## NOTES TO THE ACCOUNTS For the period ended 31 December 2008

#### 1 ACCOUNTING POLICIES

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements.

#### Basis of preparation

These financial statements have been prepared in accordance with the Companies Act 1985 and UK applicable accounting standards and applicable Statements of Recommended Practice. The particular accounting policies are described below.

#### (a) CONVENTION

These financial statements are prepared in accordance with the historical cost convention.

#### (b) INCOME RECOGNITION

Interest income and expense is accounted for on an accrual basis.

#### (c) FOREIGN EXCHANGE

Transactions denominated in foreign currencies are translated into the functional currency at the rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated at the rates ruling at that date. These translation differences are dealt with in the profit and loss account.

#### (d) INVESTMENTS

Fixed asset investments are valued at amortised cost less amounts provided for any permanent diminution in value.

#### (e) FINANCIAL INSTRUMENTS

The income and expense arising from derivative contracts entered into for hedging on-balance sheet assets and liabilities are recognised in the accounts in accordance with the accounting treatment of the underlying transactions being hedged. Any unhedged exposures on derivative contracts that could result in a loss on a mark to market basis are provided for through the profit and loss account.

#### (f) SUBSTANCE OF TRANSACTIONS

The Company's financial statements reflect the substance of the transactions into which it has entered. In determining the substance, all its aspects and implications are identified and greater weight is given to those more likely to have a commercial effect in practice. A group or series of transactions that achieves or is designed to achieve an overall commercial effect is viewed as a whole. Accordingly, the Company has offset the principal amounts due to and from the same third party, in accordance with FRS 5, paragraph 29.

#### (g) FINANCIAL SERVICES FEES

Financial services fees are accrued over the period of the related service.

#### (h) TAXATION

The charge for taxation is based on profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes.

Deferred tax is recognised, without discounting, in respect of all timing differences between the treatment of certain items for taxation and accounting purposes which have arisen but not reversed by the balance sheet date, except as otherwise required by FRS19.

### (i) CASH FLOW STATEMENT

The Company is exempt from the requirement to prepare a cash flow statement under Financial Reporting Standard 1 (Revised 1996) as it is a wholly owned subsidiary undertaking of a company which prepares consolidated financial statements which are publicly available.

#### 10 FINANCIAL INSTRUMENTS-HEDGING

The Company has issued a series of dual currency, fixed rate loan notes for a total of €3.55bn ("Notes"), together with a series of total return swaps ("Swaps") to a group undertaking, respectively as at 31 December 2008. The terms of the swaps set out to effectively create synthetic Euribor-based liabilities for the Company, by substituting the TRL interest rates with applicable Euribor rates. On maturity of the swaps, the Company will exchange a fixed redemption amount of €3.55bn in return for a variable redemption amount. The notes are thus stated in the accounts at a fixed redemption value bearing Euribor interest. These deals all follow the structure as described below.

The terms of the Note provide that the fixed coupon payments are made with reference to the relevant forward Turkish Lira ("TRL") interest rates at issuance and the variable redemption payment is made with reference to the €/TRL foreign exchange rate ruling at the redemption date with the result that, although payments on the Notes are actually made in Euro, the Notes represent, in substance a TRL borrowing. The terms of the Swaps set out to effectively create a synthetic Euribor-based financing for the Company, by substituting the TRL interest rates with applicable Euribor rates and through the inclusion of a variable redemption receipt linked to the €/TRL foreign exchange rate ruling at such date. Accordingly, the Company has eliminated any exposure to TRL.
