## NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31<sup>ST</sup> MARCH 2004

#### 1. ACCOUNTING POLICIES

#### a) Accounting convention:

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective June 2002).

#### b) Turnover:

Turnover comprises the invoice value of goods and services supplied by the company, net of Value Added Tax and trade discounts.

#### c) Depreciation:

Tangible fixed assets are depreciated at annual rates to write off the cost of the assets over their estimated useful lives using the following methods and rates:-

	<u>% per annum</u>	<u>Method</u>
Motor Vehicles	25	reducing balance
Computer equipment	33	straight line
Plant & machinery	25	reducing balance
Fixtures & Fittings	15	reducing balance

## d) Leasing and hire purchase contracts:

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible fixed assets. Assets acquired under finance leases are depreciated over the shorter of the leases term and their lives. Assets acquired under hire purchase contracts are depreciated over their useful lives. Finance leases are those where substantially all of the benefits and risks of ownership are assumed by the company. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce a constant periodic rate of charge on the net obligation outstanding in each period.

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged to profit and loss account as incurred.

#### e) Deferred taxation:

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes in general, deferred taxation is recongised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recongised only to the extent that the directors consider that it is more likely than that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non-discounted basis at the average tax rates that would apply when timing differences are expected to reverse, based on tax rates and laws that have been enacted by the balance sheet date.
