2. ACCOUNTING POLICIES - continued

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of transaction. Exchange differences are taken into account in arriving at the operating result.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to profit or loss in the period to which they relate.

Critical accounting estimates and judgements

Estimates and judgement are continuously evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under certain circumstances.

The Company, thus, makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

There were no major estimates and assumptions made during the year that have a significant risk of causing material adjustments to the carrying amount of the company's assets and liabilities within the next financial year.
