NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2014

1. Accounting policies

The accounts have been prepared in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents income receivable for goods and services provided in the period, exclusive of Value Added Tax and trade discounts. Turnover is recognised in the period that goods are transported.

Depreciation of fixed assets

A full year's depreciation is charged in the year of acquisition of an asset but none in the year of disposal.

Depreciation has been computed to write off the cost of fixed assets over their expected useful lives at the following rates:-

Plant and machinery	33% per annum reducing balance
---------------------	--------------------------------

Debtors

Debtors are shown after providing for any amounts which in the opinion of the directors may not be collected in full.

Deferred taxation

Deferred tax assets and liabilities have arisen from timing differences between the recognition of gains and losses in the financial statements and their recognition in a tax computation. Full provision is made for all liabilities, and provision is made for assets to the extent that they are considered more likely than not to be recoverable in the foreseeable future. Provision is made using tax rates that are expected to apply in the periods in which the timing differences are expected to reverse based upon rates enacted at the balance sheet date.

Foreign exchange

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate ruling on the date of the transaction. Exchange differences are taken into account in arriving at the operating profit.

Intangible assets

Goodwill is the difference between the amount paid on the acquisition of a business and the aggregate fair value of its separable net assets. It is being written off in equal annual instalments over its estimated economic life of three years.
