1 Accounting policies

Basis of preparation

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (Effective April 2008).

Exemption from preparing group accounts

The company is part of a small group. The company has taken advantage of the exemption provided by Section 398 of the Companies Act 2006 and has not prepared group accounts.

Going concern

The financial statements have been prepared on a going concern basis. The company has made a loss of \$10,509 (2013 - \$692,147) during the year and has net current liabilities of \$113,522,167 (2013 - \$172,116,669). The directors expect the investment to realise significant returns in future periods and the inter company loan is not expected to be repaid within 18 months of the date these accounts have been signed off and therefore the going concern basis is considered appropriate.

Fixed asset investments

Fixed asset investments are stated at historical cost less provision for any diminution in value.

Foreign currency

Transactions in foreign currencies are recorded at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the closing rates at the balance sheet date. Exchange differences arising from the translation at year end exchange rates of the net investment in foreign undertakings, less exchange differences on borrowings which finance or provide a hedge against those undertakings, are taken to reserves and are reported in the statement of total recognised gains and losses. All other exchange differences are included in the profit and loss account.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Where shares are issued, any component that creates a financial liability of the company is presented as a liability in the balance sheet. The corresponding dividends relating to the liability component are charged as interest expense in the profit and loss account.
