Notes to the abbreviated financial statements for the year ended 30 September 2008

1. Accounting policies

1.1. Accounting convention

The accounts are prepared under the historical cost convention and comply with financial reporting standards of the Accounting Standards Board.

1.2. Turnover

Turnover represents the total invoice value, excluding value added tax, of sales made during the year.

1.3. Tangible fixed assets and depreciation

Depreciation is provided at rates calculated to write off the cost less residual value of each asset over its expected useful life, as follows:

Plant and machinery	-	25% reducing balance
Office equipment	-	25% reducing balance

1.4. Deferred taxation

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different from those in which they are included in the company's accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more (or less) tax at a future date, at the average tax rates that are expected to apply when timing differences reverse, based on current tax rates and laws.

1.5. Going concern

At 30 September 2008 there were net current liabilities of £54,420 and a deficiency of assets of £53,771. The company is dependant upon the continued financial support of the directors which will continue for the next twelve months. On this basis the directors considers it appropriate to prepare financial statements on a going concern basis. These financial statements do not include any adjustments which would arise if the accounts had not been prepared on a going concern basis.

1.6. Financial instruments

Financial instruments are classified and accounted for, according to the substance of contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
