NOTES TO THE ABBREVIATED ACCOUNTS

YEAR ENDED 31 JULY 2007

1 Accounting policies

Basis of accounting

The accounts have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2005).

Turnover

Turnover and profit on ordinary activities before taxation are attributable to the principal activities of the company and arose wholly within the United Kingdom.

In respect of long-term contracts and contracts for on-going services, turnover represents the value of work done in the year, including estimates of amounts not invoiced. Turnover in respect of long-term contracts and contracts for on-going services is recognised by reference to the stage of completion.

Fixed assets

All fixed assets are initially recorded at cost.

Investment properties

It is the intention of the director to hold the property for its long term rental value.

Commercial investment properties are revalued annually and are included in the balance sheet at their open market values. The surplus(es) or deficit(s) on annual revaluation of such properties are transferred to the revaluation reserve. Depreciation is not provided in respect of freehold investment properties. Leasehold investment properties are not amortised where the unexpired term is over twenty years.

This policy represents a departure from the companies Act 1985, which requires depreciation to be provided on all fixed assets. The director considers that this policy is necessary in order that the financial statements may give a true and fair view, because current values and changes in current values are of prime importance rather than the calculation of systematic annual depreciation. Depreciation or amortisation is only one of many factors reflected in the annual valuation. The financial effect of the departure from the Companies Act has been not to recognise a depreciation charge of £25,363 in the profit and loss account, assuming that the commercial investment property would have been depreciated over fifty years on a straight line basis.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
