## Statement of accounting policies

The following accounting policies have been applied consistently in the company's financial statements

### **Basis of preparation**

The financial statements have been prepared on the going concern basis in accordance with applicable UK accounting standards, the Companies Act 2006 and under the historical cost accounting rules

The company is exempt by virtue of section 400 of the Companies Act 2006 from the requirement to prepare group financial statements on the grounds that it is included in the consolidated financial statements of a parent undertaking. These financial statements present information about the company as an individual undertaking and not about its group.

Under Financial Reporting Standard 1 'Cash flow statements' (revised 1996) the company is exempt from the requirement to prepare a cash flow statement on the grounds that a parent undertaking includes the company in its own publicly available consolidated financial statements.

As the company is a wholly owned subsidiary of Priory Group No 1 Limited, the company has taken advantage of the exemption contained in Financial Reporting Standard 8 'Related party disclosures' and has therefore not disclosed transactions or balances with entities which form part of the group.

### **Investments**

Investments held as fixed assets are shown at cost less provision for impairment.

### **Deferred taxation**

The charge for taxation is based on the profit for the period and takes into account taxation deferred.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date, where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date.

A deferred tax asset is recognised as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits against which to recover carried forward tax losses and from which the future reversal of underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured in a non-discounted basis.

### **Group relief**

Payment is generally made for group relief at the current tax rate at the time of first estimating the tax provision. To the extent that amendments are subsequently made to the group relief plan, there is generally no payment or receipt in respect of the change.
