Notes to the Financial Statements for the year ended 31 December 2020

1. STATUTORY INFORMATION

Luzzo Bespoke Limited is a private company, limited by shares, registered in England and Wales. The company's registered number and registered office address can be found on the Company Information page.

The presentation currency of the financial statements is the Pound Sterling (\mathfrak{L}) .

2. ACCOUNTING POLICIES

Basis of preparing the financial statements

These financial statements have been prepared in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" including the provisions of Section 1A "Small Entities" and the Companies Act 2006. The financial statements have been prepared under the historical cost convention.

The Directors consider that the company has adequate financial resources to continue in operational existence for the foreseeable future and to meet its liabilities as they fall due. Therfore the Directors continue to adopt the going concern basis of accounting in preparing the Financial Statements.

Turnover

Turnover is measured at the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes.

Development costs

The company is engaged in the development of a number of bespoke products for certain major customers, the costs of which it has initially borne in full. The progress and costs incurred in respect of each development project are monitored and reviewed regularly and the company has decided to adopt the following policy with regards to these specific costs: Once a project has been completed the development costs will be written off over a maximum period of three years unless in that time the project has been accepted by the customer and put into production. In this case the development costs will be written off as soon as practicable against the orders received.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life. Plant and machinery etc - 20% on cost

Stocks

Stocks and work in progress are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Cost is calculated using the first-in, first-out method and includes all purchase, transport, and handling costs in bringing stocks to their present location and condition.

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Income Statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Notes to the Financial Statements - continued for the year ended 31 December 2020

2. ACCOUNTING POLICIES - continued

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Hire purchase and leasing commitments

The Directors have considered the provisions of FRS 102 Section 1A in relation to the company's Hire Purchase commitments and calculated interest charges using the recommended Effective Interest Method. (EIM). The company has not accounted for interest charges using this method previously. A comparison has been undertaken to quantify the effects of the change in adopting the EIM which concluded that the resulting difference was not material in relation to existing contracts due to expire within 12 months of the Balance Sheet date. Therefore no adjustment in respect of these charges has been made in the Financial Statements for the year ended 31 December 2020 or the comparative year ended 31 December 2019.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to profit or loss in the period to which they relate.

Investment asset

The company has established a Design Studio primarily as a Showcase for the company's exclusive products. The contents of the Studio are not intended for direct retail but do retain a significant value both in terms of the cost of their production and their ongoing asset value. The asset is included at a valuation established by the Directors and reviewed annually in accordance with current Accounting Standards. The Directors consider that the value as stated in the accounts continues to represent fair value.

3. EMPLOYEES AND DIRECTORS

The average number of employees during the year was 27 (2019 - 31).
