlin, the Group continues to build on its newly formed complementary capabilities to strengthen their combined position in the market place. By leveraging each other's core strengths, the Group is expanding their ability to grow revenues across a broad range of debt types and create further operational efficiencies by applying industry expertise and sharing best practices.

Business review and results

The Company made a profit for the year after taxation to 31 December 2014 of £4.2 million (2013: £24.3 million) which included dividends received from group undertakings of £5.0 million (2013: £25.0 million).

Principal risks and uncertainties

The Company is exposed through its operations to the following financial risks:

- Cash flow and credit risk
- Price risk
- Going concern and liquidity risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This section describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous periods unless otherwise stated in this section.

Cash flow and credit risk

The Company is a member of the Cabot Financial Limited Group ("Group") and therefore its financial risk management objectives and policies are intrinsically linked to those of the Group. Consolidated accounts for the Group are drawn up for Cabot Financial Limited.

The purchase and collection of defaulted consumer receivables carries a substantial amount of cash risk due to the underlying volatility in the collection characteristics of these assets. To mitigate these risks the Group has developed, and continues to refine detailed management reporting on individual portfolio performance and re-forecasts future collections on each portfolio on a monthly basis.

Due to the long-term nature of the collection strategies employed, the Company will continue to be exposed to possible changes in legislation and economic trends. To mitigate these risks, senior employees of the Group play an active role in trade and industry bodies to ensure that any changes in the legislative collections environment are monitored and assessed as soon as practically possible. To mitigate economic risk the Company does not generally enter into long-term fixed-price purchasing arrangements with duration of more than one year.

Price risk

The market within which the Company operates is highly competitive with a large number of buyers tendering for portfolios that come to market which requires cost-effective collection operations performed by the Company in respect of the portfolios owned by Group companies. The Company assesses the collection costs of each portfolio it services on behalf of related parties and agrees service fees accordingly. The Directors consider that substantial ongoing investment in this area will be key to the future success of the business.

Going concern and liquidity risk

The Company's core business is the purchase and recovery of defaulted loans and has exclusive servicing contracts with other members of the Group who collect monies on behalf of the Company. The Company's financial position is therefore partly dependent on the financial condition of the rest of the Group.

The financial position of the Company and liquidity position are described in the financial statements on pages 9 to 18. The Company made an operating loss for the year of £0.01 million (2013: operating profit of £0.001 million) and had net current liabilities at 31 December 2014 of £24.4 million (2013: £23.8 million), and had net shareholders' funds at 31 December 2014 of £0.9 million (2013: £1.5 million).

Cabot Financial Debt Recovery Services Limited

Strategic report (continued) For the year ended 31 December 2014

Principal risks and uncertainties (continued)

Going concern and liquidity risk (continued)

The Group has long-term debt financing at 31 December 2014 comprising of Senior Secured Loan Notes due 2019 of £265.0 million issued on 20 September 2012, Senior Secured Loan Notes due 2020 of £100.0 million issued on 2 August 2013, Senior Secured Loan Notes due 2021 of £175.0 million issued on 27 March 2014 and Senior Secured Loan Notes due 2020 of £150.0 million issued which were acquired during the course of the Marlin acquisition (£265.0 million and £100.0 million at 31 December 2013).

The Group meets its day to day working capital requirements, including the purchase of portfolios, through its own cash resources supplemented by a revolving credit facility and bank loans. The Group had a senior committed revolving credit facility of £85.0 million which matures in September 2017 (£85.0 million at 31 December 2013). The size of the revolving credit facility available to the Group was increased to £195.0 million post year end.

The assets of the Group have been pledged as security for the Senior Secured Loan Notes due 2019, 2020 and 2021 and the senior secured credit facility.

The Group has remained compliant during the year to 31 December 2014 with all the covenants contained in the notes issued and senior credit facility. The Group's latest forecasts and cash flow projections have been reviewed and do not indicate any significant uncertainty over the Group's ability to operate within the requirements of the financing arrangements in place and therefore to continue as a going concern.

After making enquiries, the Directors have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the annual report and accounts.

The Company has taken advantage of the exemption from preparing consolidated financial statements afforded by section 400 of the Companies Act 2006 as it is a wholly owned indirect subsidiary of Cabot Financial Limited and its results are included in the consolidated financial statements of that company. These financial statements therefore present information about the Company as an individual entity alone.
