

Chairman's Report

2016-17 for Astrocom was explicitly working on R&D. Mainly in working with 3/4G and Broad band products and services development. Most important activity was embracing the internet like products and services for 3G and 4G devices. The primary focus for the company now is to capitalise the know-how in Asia and Africa.

Company ideology is now deeply focussed on building the infrastructure ready for beyond 4G and convergent technologies. However, organisation's financial position is slowing down the progress of technology innovative projects

We are hoping to achieve sales and growth during coming years.

N. Talgeri
Chairman
10th December 2017
