Notes to the Abbreviated Financial Statements
For The Year Ended 31 December 2010

1. Accounting Policies

1.1. Accounting Convention

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

1.2. Turnover

Turnover comprises service and maintenance charges which are released to the profit and loss account to meet expenditure as it falls due

1.3. Tangible Fixed Assets and Depreciation

The freehold reversion of the property was transferred to the company on the 10 June 2002 for a consideration of nil value. With the inclusion of costs, however, expenditure of £40 was incurred and this is now reflected in the balance sheet - although no depreciation is provided in order to write this asset off over its estimated useful life as it is not considered to be material. (This event does not, however, constitute an overall change in the relationship between the company and its shareholders, all of whom continue to enjoy the remaining benefit of the long leases on their flats, as previously granted.)

1.4. Deferred Taxation

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted. Deferred taxation is measured on a non-discounted basis at the tax rates that are expected to apply in the periods in which the timing differences reverse, based on tax rates and the law enacted or substantively enacted at the balance sheet date.
