Notes to the abbreviated financial statements for the year ended 31 March 2011

1. Accounting policies

Accounting convention

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

Turnover

Turnover represents the amount derived from the provision of goods and services falling within the company's activities after deduction of trade discounts and value added tax. Turnover is recognised at the point of sale.

Goodwill

No amortisation is provided for goodwill. Annual impairment reviews are carried out to assess the recoverable amount. Any impairment losses are recognised immediately in profit and loss.

Tangible fixed assets and depreciation

Depreciation is provided at rates calculated to write off the cost less residual value of each asset over its expected useful life, as follows:

Leasehold properties	-	Straight line over the life of the lease
Plant and machinery	-	15% on written down value
Fixtures, fittings and equipment	-	10% on written down value
Motor vehicles	-	25% on written down value

Stock

Stock is valued at the lower of cost and net realisable value.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. Timing differences represent accumulated differences between the company's taxable profit and its financial profit, arising primarily from the difference between the accelerated capital allowances and depreciation.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
