DELTAWHEEL LIMITED

Notes to the abbreviated financial statements for the year ended 31 January 2011

1. Accounting policies

1.1. Accounting convention

The accounts are prepared under the historical cost convention modified to include the revaluation of certain fixed assets and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

1.2. Turnover

Turnover represents the total invoice value, excluding value added tax, of sales made during the year and derives from the provision of goods falling within the company's ordinary activities

1.3. Tangible fixed assets and depreciation

Depreciation is provided at rates calculated to write off the cost or valuation less residual value of each asset over its expected useful life, as follows

Fixtures, fittings and equipment	- 25% reducing balance basis
-------------------------------------	------------------------------

Investment properties comprise the company's interest in freehold and long leasehold properties held for its investment potential. In accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008), such properties are included in the balance sheet at open market value. These properties are revalued annually by the directors. No depreciation or amortisation is provided in respect of freehold investment properties and long leasehold properties with over 20 years to run.

1.4. Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax in the future.

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
